2007–2008
Catalog

Equal Opportunity Policy

The College of Charleston is committed to providing leadership in the attainment of equal opportunity for all persons regardless of race, religion, sex, national origin, age, disability, or other legally protected classification. This effort is in compliance with all federal and state laws, including Titles VI and VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 503 and 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975 as amended, and the Americans with Disabilities Act; inquiries should be directed to the Office of Human Relations and Minority Affairs, College of Charleston, Charleston, South Carolina 29424-0001, 843-953-5580.

In order to establish equal opportunity for all persons, the Office of Human Relations and Minority Affairs ensures immediate response to complaints of discrimination based on sex, race, religion, national origin, creed, disability, and age by students, employees, and/or applicants for employment and admission. The director for the Office of Human Relations and Minority Affairs is responsible for coordinating the grievance procedures under the Affirmative Action Program and federal equal opportunity guidelines.

The Office of Human Relations and Minority Affairs addresses the educational and employment needs of individuals and groups who occupy minority status at the College of Charleston and assures complete access to the College for women, minorities and the disabled. As a resource, the Office of Human Relations and Minority Affairs identifies problem areas, recommends remedial or supportive activities to persons in authority, and supports programs of interest to this constituency in the College community and on the local, state, and national levels.

Institution code for the Graduate Record Examination (GRE) and the Graduate Management Aptitude Test (GMAT) is 5113.

This catalog is not a contract. Its purpose is to provide prospective students with a general description of the Graduate School's current curricula, educational plans, offerings, and requirements. Information in this catalog is current through 2007. The Graduate School of the College of Charleston reserves the right to change programs of study, academic requirements, and College policies at any time, in accordance with established procedures, without prior notice.

The Graduate School at the College of Charleston

Charleston, South Carolina 29424-0001

Dear Students and Prospective Students:

Welcome to the Graduate School of the College of Charleston!

Charleston, located in the heart of the South Carolina Lowcountry, is a fantastic place to undertake graduate study. Our seventeen master's degrees and six certificate programs take advantage of the unique opportunities provided by the people, institutions and environment of the area and offer the specialized knowledge and training sought by professionals living and working in the region. Because of the superb credentials of our faculty and relatively small size of our programs, graduate students enjoy close personal relationships with their mentors and have diverse opportunities for scholarly research and experiential learning. Faculty are eager to work with students inside and outside the classroom. We encourage students to engage in research and to attend academic conferences with us. The Graduate School has recently established special grants for student research and presentation projects. See our website under "News & Announcements" <http://www.cofc.edu/gradschool/Research/index.php>.

As the College's core values affirm, students, faculty and staff exhibit a high level of social responsibility and share a commitment to local, national and global communities. We look forward not only to your contributions to the intellectual life of our academic community in the next few years, but also to those future contributions you will make to the development of the city, state and world as alumnae/i.

Our website is designed to answer questions you may have about program requirements and regulations, Graduate School personnel and contact information, research grants and presentation opportunities, financial aid, student employment and campus and community life. If you cannot find the information you need using our website, please do not hesitate to contact the Graduate School Office—in person, by phone or by email. We have a wonderful staff that is eager to get to know you personally and to assist you in making your graduate experience at the College of Charleston an exciting and productive time of intellectual and personal growth.

On behalf of everyone in the Graduate School, I wish you the best in your upcoming studies.

Sincerely,

Amy T. McCandless

About the College of Charleston

Statement of Institutional Mission

The College of Charleston is a state-supported comprehensive institution providing a high-quality education in the arts and sciences, education, and business. Consistent with its heritage since its founding in 1770, the College retains a strong liberal arts undergraduate curriculum. Located in the heart of historic Charleston, it strives to meet the growing educational demands primarily of the Lowcountry and the state and, secondarily, of the Southeast. A superior-quality undergraduate program, enrolling 9,000 to 10,000 full-time students, is central to the mission of the College.

The College of Charleston seeks applicants capable of successfully completing degree requirements and pays particular attention to identifying and admitting students who excel academically. The College of Charleston serves a diverse student body from its geographical area and also attracts students from national and international communities. The College provides students a community in which to engage in original inquiry and creative expression in an atmosphere of intellectual freedom. This community, founded on the principles of the liberal arts tradition, provides students the opportunity to realize their intellectual and personal potential and to become responsible, productive members of society.

In addition to offering a broad range of baccalaureate degree programs, the College currently provides an increasing number of master's degree programs that are compatible with the community and the state. As a prominent component of the state's higher education system, the College encourages and supports research. Its faculty are important sources of knowledge and expertise for the community, state, and nation. Additionally, the College provides an extensive credit and non-credit continuing education program and cultural activities for residents of the Lowcountry of South Carolina.

Core Values

As members of the College of Charleston community, we affirm, embrace and hold ourselves accountable to the following core values.

Integrity – adherence to the highest ethical standards in all our professional obligations and personal responsibilities

Academic excellence – commitment to a dynamic intellectual community, high academic standards, strong academic programs, and a high quality faculty of engaged and engaging teacher-scholars

Liberal arts education – dedication to a liberal arts and sciences education that encourages intellectual curiosity and fosters each student's ability to think creatively and analyze, synthesize, apply and communicate knowledge from many sources

Respect for the individual student – devotion to the intellectual, ethical and social development of each student

Diversity – commitment to a globally oriented and diverse academic community

Community – commitment to compassion, mutual trust, respect, civility, collegial shared governance, teamwork, and the general welfare of the institution and the individual

Public mission – commitment to our social responsibilities and to serving the educational needs of the state of South Carolina and our community

Lowcountry Graduate Center

Phone: 843-953-GRAD (4723)
www.lowcountrygradcenter.org
info@lowcountrygradcenter.org

Created through a partnership of the College of Charleston, the Citadel and the Medical University of South Carolina, the Lowcountry Graduate Center (LGC) now includes the University of South Carolina and Clemson University, to further expand the opportunities for graduate education in the Lowcountry. The LGC is working in partnership with higher education institutions to add graduate programs that will have the greatest impact on the economic development of the region. The LGC is located in North Charleston

and shares facilities with the College of Charleston North Campus.

2007 LGC Graduate Certificates and Degree Programs:

Ph.D. in Educational Administration from the University of South Carolina

- Ph.D. in Higher Education Administration from Clemson University
- Master of Engineering in Electrical Engineering from the University of South Carolina
- Master of Arts in Communication from the College of Charleston
- Master of Social Work from the University of South Carolina
- Master of Science in Computer and Information Sciences, from the College of Charleston and The Citadel
- Organizational and Corporate Communication Certificate from the College of Charleston
- Technical Project Management Certificate from The Citadel
- Teaching English to Speakers of Other Languages Certifications from the College of Charleston
- Master's level Business Course from The Citadel
- Master's level Education Courses from the College of Charleston and The Citadel

The LGC is continually working to assess the needs of the Lowcountry for graduate and professional education and to ultimately bring those identified programs to the area.

By increasing the range of graduate programs in the region, the LGC will spur economic growth in the community, attracting new business to the area and making it easier for established companies to attract and retain employees. In addition to offering courses, the LGC also acts as a physical point of entry that assists the public in matching the graduate needs with available programs and provides academic information, counsel and advice to current students and interested parties.

Oak Ridge Associated Universities (ORAU)

ORAU, a non-profit organization headquartered in Oak Ridge, Tennessee, is a consortium of 98 organizations, including universities, federal laboratories and industry, dedicated to advancing scientific research and education. As a partner and contractor with the U.S. Department of Energy, ORAU operates the Oak Ridge Institute for Science and Education (ORISE) to conduct research, education and training in the areas of science and technology, national security, environmental safety and health and environmental management. ORISE provides numerous fellowship, award, and grant opportunities to graduate students of member institutions. ORAU and its member institutions also sponsor, co-sponsor and organize many math, science, and engineering conferences and workshops each year, including an annual graduate school fair to allow undergraduate students to share the results of their research with potential graduate schools. Additional information about ORAU can be found at <http://www.oraui.org>. A comprehensive listing of ORISE programs and opportunities can be found at <http://www.oraui.org>.

The Graduate School

843-953-5614

<http://cofc.edu/gradschool>

Application and Admissions

In order to enroll in graduate-level courses, students must have received a baccalaureate degree from an accredited college or university, and be admitted to some category of graduate studies at the Graduate School. Only students who have been formally admitted as degree-seeking, non-degree, provisional or transient students may enroll in graduate courses.

To be considered for admission to degree-seeking, non-degree or certificate programs at the Graduate School, students must submit a

completed Application for Admission and pay a nonrefundable application fee. All applicants are required to submit official transcripts of all previous academic work to the Graduate School office. All materials should be mailed to The Graduate School of the College of Charleston, Charleston, S.C. 29424. Other admission criteria will vary by program.

NOTE: Applicants are responsible for ensuring that all materials are received by the Graduate School Office for the program to which they are applying.

Admission Categories

Degree-Seeking Student

A candidate's acceptance into a graduate degree program is based primarily upon his or her previous academic record. Admission decisions for the specific programs and degrees are made by the admission committee for each program. (See departmental statements in this catalog for requirements in specific programs.)

Upon acceptance as a degree-seeking student, each applicant is sent an acceptance letter, an acceptance-of-offer form and a health form. These forms must be completed and sent to the offices indicated on the forms. Students are also assigned a graduate advisor to assist in developing their plan of study. It is imperative that the appointed advisor be consulted prior to enrolling in courses intended to count toward the degree.

Important Note: If an applicant has been accepted for a specific term and does not enroll for that term, the applicant's matriculation will be ended and he/she will be obligated to reapply to the program. Applicants wishing to defer initial enrollment must receive the graduate program director's written approval stipulating a new start date, before the first day of class of the term in which they were originally accepted.

Non-Degree Student

Non-degree students are those who desire registration with credit in graduate courses but are not candidates for a degree. Applicants seeking acceptance as non-degree status must file the regular application for admission and submit the required application fee and transcripts.

Depending upon the program, between 6 and 12 credit hours of work taken in non-degree status may be applied toward degree requirements if the student is later admitted to a degree program and the course credit is accepted toward the degree. In order to accomplish reclassification as a regular degree student, the candidate must submit all materials prescribed by the appropriate admission committee.

Students who are not seeking a degree but wish to take courses for the purpose of professional teacher certification renewal and/or for professional and personal enrichment are admitted as non-degree students.

Provisional

A provisional student is one who does not meet all the admission criteria, but in the judgment of the appropriate program admission committee, has the potential to successfully complete graduate work. The student's application as a degree-seeking student will be reconsidered after the student has met the provisional status stipulations.

Senior Citizens

South Carolina residents 60 years of age or older may take courses on a space-available basis without paying a tuition charge. Proof of age is required. In addition to the application fee, a nominal registration fee (currently \$25) will be assessed each semester. Under a legislative provision, courses may be taken either for credit or audit. This category of student may register on the day classes begin, but must have applied to the graduate program offering the course and have received permission to enroll from the graduate program director. Students over the age of 60 who register prior to the first day of classes will be subject to the regular tuition charges. Those who wish to take graduate classes must apply through the Graduate School Office.

Transient

A student in good standing in any regionally accredited graduate school who wishes to enroll in graduate courses for credit for the purpose of transferring this credit to his or her graduate school may be admitted as a transient graduate student. This admission is valid for only one

semester or one summer session but may be renewed any number of times upon reapplication. No transcripts are required for transient student enrollment, but a letter from the graduate dean of the home institution certifying student-in-good-standing status must be provided. Transient students must also complete an application form and pay the application fee.

International Students

Each international student applying for admission to graduate study at the Graduate School must satisfy the following requirements:

- Earn an appropriate undergraduate academic degree equivalent to an American bachelor's degree (B.A., B.S.) prior to enrolling for graduate study.
- Must have their academic credentials evaluated by one of several credential evaluation organizations from a list provided by the Graduate School Office.
- Make up any deficiencies in previous college/university academic work by successfully completing appropriate courses at the undergraduate level at the College of Charleston.
- Meet all admission criteria for the specific graduate program.
- Demonstrate proficiency in the English language (if English is not the student's primary language) as evidenced by the following section scores: writing=20, speaking=23, listening=17 and reading=21. The minimum total score accepted for admission is 81.
- Provide proof of ability to meet all education-related expenses while engaged in graduate studies by completing a Certification of Finances form with official signatures, prior to being admitted to a program.

An international information packet that includes all required international forms is available at www.cofc.edu/gradschool/future.

Note: In some cases, a sworn affidavit of support or notarized bank officer's statement is sufficient. In certain countries, United States Consular officers require prior payment of the first-year tuition and fees before a non-immigrant student visa will be issued. Applicants should inquire about local practices

in advance in order to establish their graduate study plans..

General Entrance Examinations

Most of the graduate programs at the College of Charleston require some form of entrance examination as part of the application requirements. (Please review the minimum

entrance requirements in the individual program sections of this catalog.) The two main tests used are the Graduate Record Examination (GRE) and the Graduate Management Aptitude Test (GMAT).

The GRE and the GMAT exams are computer-based tests and are available at Prometric Centers. You may also visit the following websites in order to learn more about and register for these two exams: www.gre.org or www.gmat.org.

Your results from these examinations will be valid for application for applying to College of Charleston graduate program for up to five years. Examination results older than five years will not be considered for entrance into a graduate program.

Orientation

In order to help new degree-seeking students acclimate to the Graduate School, three orientation sessions are held each calendar year: in August, January, and May. In addition, the Graduate School will offer topical workshops for new students and will notify them of the available orientation and workshop sessions. For details, visit <http://www.cofc.edu/gradschool/newstudents/index.php>.

Academic Calendar

Refer to <http://www.cofc.edu/gradschool/current/calendar.php> for the most up-to-date academic calendar.

Post-Admission Policies

All students are responsible for familiarizing themselves with the portions of this catalog that pertain to their course of study. Statements concerning courses and expenses should not be regarded as irrevocable contracts between the student and the institution. The Graduate School reserves the right to change the schedule of classes and cost of instruction at any time within the student's term of residence. Students are also responsible for keeping themselves informed of individual program academic policies. Students should contact their program directors or the Graduate School Office for policy changes.

Health Requirements

The Graduate School of the College of Charleston requires students to demonstrate immunity or proof of vaccination for measles, rubella, mumps, polio, tetanus, and diphtheria. Documentation of TB skin test within a year is required. Requirements for individuals born before 1957 are detailed in the health form.

Health forms are a means for Student Health Services to ensure the optimum health of students on campus; the forms are absolutely confidential and in no way affect student admission status. The health form, however, must be completed and returned with the immunization information in order to complete the registration process.

Other recommended but not required immunizations include the chicken pox vaccination, if never exposed, the meningitis vaccine, and the Hepatitis B vaccination series for young adults. In the fall of each year, influenza vaccination is offered to all students without charge.

If problems arise with complying with this policy, or in obtaining adequate vaccinations, please call Student Health Services at 843-953-5520. Please return the completed forms to:

Student Health Services
181 Calhoun Street
Charleston, S.C. 29424

Academic Policies

Grading System

NOTE 1: In order to receive any correspondence from the Graduate School, students must have their current address on file at the Graduate School Office. Address update forms are available at the Graduate School Office or students may update their addresses on Cougar Trail.

NOTE 2: All Graduate School business will be conducted via e-mail only through a student's CofC Edisto e-mail address.

Grading System

Students may access their grades through <https://cougartrail.cofc.edu>.

Students receive letter grades for every course in which they enroll. Each letter grade and its equivalent numerical quality point value are listed below.

Grade	Grade Points
A Superior	4.00
B+ Very good	3.50
B Good	3.00
C+ Fair	2.50
C Acceptable	2.00
F Failure	0
I Incomplete	0
W Withdrawal	0
P Pass	0
S Satisfactory	0
U Unsatisfactory	0
XF Failure due to academic dishonesty	0

"W" Grades

The grade "W" (withdrawal) is recorded if a student withdraws voluntarily from a course before the published date each semester. The "W" may not be awarded after this date except by special permission of the Graduate School Office, and only in those cases when continued enrollment in the course would be detrimental to the student's health or has been made impossible by circumstances beyond the student's control. Students wishing to withdraw after the regular withdrawal period must complete a special form in the Graduate School Office.

"I" Grades

The grade "I" indicates that only a small part of the semester's work remains to be done, that the student is otherwise doing satisfactory work in the course, and that an extension of time is warranted to complete the work. The "I" also signifies that an agreement has been established between professor and student as to the quantity of work remaining to be done, the deadlines established for its completion, and a schedule of meeting times. This agreement must be made in writing with the professor, student

and program director having a copy. All work for completion of the course requirements must be submitted by the end of exams in the next major term (Fall or Spring). One additional extension may be granted to the student using the Course Requirement Completion Extension form with signatures of approval by both the professor and the dean of the Graduate School. If the student does not complete the work within the prescribed time period, the “I” is changed to an “F” and the student will be withdrawn from the Graduate School and will not be allowed to reapply to his or her program or to enroll in any graduate coursework counting toward any graduate degree or graduate certificate at the College of Charleston for one calendar year.

“XF” Grades

The grade of XF means failure due to academic dishonesty. If a student is found responsible for an act of academic dishonesty, the professor for that course must assign an XF. The XF remains on the student’s official transcript for a minimum of two years. After two years, the student can petition the Honor Board for the removal of the X. The F will remain.

Satisfactory Graduate GPA

Degree-seeking graduate students in The Graduate School of the College of Charleston are required to maintain a 3.0 grade point average (GPA) in their graduate coursework. In addition, some students may have specified GPAs for undergraduate coursework required by their graduate programs.

GPA Calculation

The GPA is calculated on the basis of all graduate coursework identified in a student’s program-of-study (POS), as well as any additional coursework that is acceptable to the degree program.

College of Charleston coursework taken prior to acceptance into degree-seeking status will not be used in the calculation of the student’s GPA, unless accepted as part of the student’s POS. Such coursework must be identified at the time the student is accepted into the program.

Decisions concerning an academic action such as probation, academic dismissal and

graduation will be based on the courses and GPA as described above.

Auditing Courses

Permission to audit a regular academic course must be received from the instructor teaching the course. This authorization will be given after late registration has been completed and only if there is a seat available in the class. An audit must be declared no later than the end of the drop/add period; a student may switch from grade-to-audit status or audit-to-grade status only within the drop/add period.

An audit will be recorded on a student’s permanent record at the Graduate School. Faculty may set attendance and/or other requirements for audit students; an audit may be revoked if the student does not comply with these requirements. Auditing forms are available from the Graduate School Office.

Withdrawing from Courses or a Program

It is extremely important that any student withdrawing from a course either does so via Cougar Trail during the regular withdrawal period or with a form procured from the Graduate School Office after the regular withdrawal period.

Students who wish to withdraw from the Graduate School must complete a program withdrawal form. These forms may be obtained from the Graduate School Office. If the student is withdrawing from classes as well, the procedure outlined above must be followed.

Non-Payment of Fees – Summer School

Students will not be dropped from their enrolled courses for non-payment of fees during summer terms. Instead, students who have enrolled in summer classes, but who fail to attend will be assessed a non-refundable \$250 fee per course for failure to officially drop or withdraw from a course.

Non-Payment of Fees – Academic Year (Fall and Spring)

Students who have been dropped more than once from their classes for non-payment of fees after bills are due will have a hold placed on their account by the Treasurer’s Office. At this point, the student must go to the Treasurer’s Office to settle the bill before being put back in classes. Once the bill has been paid and the hold removed, the student must bring the receipt to the Graduate School Office. A staff member will then re-enroll the student appropriately.

Academic Probation

Graduate students at the Graduate School are expected to maintain a cumulative grade point average (GPA) of 3.0 on a scale of 4.0 in their programs. Degree-seeking candidates whose GPA falls below 3.0 will be placed on academic probation. Students who are on probation must raise their averages to a satisfactory level (3.0 or better) upon attempting three additional courses in their program, or within 1.5 academic years, whichever comes first. During the probationary period, students must also demonstrate that they are making progress by maintaining or improving their grade point averages.

Students whose averages remain below a 3.0 after attempting three additional courses, or within 1.5 academic years after being placed on probation, will be withdrawn from the Graduate School and will not be allowed to reapply to their programs or to enroll in any graduate coursework counting toward any graduate degree or graduate certificate at the College of Charleston for one calendar year.

Academic Dismissal

Maintaining an adequate GPA is only one criterion for satisfactory academic progress. Students receiving three grades below the grade of “B” or one grade of “F” in their programs will be withdrawn from the Graduate School and will not be allowed to reapply to their programs or to enroll in any graduate coursework counting toward any

graduate degree or graduate certificate at the College of Charleston for one calendar year.

Other criteria such as progress toward completing a thesis or requests for extensions of a program of study, etc., may be established by individual programs. Students who fail to meet the standards of their programs for satisfactory academic progress may be withdrawn from their programs.

Appeals

Students who have been removed from their graduate programs because of failure to resolve GPA or satisfactory progress issues may appeal these decisions in writing to the dean of the Graduate School. Written appeals should contain all information pertinent to the issues with special circumstances clearly outlined. The graduate dean in consultation with the program directors will decide on appeals and will inform students of decisions. Decisions of the dean are final.

Readmission

Students who have been removed from their graduate programs because of failure to resolve GPA or satisfactory progress issues may reapply to their graduate program after one calendar year from the date of their having been withdrawn from their programs. Students must meet all criteria for admissions currently in effect at the time of application for readmission.

Transfer of Credit

Students may transfer graduate credit from an accredited graduate school under the following conditions:

- The institution transferring the credit is accredited by the cognizant regional accrediting association to offer graduate degree programs.
- The credit is fully acceptable to that institution in satisfaction of its advanced degree requirements.
- The credit is applicable in terms of content to the student's program of study and it has been approved by the graduate program director.

Programs may include no more than 12 semester hours of transfer credit. However, up to 12 hours, the number of transfer credits allowed

may vary by program. Credit earned at The Citadel or the Medical University of South Carolina is not considered transfer credit provided the student registers for the coursework using cross-registration procedures, or the course is part of a joint graduate program.

The student assumes responsibility for initiating the request for transfer graduate credit on a program of study. An official transcript containing the requested transfer work must be on file in the Graduate School Office. If such work is shown on the transcripts provided in support of the original admission to the Graduate School, a new record is not needed.

Courses considered for transfer credit must carry a minimum grade of "B."

Transfer credit that is accepted must have been in courses started six years or less before the semester in which the degree work is completed.

Work done in correspondence courses may not be credited toward the degree.

Time Limit Requirements

All work credited toward the M.Ed. and M.A.T. degrees in education must be completed within six years from the date of a student's initial enrollment in graduate courses at The Graduate School of the College of Charleston, regardless of classification at the time of initial enrollment. The M.A. in English, bilingual legal interpreting, history, M.P.A. (in public administration), M.S. in accountancy, computer and information sciences, environmental studies and mathematics degree programs must be completed within five years. The M.S. in marine biology must be completed within four years. The time period begins the term for which the student was accepted. Students who for whatever reason decide to interrupt their studies are still bound by the original time period. Extensions beyond the four-, five- or six-year time period must be approved in writing by the program director and dean of the Graduate School.

Full-Time/Part-Time Status

A full-time academic course load consists of nine enrolled graduate-level hours; a part-time academic course load consists of less than nine enrolled graduate-level hours, and a half-time

course load consists of three enrolled graduate-level hours.

Continuous Enrollment

A student who is in the process of completing a research or thesis project or is using library and laboratory facilities and consulting with College of Charleston faculty must maintain continuous enrollment in the program. Continuous enrollment can be maintained by enrollment in a minimum of one hour of graduate credit per semester, excluding Maymester and summer school. The continuous enrollment will entitle the graduate student to a valid ID card, full access to the Marlene and Nathan Addlestone Library, and such support from faculty and facilities of the Graduate School as the student's program of study necessitates.

Continuous Research Enrollment Course

Students who are nearing the end of their coursework for their degree, and who have begun work on their master's thesis topic, may need to utilize the Continuous Research Enrollment course (e.g. BIOL 900 or EVSS 900, etc.) to maintain a suitable level of enrollment for their programs. Continuous Research Enrollment is linked directly to students' research on a thesis topic and must be considered as a progress report toward that end when graded by the thesis advisor. The course will be graded on a pass/fail basis.

Students may not enroll in the course until a special approval form has been completed and all appropriate signatures have been applied. The special approval form is then submitted to the Graduate School Office for further processing.

Continuous Research Enrollment hours cannot be used as part of a program of study towards a degree. Continuous Research Enrollment hours may not be taken in lieu of thesis hours, but may be taken in combination with thesis hours, if no additional hours are available.

Thesis Requirements

A thesis is a permanent record of information gained through extensive study and research. It is the culmination of the student's efforts, coupled with those of his or her advisor and thesis committee.

The thesis reflects upon the credibility of all parties involved: the student, the advisor and committee, the School in which the student is enrolled and the College of Charleston. A thesis is required for some of the graduate programs in the Graduate School, while in other programs, it is an option.

Because a thesis is a public document, archived in the College of Charleston library and available to the public as well as to scholars worldwide, a high degree of consistency is necessary. Thesis regulations common to all programs include paper quality, margins, fonts, binding and disposition of copies. These common requirements can be found in the Graduate School's thesis guide, which can be viewed and downloaded at <http://www.cofc.edu/gradschool/current/index.php>. Documentation, length and other matters that are discipline-dependent will differ from field to field and will be found in individual master's program thesis guides.

Graduation

Candidates for a graduate degree must submit an Application for Graduation to the Graduate School Office by the dates indicated on the academic calendar. If a candidate fails to complete his or her degree requirements, the graduation application must be cancelled at least two weeks before the end of the semester. The application must be resubmitted in the semester the requirements are completed. Students must also pay a graduation fee at the time of submission or resubmission of the application. Fees may be paid at the Graduate School Office or Treasurer's Office. No bill will be sent.

Students must be enrolled either in courses or in one hour of continuous enrollment in the semester in which they intend to graduate.

Notice of Change

Rules, regulations, fees, course descriptions, and program requirements are subject to change without notice. When a change in program requirements is made while a graduate student is enrolled in the program, the student may elect to complete the program under the requirements in effect at the time of matriculation or to shift entirely to the new requirements. As a result of ongoing

reviews of all graduate programs, certain course offerings may be deleted or restructured between editions of the *Graduate Catalog*.

financialaid@cofc.edu

Satisfactory Academic Progress (SAP) Policy for Financial Aid Eligibility

All federal financial assistance programs are authorized under Title IV of the Higher Education Act of 1965 as amended, and require the establishment of minimum standards of academic progress that students must meet to maintain general eligibility for financial aid. While students meeting these standards are generally eligible for aid, some aid programs require higher standards that may preclude the student from qualifying for those programs.

The College of Charleston/The Graduate School of the College of Charleston Satisfactory Academic Progress (SAP) Policy for Financial Aid Eligibility applies to all aid programs administered by or through the Office of Financial Assistance and Veterans Affairs. These standards apply to all students seeking or receiving assistance, whether or not aid may have been received previously. All students must be admitted to and eligible to enroll in an approved degree/certificate program of study. Non-degree students are not eligible for federal and state aid programs.

Qualitative Standards: Graduate students must maintain a cumulative grade point average of at least 3.0. Students with a GPA of less than 3.0 are not eligible to receive financial aid.

Incremental Quantitative Standards: Graduate students must successfully complete 50% of the cumulative hours attempted. The incremental assessment is performed after grades are posted at the end of each spring semester.

Time Limitation Quantitative Standards:

From the date of first enrollment in a specific degree program, students seeking a master's degree must complete all degree requirements (including research and thesis) within five years.

General SAP Policies and Procedures Applicable to All Students

Withdrawal: Any student withdrawing from coursework will be evaluated based on the minimum number of credit hours attempted at the point of aid disbursement. For example, if a student enrolled in 12 hours withdraws from three hours, the evaluation is based on nine hours. Anything less than nine hours will have an adverse effect.

SAP Probation: Students who do not meet the SAP standards minimum grade point average and/or have not completed the required percentage of hours will be placed on SAP probation for the next incremental assessment period (one 12-month period beginning with Maymester). Students placed on probation are encouraged to meet with their academic advisor to develop a plan for making up deficiencies within the next incremental assessment period.

Termination of Aid: Students who are dismissed from the College of Charleston for any reason are terminated from financial aid. Students who do not meet the SAP standards for financial aid eligibility as of the end of the SAP probation period will be terminated from financial aid until they are again in full compliance.

Reinstatement of Aid: Students who are terminated from financial aid may submit an appeal for reinstatement of eligibility when they have mitigating circumstances beyond their control, which resulted in deficiencies that could not be made up while on SAP probation. Such circumstances include the student's injury or illness, death of a relative, or other special circumstances. In cases where the student and/or student's family lives in an area that has been officially declared a national disaster area, an appeal may be filed.

Appeal forms for reinstatement of eligibility are available from the Office of Financial Assistance and Veterans Affairs' website at www.cofc.edu/finaid in the "download forms" section. Appeals for reinstatement of eligibility are the responsibility of the student. The

appeal must be submitted within the published calendar of appeal and include the term for which reinstatement is requested. Appeals must specifically reflect the unique circumstances that were beyond the control of the student. The appeal should provide specific resolution to circumstances and supporting documentation as indicated on the appeal form.

Students appealing for reinstatement of eligibility remain ineligible to receive aid, but may pursue participating in the College of Charleston Semester Installment Payment Plan (not available in summer) through the Treasurer's Office. Students should be prepared with other resources to pay all educational expenses not covered by the payment plan. Students whose appeals are approved may have their eligibility for aid reinstated. Financial aid may be awarded if the student meets routine eligibility criteria, subject to availability of funds. The College of Charleston's satisfactory academic progress policy for financial aid eligibility complies with the Higher Education Act of 1965, as amended, federal regulations found in Section 668, 690, and applicable DCL GEN 96-10, 96-18, et al.

SAP Appeals Calendar

Summer: Students appealing eligibility for this period must have submitted an appeal by the first weekday in June.

Fall and spring: Students appealing eligibility for the academic year may submit an appeal from the second Monday in May until the last weekday in August. Students who are making up hours from the previous academic year in Maymester and summer sessions are strongly encouraged to appeal for the fall semester after summer grades are posted on the Cougar Trail.

Spring: Students appealing for the spring semester only may submit an appeal from the first weekday in January until the last weekday in January.

Return of Title IV Funds Policy

The Return of Title IV Funds Policy (federal student financial aid programs) was implemented at the College of Charleston in fall 2000. Federal regulations require each educational institution to have a written tuition and fees refund policy (see "basic fees and expenses") and a return of Title IV funds policy to be applied to students

who withdraw during a term for which aid has been received. The Return of Title IV Funds Policy applies only if the student completely terminates enrollment (i.e., cancels his/her registration, withdraws, or is dismissed) or stops attending classes before completing more than 60 percent of the enrollment period.

The amount of Title IV aid that a student must repay is determined in accordance with the federal formula for return of Title IV funds as set forth in Section 484B of the Higher Education Act. This law also specifies the order of return of the Title IV funds to the program from which they were awarded.

A repayment may be required when aid has been credited to a student's account from financial aid funds in excess of the amount of aid the student earned during the term. The amount of Title IV aid earned is determined by multiplying the total Title IV aid (other than federal work study) for which the student is qualified by the percentage of time during the term that the student was enrolled.

If less aid was disbursed than was earned, the student may receive a late disbursement for the difference. If more aid was disbursed than was earned, the amount of Title IV aid that must be returned (i.e., that was unearned) is determined by subtracting the earned amount from the amount actually disbursed.

The responsibility for returning unearned aid is allocated between the College of Charleston (CofC) and the student, according to the portion of disbursed aid that could have been used to cover CofC charges and the portion that could have been disbursed directly to the student once CofC charges were covered. CofC will distribute the unearned aid back to the Title IV programs as specified by law. The student will be billed for the amount the student owes to the Title IV programs and any amount due to CofC resulting from the return of Title IV funds used to cover charges.

Students' Rights and Responsibilities

In meeting the standards for admission to The Graduate School of the College of Charleston and choosing to enroll, students are subject to all college regulations. The academic and non-academic policies outlined by the graduate school are intended to promote honorable citizenship that encourages a thriving living and learning environment sensitive to the rights of others and the achievement of knowledge. Our expectations neither advocate the surrender of basic constitutional rights nor dilute those rights, but strengthen and complement the rights of each individual enrolled.

By enrolling at The Graduate School of the College of Charleston, students accept the responsibility to adhere to its regulations and codes. It is in the spirit of good citizenship and community stewardship that specific rights and responsibilities are detailed in the Student Handbook: A Guide to Honorable Conduct. The handbook is available at www.cofc.edu/studentaffairs/general_info/studenthandbook.html. It is the responsibility of all students to become familiar with the academic and conduct regulations that govern eligibility to continue at the graduate school. Examples include:

- Academic Integrity and the Honor Code
- Student Code of Conduct
- Classroom Code of Conduct
- Alcohol and Substance Abuse Policy
- Drug-Free Schools and Communities Act
- College of Charleston English Fluency Policy
- Student Grievance Procedure
- Sexual Harassment Policy

Confidentiality of Student Records (FERPA)*

The Family Educational Rights and Privacy Act of 1974 is a federal law designed to provide students with greater access to and control over information contained in their educational records while at the same time prohibiting, in most circumstances, the release of any information (other than directory information) contained in those educational records without the expressed and written consent of the

student. This law guarantees privacy of student records, open access by students to their records, restricted release of information to specified authorities or others only with written consent, and procedures allowing students to challenge the contents of their records. Forms necessary for release of information or restriction of directory information are provided by the Office of the Registrar. Each campus department may require a signed release specifying the type of information to be released and to whom. School officials may not disclose personally identifiable information about students, without written permission of the student, unless such action is covered in the exceptions permitted by the ACT. For the list of exceptions, please refer to FERPA on the website of the Office of the Registrar.

The Graduate School of the College of Charleston designates the following categories of student information as public, or "Directory Information." (The graduate school may disclose such information at its discretion unless a student has filed a request with the Office of the Registrar to prevent its disclosure.) Name, local address, permanent address, telephone number, campus e-mail address, date and place of birth, dates of attendance, current enrollment, photographic images, past and present participation in officially recognized sports and activities, including fraternities and sororities, and physical attributes (e.g., height and weight) of athletic team members. Please refer to the registrar's Web site at www.cofc.edu/~register/ferpa/index.html for additional information on FERPA and the disclosure of educational records.

Campus Resources

Avery Research Center

843-953-7609

www.cofc.edu/avery/

The Avery Research Center for African American History and Culture, located at 125 Bull Street, is an archive and museum that has been established to document, preserve, and make public the unique historical and cultural heritage of African Americans in South Carolina and the Lowcountry.

Center for Disability Services

Voice: 843-953-1431

TDD: 843-953-8284

www.cofc.edu/~cds

snap@cofc.edu

The College of Charleston actively and affirmatively seeks to accommodate any currently enrolled student with a certified disability according to the regulations established by Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. These services are provided through the Center for Disability Services (CDS). Upon admission, students whose disabilities would require accommodation are urged to apply for services by contacting the CDS before the semester begins.

Center for Student Learning

843-953-5635

www.cofc.edu/~csl

The Center for Student Learning is an academic support program for all students. Composed of accounting, foreign languages, mathematics, study skills, speaking, IT fluency, writing labs and other services, the CSL provides students with individualized assistance from trained and experienced staff, faculty and peer tutors. Students may receive tutoring on a walk-in basis or by appointment. Study groups and Supplemental Instruction sessions are available, and seminars and workshops are offered periodically throughout the semester.

Marlene and Nathan Addlestone Library

843-953-5530

www.cofc.edu/~library/

The Marlene and Nathan Addlestone Library, the main campus library, features 260 student computers, 1,400 seats, 1,752 voice and data outlets, as well as a café and expansive garden. The library is also home to the Student Computing Support Desk and a Student Technology Center. The library holds more than 3,200 print journals, and 29,000 electronic journals. Students will find helpful library staff ready to assist with papers, projects and assignments.

Area Library Resources

The Graduate School of the College of Charleston students also have access to the library facilities of the following institutions:

Charleston Southern University	863-7938
The Citadel	953-6845
Medical University of S.C.....	792-2371
Trident Technical College	
Berkeley Campus.....	899-8055
Main Campus	574-6096
Palmer Campus.....	722-5540

Students may also use the facilities of the following neighborhood libraries subject to the policies of each institution:

Charleston County Library.....	805-6833
Charleston Library Society	723-9912
S.C. Historical Society	723-3225

Marine Resources Library

843-953-9370

<http://mrl.cofc.edu/>

The Marine Resources Library at Fort Johnson houses the extensive marine science holdings of the College of Charleston, the South Carolina Department of Natural Resources Marine Resources Division and NOAA/NOS/ CCEHBR/ Charleston Laboratory.

International Education and Programs

843-953-7661

www.cofc.edu/international/

The Office of International Education and Programs provides assistance to international graduate students with visas and related immigration and naturalization concerns. The office also serves as a resource center for students interested in studying abroad. The office is located in the Multi-cultural Center on 207 Calhoun Street.

Office of the Registrar

843-953-5668

<http://www.cofc.edu/~register/index.htm>

Cougar Trail on the Web

Cougar Trail on the Web is a computerized system by which students may directly monitor their records and manage their progress at the College of Charleston. Cougar Trail on the Web also allows students to view course offerings, register for classes, add, drop, and withdraw

from individual courses, obtain their grades and course schedules, and view their unofficial transcripts, transfer credit summaries and ON COURSE degree audits. Students may also pay their bills online by e-check or credit card and view and update personal data as well as check any holds on their records. Enrollment verification and attendance validation are also available. All records on Cougar Trail are confidential and are accessible only by the appropriate student.

Students may access Cougar Trail at <https://cougartrail.cofc.edu>.

Transcripts

Students may obtain a transcript of their academic record by completing and signing a request form in the Office of the Registrar or by obtaining a Transcript Request Form online at www.cofc.edu/~register/. The same information may be mailed or faxed in with a check, credit card or money order made payable to the College of Charleston. Each transcript costs \$5. Express handling and delivery are available at an additional cost. Transcripts will not be issued for any student who has overdue financial obligations to the College of Charleston. A student's record can be released by the registrar only upon specific signed request of the student. This request must be made in writing at least two weeks before the date the transcript is desired.

Requests must include: name while enrolled, SID number, record type (undergraduate or graduate), dates of attendance at the College, permanent address and phone number complete with destination address (including the specific office), purpose of transcript, payment and student signature.

Department of Information Technology

843-953-5457

<http://www.cofc.edu/it/>

The Department of Academic Computing operates a large computing center in the Addlestone Library that is open to all College of Charleston students. This center houses approximately 260+ personal computers, consisting of predominately high-performance Dell PCs, laptops and Apple computers. There is also a Student Technology Center (STC) in the Addlestone Library that contains two high-performance Dell Precision Workstations and a high-performance Apple G5 workstation for video editing, video, web and graphic editing

software, presentation software, equipment for video recording and projection and an interactive whiteboard. Students using these centers have access to wired and wireless Internet access; electronic mail; laser printing; text and graphics scanning; and a collection of popular productivity software. There is in-person assistance at the Student Computing Support desk where staff help students configure their laptops for campus networks and troubleshoot software problems.

SCHOOL OF THE ARTS

DEGREE OFFERED:

Master of Science in Historic Preservation

MASTER OF SCIENCE IN HISTORIC PRESERVATION

www.clemson.edu/caah/pla/mhp/

Jonathan Poston
Clemson,
Program Director
jposton@clemson.edu

Robert Russell
College of Charleston,
Program Director
843-953-6352
russellr@cofc.edu

Program Description

The Graduate Program in Historic Preservation offers a 54 credit M.S. in Historic Preservation and is a joint degree program between the College of Charleston and Clemson University. The program is structured in sequential layers, beginning with an initial core semester devoted to the analysis and documentation of historic sites, followed by a more advanced studio-focused semester organized around the development of a preservation project. After a professional internship, the second year follows a professional track with the specialization in advanced analysis and conservation studies, followed by a final semester of preservation administration done in conjunction with the student's thesis focus. A professional internship or related experience will be an integral part of the program. Courses are offered at the Graduate Center in Historic Preservation on the College of Charleston's campus.

The organizational structure of the degree program and the curriculum have been developed with the guidance of the National Council

of Preservation Education (NCPE), the AIA, the ASLA, CSI, the regional professional community in preservation and design, as well as faculty from potential peer graduate programs at Columbia University, University of Pennsylvania and the University of Oregon.

Minimum Admission Requirements

- Submit a completed application form (available at www.grad.clemson.edu/p_apply.html).
- Submit an official copy of a transcript of each institution of higher learning attended, including documentation of graduation from an accredited four-year college or university. At the present time transcript(s) should be sent directly from the institution(s) attended to Clemson University.
- Candidates for the program typically have undergraduate grade point averages of approximately 3.0 and must have taken the Graduate Record Exam. For further information about the admission process, please contact the program director, Jonathan Poston, at jposton@clemson.edu.

Master of Science in Historic Preservation Curriculum

54-credit M.S. in Historic Preservation

SEMESTER I (CORE SEMESTER)

Documentation and Analysis: A semester of "core" curriculum in historic preservation that revolves around developing a deeper understanding of the historic fabric through a connected series of NCPE-mandated courses. 12 credits.

- History and Theory of Historic Preservation (3)
- American Architectural Styles (3)
- Research Methods and Documentation (3)
- Historic Construction (3)

SEMESTER II (ADVANCED SEMESTER)

Designing a Preservation Project: An "advanced" semester that focuses on putting together a historic preservation project against the backdrop of the legal and economic aspects of the historic fabric. Students must also take an elective seminar focusing on the historic context of the studio project. 12 credits.

- Approved Elective (3)
- Preservation Studio/Lab (6)
- Preservation Law and Economics (HSPV 520 – CofC) (3)

Introduction to the legal framework of historic preservation, including constitutional law, cultural resources statutes and relevant local laws and mechanisms. Overviews pertinent economic policies, including tax incentives. Material is targeted toward advocacy, to include property rights

and fiscal impact issues. Students will pursue a research/practical project of their choosing.

Summer Internship in Historic Preservation: A summer of professional internship offered through a variety of organizations and foundations, including the Historic American Building Survey (HABS), Historic American Landscape Survey (HALS) and the Historic American Engineering Survey (HAES), National Trust, and a local museum and foundations as well as preservation practitioners in America and Europe. 6 credits.

- Internship (6)

SEMESTER III (CONSERVATION SEMESTER)

Implementation/Intervention: A semester of more lab-based “conservation” studies focusing on the implementation and intervention of the preservation plan of semester II. At this point in the curriculum, students begin to do research on their thesis focus. 12 credits.

- Advanced Materials and Methods (3)
- Research Seminar (3)
- Conservation Lab (6)

SEMESTER IV (THESIS SEMESTER)

Administration and Management: A final semester focusing on the production of a thesis on the management and administration of the preservation project in its entirety with special attention to the particular research focus of the student. 12 credits.

- Historic Preservation Resource Management and Administration (3)
- Approved Elective (3)
- Thesis in Historic Preservation (6)

Course Descriptions

HSPV 520 Preservation Law and Economics (3)

Introduction to the legal framework of historic preservation, including constitutional law, cultural resources statutes and relevant local laws and mechanisms. Reviews pertinent economic policies, including tax incentives. Material is tar-

geted toward advocacy, to include property rights and fiscal impact issues. Students will pursue a research/practical project of their choosing.

HSPV 605 American Architectural Styles 1650–1950 (3)

Survey of American architectural styles and the architects responsible for them, from the colonial period to our recent past. Emphasis is on identifying architectural elements that serve as clues in determining a building’s architectural styles. Critical thinking regarding the complexities of form, content, culture and referents will be discussed.

HSPV 610 History and Theory of Historic Preservation (3)

Survey history of preservation that explores a variety of theoretical issues that impact the discipline and provide a basis for the critical evaluation of historic preservation projects.

HSPV 611 Documentation in Historic Preservation (3)

Introduction to documenting and recording historic buildings and landscapes. Charleston and environs provide case study projects for archival research, field investigation and preparation of final documentation.

HSPV 612 Materials and Methods of Historic Construction (3)

Survey of traditional materials and methods of construction in America from the 18th through the early 20th century. Scientific examination of historic construction in Charleston and environs provides case studies for this course.

HSPV 680 Special Topics (3)

This course will be comprised of special topics related to the curriculum of the Graduate Program in Historic Preservation, primarily in the first-year schedule.

HSPV 800 Internship in Historic Preservation (3–6)

Professional internships are available through a number of initiatives in Charleston as well as nationally. Up to six credits of approved internship in historic preservation are required during the course of the graduate program and can be completed in one summer of the program.

HSPV 802 Historic Preservation Research Seminar (3)

Advanced documentation and analysis of historic resources in preparation for thesis project.

HSPV 803 Advanced Materials and Methods of Conservation (3)

Advanced study of historic building materials and conservation techniques.

HSPV 804 Management and Administration of Historic Preservation (3)

Praxis on the management of historic properties with particular stress on administering a preservation project in the field, and establishing a maintenance program for a historic property.

HSPV 805 Preservation Studio (6)

Examines Charleston and its environs through the development of a comprehensive preservation project for a specific site and appropriate architectural designs. Includes studio design component.

HSPV 810 Conservation Science Laboratory (6)

Focuses on conserving historic building and landscape materials such as wood, metals, glass, masonry, and interior fabrics. Case study work takes place on-site and in the laboratory. The course will include in-depth study of materials and their properties in order to diagnose deterioration.

HSPV 880 Special Topics (3–6)

This course will be comprised of special topics related to the curriculum of the Graduate Program in Historic Preservation, primarily as part of the second-year schedule.

HSPV 891 Thesis Research (6)

Application of independent research to the historic environment through a multi-media degree project focusing on Charleston and its environs, or other suitable historic sites. Thesis is presented to committee for preliminary review at mid-semester for the fourth semester, and presented to a jury at the end of the semester for final review.

SCHOOL OF BUSINESS AND ECONOMICS

DEGREE OFFERED:

Master of Science in Accountancy

MASTER OF SCIENCE IN ACCOUNTANCY

www.cofc.edu/~accntncy

Department of Accounting and Legal Studies

843-953-7166

ciprianom@cofc.edu

Michael Cipriano
Program Director

Mission Statement

The primary goal of this program is to educate graduate accounting students in the constructs underlying the accounting profession. We are committed to providing high-quality graduate education; bringing the best of the profession together with our students for meaningful interaction; producing excellent, highly-qualified candidates for entry into the accounting profession (public practice, industry, government, non-profit) throughout the Southeast; and developing our students' commitment to professional ethics in addition to their writing, speaking, presentation and other communication skills.

Program Description

The School of Business and Economics offers a Master of Science degree in Accountancy. The School of Business and Economics is accredited by AACSB, The Association to Advance Collegiate Schools of Business. In addition, both the graduate and undergraduate accounting programs are separately accredited by AACSB. Our accounting program is one of approximately 170 programs internationally to have earned separate accounting accreditation.

The M.S. in Accountancy program is designed to prepare students for careers in financial reporting, internal or external auditing, taxation, managerial decision making, and data analysis/decision support within public accounting firms, private industry and governmental entities. The program requires two courses and allows students to specialize by taking four courses in either financial reporting/auditing or business analytics. In addition to the program's specialties, a broad base of accounting, law and other business courses are available as electives.

Minimum Admission Requirements

In general, a student seeking admission into the graduate program should meet the following requirements:

- A minimum GMAT score of 510
- Overall undergraduate GPA of 3.0
- Undergraduate Accounting GPA of 3.0 (in junior-level and above courses)
- Two letters of recommendation

Required Undergraduate Courses

The following undergraduate courses are required for the graduate program. All required undergraduate courses must be completed prior to attempting graduate courses. Any exception to this rule requires permission of the graduate committee prior to enrollment in a graduate course.

Accounting:

Principles of Accounting
Intermediate Accounting

Accounting Information Systems
Cost Accounting
Federal Income Tax
Auditing

Business:

Macroeconomics
Microeconomics
Organizational Behavior
Marketing Concepts
Business Finance
Legal Environment of Business
Statistics

Degree Requirements

A total of thirty (30) credit hours at the graduate level must be successfully completed to earn an M.S. in Accountancy. At least eighteen (18), but up to thirty (30), of those hours must be in graduate level accounting courses

Master of Science in Accountancy Curriculum

Required Courses:

ACCT 500 Financial Accounting Theory
ACCT 513 Financial Statement Analysis

Professional Tracks:

In addition to the two required courses, students in the program must select one of three tracks (Financial Reporting and Assurance, Business Analytics, Generalist/Tax) and complete the degree requirements for that track.

Financial Reporting and Assurance Track

The Financial Reporting and Assurance Track is a professional program that provides students with the advanced knowledge and skills necessary

for entry-level positions in the areas of auditing, assurance services, and financial reporting. Students are required to successfully complete each of the following courses:

ACCT 507, 509, 510, 531 (12 hours)

Business Analytics Track

The Business Analytics Track is a professional program that focuses on the role of an accountant as a data analyst. Graduates of this track will be uniquely qualified to conduct business analytics projects; such as analyzing data for fraudulent transactions, developing going-concern prediction models, generating forecasts for pro-forma financial statements from historical accounting data, and generating risk assessment models. Students successfully completing this track will also receive a formal certification in “Data Mining” from the SAS Institute©. Students are required to successfully complete each of the following courses:

ACCT 551, 552, 553, 554 (12 hours)

Generalist Track

The Generalist Track provides students with the opportunity to build a curriculum around a diverse set of interests, including taxation, within the field of accounting. Students are required to successfully complete at least four (4) graduate-level accounting courses (12 hours), which may include Financial Reporting and Assurance Track courses and/or accounting electives that are not included in either of the two aforementioned tracks.

Electives:

Students can choose from the following electives (both accounting and non-accounting) to fulfill the remainder of their graduate level credit requirement:

ACCT 508	Management Accounting
ACCT 515	History of Accounting Thought
ACCT 518	Financial Case Analysis
ACCT 521	International Accounting
ACCT 535	Accounting for Government and Not-for-Profit Organizations
ACCT 540	Research in Taxation
ACCT 545	Taxation of Estate/Gift Transfers and Deferred Compensation
ACCT 560	Special Topics in Accounting

BLAW 529	Commercial Law
BLAW 560	Special Topics in the Law
ECON 501	Economic Theory
ECON 515	Managerial Economics
ECON 560	Special Topics in Economics
FINC 503	Financial Management
FINC 560	Special Topics in Finance
MGMT 501	Organizational Behavior
MGMT 502	International Business
MKTG 525	Marketing Management

Course Descriptions

Accounting

ACCT 500 Financial Accounting Theory (3)

This course provides a foundation in accounting theory pertaining to financial reporting. The focus is on the historical development of accounting thought, standard setting and regulation, and fundamental accounting principles and concepts, including measurement and reporting for income, assets, liabilities and equity. (Required)

ACCT 507 Accounting Information Systems (3)

This course is designed to provide the graduate accounting student with a broad conceptual and practical knowledge of accounting as an information system. The focus is information and its decision usefulness to managers, investors, creditors and other interested parties. Particular attention is paid to human beings as information processors, the systems development life cycle, the decision process, internal control structure and applications to the business environment.

ACCT 508 Management Accounting (3)

This course examines the use of cost data in management planning, performance evaluation, and decision making. The behavioral implications of management accounting reports and the use of quantitative models are also covered.

ACCT 509 Advanced Auditing Concepts (3)

Various strategic and ethical aspects of external auditing are examined in this course. The focus is on current issues facing the auditing profession

with an emphasis on the challenges facing the audit practitioner in the foreseeable future.

Prerequisite: Successful completion of ACCT 409 or its equivalent.

ACCT 510 Internal Auditing and Forensic Accounting (3)

This course examines current theory and practice of internal auditing viewed as a component of organizational governance. The effectiveness of various internal audit activities will be evaluated with an emphasis on the role that the internal audit function should play in detecting fraud.

Prerequisite: Successful completion of ACCT 409 or its equivalent.

ACCT 513 Financial Statement Analysis (3)

This course examines the use of information contained in financial statements with an emphasis on the impact that current issues in accounting have on statement users. Because financial statements are primarily used to predict future performance, the course features the tools of financial statement analysis: strategy assessment, accounting quality analysis and forecasting. (Required)

Prerequisite: Successful completion of ACCT 500.

ACCT 515 History of Accounting Thought (3)

The evolution of accounting thought from the ancient through the post-modern period is examined. Accounting as a social phenomenon is studied historically in its relevant economic and political contexts. Western and non-Western historical traditions frame the study of accounting's role in the transformation of societies and economies and its importance in the development of social institutions.

Prerequisite: Acceptance into the M.S. Accountancy program. All required undergraduate financial accounting courses must be completed before this course is attempted.

ACCT 518 Financial Case Analysis (3)

Generally Accepted Accounting Principles-based issues that relate to real-world accounting cases are covered. The objective is to facilitate the

understanding of GAAP and its application to business problems. The consequences of GAAP interpretations on the independent audit function and the interrelationships of GAAP and GAAS in the financial reporting environment are examined.

Prerequisite: Acceptance into the M.S. Accountancy program. All required undergraduate financial accounting courses must be completed before this course is attempted.

ACCT 520 Independent Study in Accounting (1–3)

Individual study of a given accounting topic to be defined by the student in consultation with the instructor.

ACCT 521 International Accounting (3)

Accounting issues encountered by organizations operating in the global economy will be examined, including concepts related to the international dimensions of accounting standard setting, managerial accounting, auditing and taxation. Issues facing the economies of Europe, Asia, developing economies, and the international accounting profession will be covered.

Prerequisite: Acceptance into the M.S. Accountancy program. All required undergraduate financial accounting courses must be completed before this course is attempted.

ACCT 531 Advanced Accounting (3)

This course focuses on accounting theory applicable to business combinations. The preparation of consolidated financial statements and the accounting for inter-corporate transfers of land, depreciable assets, and inventory are examined. Foreign currency transactions, the translation of foreign entity statements, and a brief introduction to alternate business entities will be offered.

Prerequisite: Acceptance into the M.S. Accountancy program. All financial accounting undergraduate pre-requisites must be completed before this course is attempted.

ACCT 535 Accounting for Government and Not-For-Profit Organizations (3)

This course involves an in-depth study of financial accounting and reporting for state and local governments. Also, the reporting practices of hospital, academic institutions, human services organizations and other non-business organizations are surveyed.

ACCT 540 Research in Taxation (3)

Students learn to research relevant areas of the tax laws. Objectives include acquiring the technical skills necessary to identify tax situations, isolating the tax issues, and developing the documentary support and arguments for acceptable solutions to complex tax problems. Upon completion of the course, students are able to use the major tax services (including computerized tax information resources) in order to prepare a tax memorandum that communicates the tax issues and related primary and secondary sources of federal tax law. The procedural processes for representing a taxpayer before the Internal Revenue Service are addressed.

ACCT 545 Estate Taxation and Planning (3)

This course introduces students to federal estate, gift and generation-skipping tax principles, as well as tax planning techniques for lifetime and testamentary dispositions of property. Topics covered will include tax planning for married couples, tax free and split-interest gifting techniques, charitable gifting techniques, valuation planning techniques, planning for family business interests and tax planning for life insurance and retirement benefits. Related tax policy issues will also be considered.

Prerequisites: Entrance into M.S. Accountancy program (ACCT 341 or its equivalent is required).

ACCT 551 Corporate Transactional Data Management (3)

This course provides students with an in-depth understanding of how to collect and manage data for purposes of preparing various reports to support various managerial decisions, auditing balances subject to high levels of judgment,

financial statement consolidation and other financial reports, etc.

Prerequisite: Acceptance into the M.S. Accountancy program.

ACCT 552 Quantitative Analysis for Accountants (3)

This course is an introduction to the concept of business analytics. They will learn to analyze and exploit financial data from public sources in order to identify potentially useful patterns. Modeling skills will be taught that will enable the students to forecast future performance for publicly-held companies, identify credit-worthy business opportunities, manage risk, etc.

Prerequisite: Acceptance into the M.S. Accountancy program.

ACCT 553 Advanced Corporate Transactional Data Management (3)

This course provides students with an advanced understanding of data management in a business analytic context. Emphasis will be placed on preparing, cleaning, querying, manipulating, and reporting of corporate transactional data in order to conduct advanced business analytics. These analytical tools will be presented in a manner that will help students see their application in areas like financial reporting, tax compliance and decision support.

Prerequisite: ACCT 551 or instructor permission.

ACCT 554 Advanced Quantitative Analysis for Accountants (3)

This course provides students with advanced understanding of the business analytics methodologies. Emphasis will be placed on using these methodologies (e.g., logistic regression, neural networks, decision trees, etc) to solve real-world accounting and financial problems. Featured will be the detection of earnings management and/or fraudulent financial reporting, advanced credit scoring and forecasting of future financial performance.

Prerequisite: ACCT 552 or instructor permission.

ACCT 560 Special Topics (3)

This elective can be customized to provide an in depth review of selected issues which

may affect external (i.e., financial, tax) and internal reporting within the local, national, and international areas.

Business Law

BLAW 529 Commercial Law (3)

This course covers selected aspects of business law including contract law, Articles 2, 2A, 3, 4, 4A, and 9 of the Uniform Commercial Code (UCC) (e.g. sales, leases, negotiable instruments, banking, electronic funds transfer, and secured transactions), bankruptcy, trusts and estates, auditor liability, and real property.

BLAW 560 Special Topics (3)

This course is designed to provide an in-depth analysis of selected legal topics, such as securities and international law, which might affect accounting professionals.

Economics

ECON 520 Independent Study in Economics (1–3)

Individual study of a given economic topic to be defined by the student in consultation with the instructor who will guide the work and determine the credit hours to be awarded.

ECON 560 Special Topics in Economics (3)

This course provides an in-depth analysis of selected economics topics which might affect accounting professionals.

Finance

FINC 503 Financial Management (3)

The objective of this course is to provide the student with an understanding of the basic principles of business finance, with an emphasis on value-enhancing decision making. Topics include valuation of financial instruments, risk analysis, capital budgeting, working capital management, capital structure decisions, international financial issues and financial performance evaluation. Case analysis using computer software is used extensively in conjunction with class lectures.

FINC 520 Independent Study in Finance (1–3)

Individual study of a given finance topic to be defined by the student in consultation with the instructor who will guide the work and determine the credit hours to be awarded.

FINC 560 Special Topics in Finance (3)

This course provides an in-depth analysis of selected finance issues which might affect accounting professionals.

SCHOOL OF EDUCATION, HEALTH, AND HUMAN PERFORMANCE

PROGRAMS AND DEGREES OFFERED:

Master of Arts in Teaching

- Early Childhood Education (PreK-3)
- Elementary Education (2-6)
- Special Education (K-12)

Master of Education

- Science and Math for Teachers (see Interdisciplinary Programs)
- Languages (see Interdisciplinary Programs)

Initial and Advanced Certificates: English to Speakers of Other Languages

The mission of the School of Education at the College of Charleston is the development of educators and health professionals to lead a diverse community of learners toward an understanding of and active participation in a highly complex world. Our vision is to be a community of diverse teacher leaders who ensure exemplary learning and wellness opportunities for all individuals. These opportunities are created by professionals who make the teaching-learning connection. Highly competent teachers make the teaching-learning connection through:

- Understanding and valuing the learner;
- Knowing what and how to teach and assess and how to create an environment in which learning occurs;
- Understanding ourselves as professionals.

All School of Education, Health and Human Performance programs have been accredited by the National Council for the Accreditation of Teacher Education (NCATE).

The N.E. Miles Early Childhood Development Center

Candace Jaruszewicz, Director

The N.E. Miles Early Childhood Development Center is a laboratory school for students in the School of Education, Health and Human Performance. The center's staff includes a director and four teachers with master's degrees, as well as graduate student assistants. Faculty, staff, student and community children ages two through five years of age are eligible for enrollment at the center.

EARLY CHILDHOOD EDUCATION

www.cofc.edu/SchoolofEducation

Department of Elementary and Early Childhood Education

843-953-5613

Linda H. Fitzharris, Chair

Virginia Bartel
Program Director

bartelv@cofc.edu; 843-953-5821

Department Mission

The primary goal of the Department of Elementary and Early Childhood Education is the preparation of highly effective teachers to meet the educational needs of children and youth. To meet this goal, the department offers graduate programs in elementary and early childhood education.

Master of Arts in Teaching: Early Childhood Education (PreK–3)

The M.A.T. in early childhood education, an NCATE-accredited program that focuses on the education of children in pre-kindergarten through third grade, is nationally recognized by the National Association for the Education of Young Children (NAEYC). It is designed for those who want to teach young children and have undergraduate degrees in non-education disciplines.

Successful completion of the M.A.T. program requirements leads to recommendation for

teaching certification/licensure in grades pre-kindergarten through three in South Carolina, in addition to a master's degree. The State of South Carolina has reciprocal licensure agreements with many State Departments of Education across the United States. Teacher Education Program requirements are described in detail in a candidate information packet, which a candidate receives prior to meeting with the program director to complete a program of study.

Degree Requirements

The M.A.T. in early childhood education is awarded to candidates who successfully complete an approved program of study consisting of a minimum of 48 graduate semester hours of credit with an overall GPA of 3.0. This program of study may include additional coursework due to deficiencies in the liberal arts as determined by a review of the undergraduate transcript. Candidates have one calendar year following program acceptance to complete the additional coursework with a minimum GPA of 2.5.

Certification requirements for M.A.T. students are described in the teacher education program student information packet for M.A.T. students and the Clinical Practice Handbook. As part of the certification procedure, each M.A.T. student must take the national PRAXIS tests: elementary content area and principles of learning and teaching. Advisors will provide important details about this requirement. All examinations are administered by the Educational Testing Service and application forms are available in the School of Education, Health and Human Performance Office, 86 Wentworth Street. One copy of each test score must be sent directly to the College of Charleston School of Education, Health and

Human Performance and another copy to the South Carolina State Department of Education.

Minimum Admission Requirements for Degree- Seeking Status*

Prospective candidates must submit the following application materials to the Graduate School Office prior to the admission selection process:

- A completed application form with a non-refundable application fee of \$45 (\$35 if online application)
- Official transcripts of all undergraduate and graduate coursework. An earned bachelor's degree from an accredited college or university is required
- Applicants are required to have a 2.5 (on a 4.0 scale) grade point average (GPA) from graduating institution.
- Undergraduate coursework should reflect a broad liberal arts background.
- Two letters of recommendation from persons familiar with academic and/or work experience. Letters should indicate evidence of potential for graduate studies and working with children.
- Biographical sketch or professional résumé
- Self-assessment of professional goals and dispositions
- Statement of ability to perform essential teaching duties under the Americans with Disabilities Act (ADA)
- Cover letter to admissions committee stating reasons why applicant is pursuing a teaching career in this program
- Results of the Test of English as a Foreign Language (TOEFL) if applicant's primary

language is not English

- Official Graduate Record Examination (GRE) scores. Expectations are a minimum composite GRE verbal/quantitative score of 1000 as well as a score of 4.0 or higher on the analytical writing sample.

*These requirements are subject to change before the next catalog is printed. Contact the Graduate Studies Office for current admissions requirements.

Deadlines for applications to Master of Arts in Teaching Program:

SpringNovember 15

Summer and FallApril 15

Completion of a Program of Study

As soon as possible after acceptance into the program and before enrolling in courses, an appointment must be made with the program director to complete a program of study. The process for filing an acceptable program of study is not completed until all copies of the form, with required signatures, have been filed with the Graduate School Office. The program of study is not official until the student is admitted as a degree-seeking student. All degree-seeking students must have an approved program of study on file no later than one month following the completion of 12 semester hours of graduate credit. Failure to meet the deadline for filing an acceptable program of study may result in a delay in graduation or loss of credit for use in the program.

All academic work that has been completed, as well as that which is proposed for satisfying degree requirements, must be included in the program of study at the time of submission. Students may make changes of up to two courses in the program of study that are necessitated by enrollment problems or other circumstances by completing a request for change in approved program form. This form must be endorsed by the advisor, department chair, and the program

director. More extensive changes may be accomplished by filing a new program of study marked "revised plan."

After the program of study is completed, an advisor is assigned to work with the candidate over the course of the program for scheduling and program planning to ensure timely completion of program requirements.

NOTE: Students may not use professional development course credit.

Program of Study

Focus Area I: Development of the Learner and the Relationship to Content Learning Development (9 hours)

Prerequisites:

Undergraduate prerequisites determined by transcript evaluation AND the following two graduate or equivalent undergraduate courses:

- EDFS 654 Human Growth and Development
- EDFS 687 Computer Education for Teachers (or an intermediate computer course) taken within the last three years:

Prerequisites may be taken concurrently with graduate program courses, but must be completed within one calendar year of admission.

- EDEE 510* Introduction to Early Childhood Education, Field Experience 1
- EDEE 617* Language Literacy and Literature for Early Childhood (3 hours)

*Must be taken concurrently.

Focus Area II: Pedagogy and Content Knowledge (15 hours)

- EDEE 613 Curriculum and Development in Early Childhood Education (3 hours)*
- EDEE 615* Assessment in Student Learning (3 hours)*
- EDEE 638 Mathematics and Science in Early Childhood Education (3 hours)
- EDEE 642 Social Studies and Humanities for Early Childhood and Elementary Teachers (3 hours)
- EDEE 653 Theories and Strategies for Developing Literacies (3 hours)
- EDEE 636* Field Experience II in Early Child-

hood Education (3 hours)*

*Must be taken concurrently.

Focus Area III: Creating an Effective Climate for Learning (15 hours)

- EDEE 606 Teaching Diverse Learners (3 hours)
- EDEE 620* Home, School, and Community Relationship (3 hours)*
- EDEE 655 Creativity and the Fine Arts (3 hours)
- EDEE 664 Health and Physical Education (3 hours)
- EDEE 682* Field Experience III in Early Childhood Education (3 hours)*

*Must be taken concurrently.

Focus Area IV: Culminating Professional Experiences (9 hours)

- EDEE 698 Clinical Practice in Early Childhood Education (9 hours)

Total program credit hours: 48 graduate hours not including prerequisite course hours.

NOTE: The School of Education, Health and Human Performance Policy states that field experience and clinical practice placements are made within the tri-county area. The School of Education, Health and Human Performance reserves the right to place candidates in the closest approximate placement.

Title II Report Card

The College of Charleston Title II Report Card can be located by going to the School of Education, Health and Human Performance website, www.cofc.edu/SchoolofEducation. Additionally, copies of the report can be requested by contacting the director of certification and student teachers at 843-953-5613 or 86 Wentworth Street, College of Charleston, Charleston, S.C. 29424-0001. To discuss the College of Charleston Title II Report Card, contact the dean of the School of Education, Health, and Human Performance.

For the purposes of Title II reporting, a program completer is defined as a candidate who has completed an approved professional educa-

tion program and qualifies for an initial teaching certificate in South Carolina.

Non-degree Status (Certified teachers only)

Certified educators who are not seeking a degree, but who wish to take courses in education for the purposes of professional development and recertification, may be admitted as non-degree students.

- Submit a completed application form with a nonrefundable application fee of \$45 (\$35 online).
- Submit a copy of a professional teaching credential.

The non-degree graduate student subsequently may be reclassified as a regular-degree student in an M.Ed. program. In order to accomplish reclassification as a degree-seeking student, the candidate must submit two letters of recommendation, a graduate course transcript with at least a 3.0 GPA (if courses have been completed) and other requirements listed above. No more than a total of 6 credit hours of work taken in non-degree status may be applied toward degree requirements if the student is later admitted to a degree program. Non-degree status is not intended to be a temporary classification for those found ineligible for admission to the degree program.

ELEMENTARY EDUCATION

Department of Elementary and Early Childhood Education

843-953-5613

Linda H. Fitzharris, Chair

Virginia Bartel

Program Director

bartelv@cofc.edu; 843-953-5821

Department Mission

The primary goal of the Department of Elementary and Early Childhood Education is the preparation of highly effective teachers to meet the educational needs of children and youth. To meet this goal, the department offers graduate programs in elementary and early childhood education.

Master of Arts in Teaching (M.A.T.): Elementary Edu- cation (2–6)

The M.A.T. in elementary education, an NCATE-accredited program that focuses on the education of second through sixth-graders, is designed for those who want to teach elementary school children and have undergraduate degrees in non-education disciplines. The program combines academic work and a variety of experiences in public elementary schools.

Successful completion of the M.A.T. program requirements leads to recommendation for teaching certification/licensure in grades 2 - 6 in South Carolina, in addition to a master's degree. The State of South Carolina has reciprocal licensure agreements with many State Departments

of Education across the United States. Teacher Education Program requirements are described in detail in a candidate information packet, which a candidate receives prior to meeting with the program director to complete a program of study.

Degree Requirements

The M.A.T. in elementary education is awarded to candidates who successfully complete an approved program of study consisting of a minimum of 48 graduate semester hours of credit with an overall GPA of 3.0. This program of study may include additional coursework due to deficiencies in the liberal arts as determined by a review of the undergraduate transcript. Candidates have one calendar year following program acceptance to complete these additional requirements with a minimum GPA of 2.5.

Certification requirements for M.A.T. students are described in the teacher education program student information packet for M.A.T. students and the Clinical Practice Handbook. As part of the certification procedure, each M.A.T. student must take the national PRAXIS tests: elementary content area and principles of learning and teaching. Advisors will provide important details about this requirement. All examinations are administered by the Educational Testing Service and application forms are available in the School of Education, Health, and Human Performance Office, 86 Wentworth Street. One copy of each test score must be sent directly to the College of Charleston School of Education, Health and Human Performance and another copy to the South Carolina State Department of Education.

Minimum Admission Requirements for Degree- Seeking Status*

- Submit a completed application form with a nonrefundable application fee of \$45 (\$35 online).
- Submit official transcripts of all undergraduate and graduate coursework. An earned bachelor's degree from an accredited college or university is required. Applicants are required to have a minimum cumulative undergraduate GPA of 2.5 on a 4.0 scale from their graduating institution. Undergraduate coursework should represent a broad liberal arts background.
- Submit two letters of recommendation. Letters should be from persons most familiar with previous academic and/or work experience and should indicate evidence of potential for graduate studies.
- Submit a biographical sketch or professional résumé.
- Submit results of the Test of English as a Foreign Language (TOEFL) if English is not the primary language of the candidate.
- Submit official scores from the Graduate Record Examination (GRE). Students are expected to have a minimum composite GRE verbal/quantitative score of 1000 and a score of 4.0 or higher on the analytical writing sample.
- Submit a self-assessment of professional goals and dispositions.
- Submit a statement of ability to perform essential teaching duties under the Americans with Disabilities Act (ADA).
- Submit a cover letter to the admissions com-

mittee stating why the candidate seeks to be a part of the program and is pursuing a teaching career.

*These requirements are subject to change before the next catalog is printed. Contact the Graduate Studies Office for current admissions requirements.

The non-degree graduate student subsequently may be reclassified as a regular-degree student in an M.Ed. program. In order to accomplish reclassification as a regular-degree student, the candidate must submit two letters of recommendation, a graduate course transcript with at least a 3.0 GPA (if courses have been completed) and other requirements listed above. No more than a total of 6 credit hours of work taken in non-degree status may be applied toward degree requirements if the student is later admitted to a degree program. Non-degree status is not intended to be a temporary classification for those found ineligible for admission to the degree program.

SPECIAL EDUCATION

www.cofc.edu/edfs

Department of Foundations, Secondary and Special Education

843-953-5613

Meta Van Sickle, Interim Chair

Michael Skinner
Program Director

Department Mission

The Department of Foundations, Secondary, and Special Education, in support of the School of Education, Health, and Human Performance's mission, prepares competent special education and secondary education teachers, provides foundation and technology studies to candidates in all initial and advanced education degree programs, and offers study in English as a Second Language. Our work is grounded in the School of Education, Health, and Human Performance's Dispositions and Teaching and Learning Standards.

Program Description

Special Education (K–12) M.A.T.

The Master of Arts in Teaching for Special Education is nationally accredited by the Council for Exceptional Children and by the South Carolina Department of Education. Most coursework in this program is taught by full-time faculty members (holding terminal degrees in their fields), who have extensive teaching experience and maintain active research and

service agendas. Coursework is offered in late afternoon and evening sessions Monday through Thursday for fall and spring terms and in day and evening sessions during the summer terms. Students may enroll as part-time or full-time candidates. Full-time graduate students may be eligible for graduate assistantships through the Graduate School.

Clinical Practice: It is the policy of the School of Education, Health, and Human Performance that assignments for field experience and clinical practice placements are made within the tri-county area. If an appropriate placement is not available within the tri-county area, the School of Education reserves the right to place the student in the closest appropriate placement.

Master of Arts in Teaching in Special Education (K–12)

The Master of Arts in Teaching (M.A.T.) in special education is designed for individuals with undergraduate degrees in areas other than education who want to become licensed special education teachers. There are three areas of study within this degree: emotional disabilities, learning disabilities and mental disabilities. The program of study currently requires a minimum of 43 hours of graduate credit.*

Successful completion of the M.A.T. program of study, including the teacher education requirements, leads to recommendation for licensure in South Carolina in the student's area of concentration. Teacher education requirements include successful clinical practice during a full-time semester, passing the specialty

Praxis exams, and other School of Education, Health, and Human Performance and South Carolina Department of Education requirements that can be found on the program's website: <http://www.cofc.edu/edfs/SpecialEd/specialed.html>. Candidates should consult this website for changes in program or state requirements.

*If the candidate has not had a course on human growth and development within three years prior to matriculation, he/she must take that course during the summer prior to program entry.

Minimum Admission Requirements for the M.A.T. in Special Education

- Submit all application materials to the Graduate School Office.
- Submit a completed application form with a nonrefundable application fee of \$45 (\$35 online).
- Submit official transcripts of all undergraduate and graduate coursework. An earned bachelor's degree from an accredited college or university is required. Applicants are required to have a minimum cumulative undergraduate GPA of 2.5 on a 4.0 scale. Undergraduate coursework should represent a broad liberal arts background.
- Submit two letters of recommendation. Letters should be from persons most familiar with previous academic and/or work experience and should indicate evidence of potential for graduate studies.
- Submit a biographical sketch or professional résumé.
- If English is not the primary language of the candidate, submit results of the Test of

English as a Foreign Language (TOEFL).

- Submit official scores from the Graduate Record Examination (GRE). Candidates are expected to have a minimum composite GRE verbal/quantitative score of 1000 and a score of 4.0 or higher on the analytical writing sample.
- Submit a self-assessment of professional goals and dispositions.
- Submit a statement of ability to perform essential teaching duties under the Americans with Disabilities Act (ADA).
- Submit a cover letter to the admissions committee stating why the candidate seeks to be part of the program and is pursuing a teaching career.

These requirements are subject to change before the next catalog is printed. Application packages are available through the Graduate School Office or online. The deadline for applications to the M.A.T. in special education for students planning to attend full-time is April 15, because this program must be started during the fall semester. However, applications may still be reviewed until July 15 if there are slots left unfilled after the April 15 deadline. Potential applicants should contact the program director to determine if this is the case.

* Applicants who plan to, at least initially, complete the program on a part-time basis, may apply for admission during fall, spring or summer semesters in order to begin taking courses the following semester. The deadline for fall applications, for a spring semester start, is December 1. The application deadline for spring applications, for a summer or fall start, is April 15, as stated in the previous paragraph.

Title II Report Card

The College of Charleston Title II Report Card can be located by going to the School of Education, Health, and Human Performance website, [www.cofc.edu/School of Education/](http://www.cofc.edu/School_of_Education/). Additionally, copies of the report can be requested by contacting the director of certification and

student teachers at 843-953-5613 or 9 College Way, College of Charleston, Charleston, S.C. 29424. To discuss the College of Charleston Title II Report Card, contact the dean of the School of Education.

For the purposes of Title II reporting, a “program completer” is defined as a candidate who has completed an approved professional education program and qualifies for an initial teaching certificate in South Carolina.

Degree Requirements for the M.A.T in Special Education

The M.A.T in special education is awarded to candidates who successfully complete an approved, performance-based program of study consisting of a minimum of 43 semester hours of credit with a minimum overall GPA of 3.0.

Requirements for recommendation for licensure by the South Carolina Department of Education are described in the teacher education program information packet and the Clinical Practice Handbook. Successful completion of clinical practice requirements and passing scores on the Praxis specialty exams corresponding with the candidate’s area of concentration are two of the requirements for licensure recommendation. The Praxis specialty exams should not be taken prior to specialty coursework completion. It is the candidate’s responsibility to register for these exams and have scores sent to the School of Education, Health, and Human Performance and the South Carolina Department of Education.

Program of Study

Upon admission as a regular degree student, each candidate will be assigned a faculty advisor. The candidate should make an appointment with the advisor to complete an official program of study. The program of study is not official until it is signed by the student, advisor, and program director and on file with the Graduate School Office. The candidate may not enroll in more than six hours of coursework without an

official program of study. After coursework has commenced, needed changes in the program of study may be made in consultation with the candidate’s advisor and approved by the program director and department chair.

The recommended program of study for the M.A.T in special education follows. Consult the program’s website or an advisor for the recommended sequence of coursework, as many courses are offered only once a year but have specific prerequisites. Also note that EDFS 710, Introduction to Exceptional Children and Youth, may be taken as a non-degree student with professor permission.

Fundamental Curriculum

(19 semester hours)

EDFS 635 Educational Research

EDFS 654 Human Growth and Development*

EDFS 687 Technology Education for Teachers

EDFS 714 Introduction to Curriculum and Instruction in Special Education

EDFS 724 Reading and Language Arts for Students with Disabilities

EDFS 725 Classroom and Behavior Management

*EDFS 654 is required as an addition to the program of study if a comparable course has not been taken at an accredited institution within the past 3 years, resulting in a 46-hour program.

Specialized Curriculum

(12 semester hours)

EDFS 710 Introduction to Exceptional Children and Youth**

EDFS 720 Educational Assessment of Students with Disabilities

EDFS 774 Language Development and Language Disorders

** May be taken as a non-degree student with professor permission

Concentration Areas

(minimum 9 semester hours)

Teaching Students with Emotional Disabilities:

- EDFS 730 Characteristics of Individuals with Emotional Disabilities
- EDFS 731 Educational Procedures for Individuals with Emotional Disabilities
- EDFS 738 Field Experiences with Students with Emotional Disabilities

Teaching Students with Learning Disabilities:

- EDFS 740 Characteristics of Students with Learning Disabilities
- EDFS 741 Educational Procedures for Students with Learning Disabilities
- EDFS 748 Field Experiences with Students with Learning Disabilities

Teaching Students with Mental Disabilities:

- EDFS 750 Characteristics of Individuals with Mental Disabilities
- EDFS 751 Educational Procedures for Individuals with Mental Disabilities
- EDFS 758 Field Experiences with Individuals with Mental Disabilities

Clinical Practice

(9 semester hours)

- EDFS 797 Clinical Practice in Special Education

NOTE: Students may undertake additional coursework and field experiences to specialize in more than one area of special education.

- EDFS 500 Nonviolent Crisis Intervention (1 semester hour – taken during Clinical Practice)

Professional development courses (typically offered by the schools in cooperation with S.C. universities) will not be accepted in the M.A.T in Special Education program of study.

Course Descriptions for All Education Programs

EDEE

EDEE 510 Developmental Appropriateness in Early Childhood Education (3)

An introduction to early childhood education including 1) historical and philosophical antecedents, 2) developmentally appropriate practice, 3) field-based experiences and 4) characteristics of young children and related program implications. The course includes a 36-hour practicum in a variety of settings to insure multicultural exposure. NOTE: Practicum required.

EDEE 515 Middle School Organization and Curriculum (3)

An overview of the middle school concept, including 1) historical and philosophical antecedents, 2) conflicting perceptions of middle school, 3) definitions of middle school and middle-level concept, 4) characteristics of the emerging adolescent and related program implications, 5) change factors involved in conversion to the middle school concept, 6) evaluation methods for determining effectiveness and student progress and 7) speculation on the future of the middle school movement.

EDEE 604 Teacher as Researcher in Early Childhood Education (3)

In this course, students learn about the nature and design of action research. The course will provide students the opportunity to extend and further develop their knowledge and understanding of theories and content appropriate to early childhood education by engaging in reflective inquiry in preparation for formal thesis research.

EDEE 606 Teaching Diverse Learners (3)

The emphasis of the course is on inclusion strategies for special needs students in regular classrooms. Appropriate referral and instructional strategies will be analyzed and explored.

EDEE 610 Integrating Assessment and Instruction (3)

The course provides the participant opportunities to examine instructional models and assessment strategies in education (a) through research, application and demonstration, and (b) within the context of the way related concepts, models and strategies vary to guide educational decision making in a range of developmental areas from early childhood, to elementary, to middle school. The course covers important concepts and theories in learning, instructional design, and assessment.

EDEE 613 Curriculum and Development for Early Childhood Education (3)

An analysis of early childhood curricular theory, instructional programs, related research and societal needs. Particular emphasis is given to the physical, emotional, social and cognitive characteristics of children at different developmental levels, and techniques and materials suitable for teaching at this level. The course includes the study of innovative and experimental programs. NOTE: Required for early childhood certification.

EDEE 614 Field Experience II in Elementary Education (3)

This course provides elementary education candidates multiple opportunities to observe and teach lessons in public elementary classrooms and to connect observational data with theory and practice related to classroom assessment during the elementary years. Additionally, it provides candidates the opportunity for service learning in the schools.

Co-requisite: EDEE 610; *prerequisite:* EDEE 645.

EDEE 615 Assessment in Student Learning (3)

This course is designed to provide theoretical and experiential knowledge regarding basic principles of educational assessment and evaluation. The course will focus on the acquisition of traditional and performance-based knowledge and assessment skills, and the examination of contemporary evaluative issues confronted by educators pre-K through grade 3.

Prerequisites: EDFS 687 and 654 or equivalents, EDEE 510, 613, and 617.

EDEE 616 Methods and Materials in Early Childhood Education (3)

The process of development of content areas and their implementation in educational programs for young children. Emphasis is on current methods, techniques and materials suitable for teaching at this level. The course includes the study of innovative and experimental programs. NOTE: Required for early childhood certification.

EDEE 617 Language, Literature and Literacy in Early Childhood Education (3)

This course provides students with the fundamental theory, research and practice of a literature-based language arts program. Topics include language development, the language experience approach to teaching reading, research on the effectiveness of differing approaches to the teaching of reading, and using picture-story books, traditional literature and poetry to facilitate the learning-to-read process.

EDEE 620 Home, School, and Community Relationships (3)

A study of the relationships that exist in the educational triad of home, school and community. Strategies for increasing communication and collaboration between parents and schools are addressed and the skills needed to be an advocate for young children are explored. Topics include current family demographics, the abused child, the parent community, rights and responsibilities, resources and leadership training. NOTE: Practicum required for M.A.T. students.

EDEE 621 Current Trends and Issues in Early Education (3)

An extensive study of the development and changes taking place in the field of early childhood education. Analysis and evaluation are utilized in determining possible future trends and in assessing strengths and weaknesses of existing programs.

EDEE 625 Interdisciplinary Themes: Design and Implementation (3)

The course provides knowledge and experience in the design and implementation of interdisciplinary themes (units). The focus is on the planning and evaluation of grade-level units that incorporate multiple subject areas. Topics include rationale and framework, integration of content, teaching strategies and evaluation.

EDEE 634 Trends & Issues in Elementary Education (3)

A course focusing on current trends and issues in elementary and middle-level education as they relate to children and teaching in grades one through eight.

EDEE 636 Field Experience in Early Childhood Education (3)

A supervised program of orientation, observation, and experience with pre-kindergarten, kindergarten or early elementary children. Includes related seminar participation. NOTE: May be a requirement for early childhood certification.

EDEE 637 Internship in Early Childhood Education (6)

A supervised internship in an early childhood classroom or administrative setting of at least 12 weeks of full-time participation. Designed for advanced students.

EDEE 638 Mathematics and Science in Early Childhood Education (3)

A study of the development of mathematics and science concepts and processes in children. The relationship is explored between curriculum content, instructional strategies and materials and ways in which young learners construct knowledge. Physical health and safety education are included.

EDEE 640 Development of Language and Literacies (3)

The course explores the nature of language, its functions within language settings, and its development within cultures and individuals. The impact of family, community and dialect upon communication will be investigated. The

role of story in helping children to communicate effectively is a component of this program. The course also outlines the role of language in developing literacies (reading, writing, viewing, computing) needed to survive in today's world.

EDEE 641 Science for the Elementary School Teacher (3)

An in-depth examination and analysis of the relationship between the science curriculum, science instruction and the ways in which elementary students discover and invent knowledge in the science content areas. NOTE: Practicum required.

EDEE 642 Social Studies and Humanities for Early Childhood and Elementary Teachers (3)

An in-depth examination of the relationship between the social studies curriculum, social studies instruction and the ways in which elementary students construct social knowledge and values.

EDEE 645 Field Experience I in Elementary Education (3)

This course provides elementary education candidates multiple opportunities to observe in public elementary classrooms and to connect observational data with theory and practice related to language and literacy development during the elementary years. Additionally, participants analyze an academic Long Range Planning document in relation to observed classroom activities. *Co-requisite:* EDEE 640.

EDEE 648 Language and the Integrated Curriculum (3)

The study of language learning and curriculum development through the examination of current research with focus on the design and implementation of interdisciplinary units.

EDEE 650 Analysis of Current Research in Child Development (3)

A framework for the study of the child's cumulative and integrative growth experience provided by psychological patterning from early childhood to adolescence. Key theories of personality and developmental principles are

evaluated in the light of selected research studies and field experience.

EDEE 653 Theories and Strategies for Developing Literacies (3)

This course examines 21st-century definitions and conceptualizations of “reading” and “text” through theories, methods, strategies and materials in teaching communication skills to elementary and middle-school students. Aspects of listening, speaking, reading, writing, and viewing will be explored. Topics include literacy processes, supporting classroom diversity and meeting students’ instructional literacy levels.

EDEE 655 Creativity and the Fine Arts (3)

An in-depth study emphasizing teaching content knowledge within the discipline of fine arts for preschool, kindergarten and elementary school children.

EDEE 663 Children’s Literature (3)

Study of the historical development of children’s books and the significant literature available for children today. Criteria for evaluating juvenile literature and ways of stimulating children’s interest in books are presented. Discussion includes the uses of fantasy, fairy tales and myth, the abridgment of classics, the introduction of poetry and the special needs of children from disadvantaged backgrounds. Students are introduced to a wide range of reading material which may be relevant to curriculum content or which offer children a reading-for-pleasure experience.

EDEE 664 Health and Physical Education for the Elementary Teacher (3)

Development of physical, health, and safety education as an integral part of the life of the elementary age child and the curriculum of the school. The relationship between organization, development and instruction in health and physical education activities and safety practices are explored.

Prerequisite: EDFS 654.

EDEE 665 Elementary School Arithmetic: Content and Instruction (3)

Skill development and mastery of terminology, symbolism, and content contained within the scope and sequence of the elementary school curriculum. Approaches to assist the teacher in the analysis, preparation and delivery of instruction are identified.

EDEE 667 Curriculum Design (3)

An analysis of the relationship between the written curriculum, instructional models and the ways in which learners construct knowledge.

EDEE 669 Behavior of the Young Child (3)

Basic presentation of skills required to assess the needs, motivations and capacities of young children. Methods of observing, recording, and documenting behavior (individual and group), and the interpretation of the underlying dynamics are studied. Children’s art, language and dramatic play are examined as materials for understanding the meaning of behavior. Students examine widely used test materials in order to determine under what circumstances and by whom the test should be given, and the results are evaluated and used.

Prerequisite: EDEE 650, EDFS 654, or permission of the instructor.

EDEE 670 Elementary Science Instruction (3)

A course for elementary teachers who have at least partial responsibility for science teaching. It focuses on comprehension and application of integrated science process skills using concepts from life, earth and physical science to teach them.

EDEE 678 Methods and Materials for Reading Instruction (3)

An in-depth examination of the relationship between reading methods, reading materials and the thinking processes which elementary students use to construct knowledge.

EDEE 681 Field Experience in Reading (3)

A supervised clinical and/or laboratory school practicum experience in the diagnosis and correction of a reading disability case. An

opportunity to develop and implement a corrective reading program for a disabled reader is provided.

Prerequisite: Permission of the instructor.

EDEE 682 Field Experience III in Early Childhood Education (3)

This course provides early childhood education candidates the opportunity to plan and teach multiple subjects to diverse young learners. Candidates examine the early childhood teachers’ role in establishing and maintaining a positive and productive learning environment in the classroom. They learn to assess their students’ performance as well as their own. Candidates will complete a minimum of 30 hours of field experience in an appropriate early childhood classroom and 15 hours of seminar.

Prerequisites: First two field experiences (EDEE 510 and 636) or their equivalents.

EDEE 685 Independent Study in Education (1–3)

Graduate students may undertake a study of a special topic in education chosen by the student and individually supervised. Each project must be done in consultation with a member of the graduate faculty qualified to guide and evaluate the student’s work. Time deadlines must be set before initiation of the project.

Prerequisite: Permission of the instructor required.

EDEE 690 Creating Effective Learning Communities (3)

This course focuses on how teachers create collaborative and inclusive communities of learners. Supportive, preventive and corrective teaching practices and management strategies are emphasized. Teacher candidates will research, analyze and evaluate current management practices.

Co-requisite: EDEE 695; *prerequisites:* EDEE 610 and 614.

EDEE 695 Field Experience III in Elementary Education (3)

This course provides elementary education candidates multiple opportunities to observe and teach lessons in public elementary classrooms and to connect observational data with theory and practice related to managing students,

learning and classroom communities during the elementary years. Additionally, it provides candidates the opportunity for service learning in the schools.

Co-requisite: EDEE 690.

EDEE 698 Clinical Practice in Early Childhood Education (9)

A course in which students are placed in a local elementary school in a pre-kindergarten, kindergarten, first, second, third or fourth grade to observe, teach, and participate during the entire school day for a minimum of 60 days (12 weeks). Weekly on-campus seminars are also required. Students must apply for admission to student teaching one semester prior to enrollment. The deadline for application for fall semester student teaching is the last school day in January. The deadline for application for spring semester student teaching is the last school day in September. *Prerequisite:* Admission to the teacher education program and completion of all education courses.

EDEE 699 Clinical Practice in Elementary Education (9)

A course in which students are placed in a local elementary school to observe, teach and participate during the entire school day for a minimum of 60 days (12 weeks). Weekly on-campus seminars are also required. Students must apply for admission to student teaching one semester prior to enrollment. The deadline for application for fall semester student teaching is the last school day in January. The deadline for application for spring semester student teaching is the last school day in September. *Prerequisite:* admission to the teacher education program and completion of all education courses.

EDEE 700 Thesis (3)

A research project completed under the guidance of a graduate faculty member and submitted and defended before a graduate committee.

EDEE 701 Thesis (3)

Continuation of EDEE 700.

EDEE 702 Research and Development Project (3–6)

An in-depth study of an individually chosen topic that is planned and completed under the guidance of the student's advisor and submitted for review by the graduate faculty.

EDEE 706 Special Topics in Education (1–3)

Study of a particular subject or theme in educational methods of teaching or content. Specific topics are listed with the course title when offered, e.g., Special Topics in Education: Marine Science for Elementary Teachers.

EDFS

EDFS 500 Nonviolent Crisis Intervention (1)

This course provides students with the knowledge and skills required to effectively handle crisis situations in school, clinic and residential settings. Students receive training in strategies designed to prevent and if necessary, control verbally and physically aggressive behavior while protecting students and themselves. (fall and spring)

EDFS 535 Teaching Literacy to Adults (3)

A course designed for individuals who work with adults lacking proficient literacy skills. Focuses on characteristics and learning styles of older adolescents and adult learners. Topics of study include diagnostic techniques, instructional materials, teaching strategies and community resources.

EDFS 630 Introduction to Educational Supervision (3)

Basic concepts of contemporary educational supervision as they relate to teachers in leadership positions. Includes models for the supervision of student teachers, other teachers and school personnel as well as the supervision of instruction and curriculum.

EDFS 631 Instructional Media (3)

A basic course designed to familiarize the student with the use of instructional media in education. The methods of program design, production, and evaluation are studied and implemented.

EDFS 632 Educational Psychology Learning, Cognition, and Motivation (3)

Orientation to the psychology of learning and instruction, the development of theoretical models as well as empirical bases for making decisions. This course examines current research on human learning including advances in the study of learning as well as practical applications of what we know about advances in the study of learning as well as practical applications of what we know about learning on the design of curriculum, teaching, and assessment. The course covers important concepts and theories in educational, cognitive, and social psychology and offers the student opportunities to develop their teaching skills through application of the theories and concepts with attention to the realities of teaching. (spring)

EDFS 635 Educational Research (3)

An in-depth study of methods used in different types of educational research. Includes involvement of the student in the process of educational research design, implementation, reporting, and evaluation. (fall, spring and summer)

EDFS 645 Discipline – A Total Approach (3)

A comprehensive model for behavior management which includes preventive discipline techniques, appropriate intervention strategies, instructional considerations, classroom structure, the role of the principal and teacher, and student self-concept. The dynamics of disruptive student behavior and a personal responsibility approach to behavior management are presented for use with persistent behavior problems.

EDFS 646 Cognitive Approaches for Developing Self-Esteem (3)

An in-depth study of the importance of self-esteem as related to student motivation, achievement, and behavior. Emphasizes cognitive approaches to the development of self-esteem and the relationship between self-esteem and teacher performance.

EDFS 647 Strategies for Teaching Critical Thinking (3)

A focus on strategies to enhance critical thinking skills in grades K–12 across all curricular areas. Includes study of the relationship between critical thinking, student achievement, and motivation. Highlights current research on higher-order thinking skills, creative problem solving and decision making.

EDFS 651 Orientation to the Profession of Special Education (1)

This course will explore the roles and responsibilities of special educators as professionals serving students with disabilities and the families, agencies, and professionals central in these students' lives. Orientation to the ethical and professional standards that guide the profession will provide a framework for organization of future coursework and practical experiences in the program.

EDFS 652 Foundations of Education (3)

In-depth study integrating concepts and information from major social sciences and philosophy to examine the problem of teaching in modern schools. Historical approaches are used to focus on cultural, socioeconomic and political issues affecting education. (fall, spring, and summer)

EDFS 654 Human Growth and Development (3)

The study of general principles of lifelong human growth and development and the relationship of teaching and learning theories to physical, social, intellectual and emotional development. (fall, spring and summer)

EDFS 656 Program Planning and Development for the Gifted (3)

This course provides students with the fundamental principles of gifted program development. It addresses areas such as student identification procedures with a particular focus on gifted with special needs, curriculum development, staff development, personnel and resource utilization, budgeting, staff selection, needs assessment, evaluation, written plan development and change agent strategies.

EDFS 660 Nature of Science, Mathematics, and Science/Mathematics Education (3)

Topics include the historical development of science and mathematics and the variety of philosophies in science/mathematics education. Other topics include social trends affecting science education in the United States since 1900, including reform movements of 1904, 1937, 1945, 1960 and the present; and local frameworks addressing national and global concerns. (summer)

EDFS 675 Success in Reading and Writing (3)

A study of the structured use of reading materials from the daily world of the elementary school child such as newspapers, magazines and children's books. Using these materials, participants learn to teach effectively without ability grouping and to organize classroom time to include all elements of a total language arts program.

EDFS 685 Independent Study in Education (1–3)

Graduate students may undertake an individually supervised study of a special topic in education chosen by the student. Each project is done in consultation with a member of the graduate faculty qualified to guide and evaluate the student's work. Time deadlines must be set before initiation of the project.

Prerequisite: Permission of the instructor and department chair are required.

EDFS 686 Special Topics in Education (1–6)

An intensive study of an approved special topic in the field of education. No more than three hours may be taken under this listing during an academic semester or its equivalent.

Prerequisite: Permission of the instructor is required.

EDFS 687 Introduction to Educational Technology (3)

This is an introductory course for pre-service and in-service teachers using technology in the classroom. Students become familiar with application software such as word processing, databases and hypermedia, desktop publishing

and telecommunications, and learn to evaluate hardware and software. (fall, spring and summer)

EDFS 688 Techniques for Teaching Logo (3)

A study of the philosophy and techniques for teaching Logo and its use in the development of problem solving and higher-order thinking. The course includes learning Logo primitives and techniques for incorporating these into the educational curriculum. Illustrative programming problems require exploration and creativity and include utilization of Logo's ability to handle numbers, words, and lists in an interactive manner.
Prerequisite: EDFS 687 or equivalent or permission of the instructor.

EDFS 689 Application of Telecommunications in the Classroom (3)

This course provides information that allows students to incorporate telecommunications into their classroom using local bulletin board systems, Internet, and commercial information services. They learn to send and receive e-mail and post messages, both locally and internationally; send and receive files; and do electronic research. (fall)
Prerequisite: EDFS 687 or equivalent or permission of the instructor.

EDFS 690 Use of Technology in Reading, Language Arts and Social Studies (3)

Critical review of software and hardware in reading, language arts and social studies. Includes techniques for integrating technology into the curriculum and evaluating effectiveness. (summer)
Prerequisite: EDFS 687 or equivalent or permission of the instructor.

EDFS 691 Use of Technology in Math and Science (3)

Designed to expose participants to skills and techniques for using technology, software, and hardware to improve the instruction of mathematics and science. Participants review current mathematics and science software, develop activities to incorporate technology into the mathematics and science curriculum

and design problem-solving activities. (spring)
Prerequisite: EDFS 687 or equivalent or permission of the instructor.

EDFS 692 Advanced Technology Applications in Education (3)

This course incorporates technologies including: laser discs, CD-ROM, video and audio digitizing and hypermedia with advanced techniques, such as importing files, to create finished software programs. The class is based on using hypermedia as an authoring system, related technologies, and incorporating instructional design theory to create educational software. (spring)
Prerequisite: EDFS 687 or equivalent or permission of the instructor.

EDFS 697 Special Topics in Technology (3)

An intensive study of an approved special topic in the field of educational technology. No more than three hours may be taken under this listing during an academic semester or its equivalent.
Prerequisite: Permission of the instructor.

EDFS 700 Thesis (3)

A research project completed under the guidance of a graduate faculty member and submitted and defended before a graduate committee.

EDFS 701 Thesis (3)

Continuation of EDFS 700.

EDFS 702 Research and Development Project (3–6)

An in-depth study of an individually chosen topic, which is planned and completed under the guidance of the student's advisor and submitted for review by the graduate faculty.

EDFS 703 Curriculum, Policy, and Systems in Science and Mathematics Education (3)

This course is designed to examine possible solutions to current problems in curriculum and policy within school systems in South Carolina. This course is designed to increase organizational and interpersonal skills that empower teachers to alter school climates and garner technical support while designing and implementing K–12 programs of excellence. (spring)

Prerequisite: 15 hours credit in the SMFT program or permission of the instructor.

EDFS 705 Evaluation of Developmental Field-Based Experience (3)

This course is an intensive study of the process of developing a framework for guiding graduate study within the context of a public school classroom environment. Focus is on developing a professional portfolio in progress that integrates personal questions about classroom practice and student learning with professional teaching standards and educational research in the areas of portfolio assessment, teacher as researcher, and teacher as reflective practitioner.

EDFS 710 Introduction to Exceptional Children and Youth (3)

An introductory course designed for general and special educators. An interdisciplinary approach to the study of the learning and behavioral characteristics of exceptional children and youth. Includes causes, identification, educational and community programs and provisions. Observation required (10 hours). (fall and summer)

EDFS 711 Educational Procedures for Exceptional Children in the Regular Classroom (3)

A course designed for general education teachers, both elementary and secondary. Educational strategies to meet the challenges of students, including those with disabilities, who require additional attention in the regular classroom. Emphasis is on individualization of instruction. (summer)

EDFS 712 Transitional Programming for Exceptional Children and Youth (3)

Designed for general and special educators, this course focuses on transition issues affecting exceptional children and youth. Educators acquire the knowledge and skills to plan and implement appropriate transition services, including career and vocational education. Procedures to facilitate student career decision making are covered. (summer)
Prerequisite: EDFS 710 or equivalent or permission of the instructor.

EDFS 713 The Special Educator as Consultant (3)

A course designed to prepare special education teachers and support personnel to work with classroom teachers, principals, and other school personnel serving exceptional children. The course includes a review and application of consultation models, techniques, evaluation and research. (fall)
Prerequisite: EDFS 710 or equivalent or permission of the instructor.

EDFS 714 Introduction to Curriculum and Instruction in Special Education (3)

This course is designed to provide students with knowledge and skills related to research-based, validated “best” practices for determining curriculum and implementing instruction for students with mild and moderate disabilities. The course focuses on three major models of instruction: explicit instruction, direct instruction and strategy instruction. (fall)
Prerequisite: EDFS 710.

EDFS 715 Exceptional Children and Youth: Medical Perspectives (3)

An interdisciplinary study of exceptional children and youth from a medical perspective as related to the special educator. Disciplines represented include pediatrics, neurology, ophthalmology, orthopedics, psychiatry, etc.
Prerequisite: EDFS 710 or equivalent or permission of the instructor.

EDFS 716 Working with Families of Exceptional Children and Youth (3)

This course is designed to prepare special educators and other service providers to enter into collaborative decision making with parents. The course focuses on development of skills and knowledge that can be used during parent conferences, including Individualized Education Program (IEP) and Individualized Family Services Plan (IFSP) planning conferences. Methods that can be used to promote ongoing communication and support between families and professionals are addressed, along with approaches that can be used during parent education and training. (alternate fall)

Prerequisite: EDFS 710 or equivalent or permission of the instructor.

EDFS 717 Technology Applications in Special and Remedial Education (3)

Instruction in the use of technology and augmentative equipment with students who have special needs. Includes use of adaptive devices for individuals with disabilities, use and evaluation of a variety of applicable software and management software for special and remedial teachers. (summer)
Prerequisite: EDFS 687 or equivalent or permission of the instructor.

EDFS 718 Trends and Issues in Special Education (3)

A review of current trends and issues in special education as these relate to local, state and national education agencies and the education of exceptional children and youth. (spring)
Prerequisite: EDFS 710 or equivalent or permission of the instructor.

EDFS 720 Educational Assessment of Students with Disabilities (3)

A study of the selection, administration, and interpretation of formal standardized educational measures. Includes the application of assessment information to individualized education programs for exceptional children and youth. (fall and spring)
Prerequisite: EDFS 710 or equivalent or permission of the instructor. Fieldwork required (approximately 20 hours).

EDFS 721 Advanced Educational Assessment of Students with Disabilities (3)

An advanced course designed as a continuation of EDFS 720. Students pursue an in-depth study of measures designed for the assessment of learning and behavioral characteristics of students with mild, moderate and severe disabilities. Individual focus is on those measures in student's area of interest. (alternate springs)
Prerequisite: EDFS 720 or equivalent or permission of the instructor.

EDFS 724 Reading and Language Arts Instruction for Students with Disabilities (3)

This course is an in-depth study of research-based methodologies for reading and written expression assessment and instruction for K–12 students with emotional, learning or mental disabilities. The course will focus on developmental, corrective and strategic approaches and requires students to demonstrate competence in planning individualized reading and written language programs. (spring)
Prerequisite: EDFS 710 or equivalent introduction to disabilities; EDFS 714 or other introductory curriculum and instruction course.

EDFS 725 Classroom and Behavior Management (3)

A study of a variety of management systems with focus on specific techniques and their application in the classroom. (fall, spring, and summer)

EDFS 726 Advanced Classroom and Behavior Management (3)

A seminar designed for the in-depth study of applied behavior analysis and its application in academic settings. Techniques for data-based program modifications are applied to social and academic behavior of students. (summer)
Prerequisite: EDFS 725 or equivalent.

EDFS 730 Characteristics of Individuals with Emotional Disabilities (3)

An in-depth study of the unique learning and behavioral characteristics of children and youth with emotional disabilities. Includes theory and practice related to identification and educational community programs and provisions for this exceptionality. (spring)
Prerequisite: EDFS 710 or equivalent or permission of the instructor.

EDFS 731 Educational Procedures for Individuals with Emotional Disabilities (3)

An in-depth study of educational procedures used to teach children and youth with emotional disabilities. Includes teaching procedures, development and use of materials and individual and classroom management techniques. (fall)

Prerequisite: EDFS 730 or equivalent or permission of the instructor.

EDFS 738 Field Experiences with Students with Emotional Disabilities (3)

A supervised field experience requiring a minimum of 75 clock hours of direct contact with children and youth with emotional disabilities. (fall and spring)
Prerequisite or *co-requisite:* EDFS 731 or equivalent.

EDFS 740 Characteristics of Students with Learning Disabilities (3)

An in-depth study of the unique learning and behavioral characteristics of children and youth. Includes theory and practice related to identification and educational and community programs, and provisions for this exceptionality with learning disabilities. (spring)
Prerequisite: EDFS 710 or equivalent or permission of the instructor.

EDFS 741 Educational Procedures for Students with Learning Disabilities (3)

An in-depth study of educational procedures used to teach children and youth with learning disabilities. Includes teaching procedures, development and use of materials, and classroom management techniques. (fall)
Prerequisite: EDFS 740 or equivalent or permission of the instructor.

EDFS 748 Field Experiences with Students with Learning Disabilities (3)

A supervised field experience requiring a minimum of 75 clock hours of direct contact with children and youth with learning disabilities. (fall and spring)
Prerequisite or *co-requisite:* EDFS 741 or equivalent or permission of the instructor.

EDFS 750 Characteristics of Individuals with Mental Disabilities (3)

An in-depth study of the unique learning and behavioral characteristics of children and youth with mental disabilities. Includes theory and practice related to identification and educational and community programs,

and provisions for this exceptionality. (spring)
Prerequisite: EDFS 710 or equivalent or permission of the instructor.

EDFS 751 Educational Procedures for Individuals with Mental Disabilities (3)

An in-depth study of educational procedures used to teach children and youth with mental disabilities. Includes teaching procedures, development and use of materials, and classroom management techniques. (fall)
Prerequisite: EDFS 750.

EDFS 758 Field Experiences with Individuals with Mental Disabilities (3)

A supervised field experience requiring a minimum of 75 clock hours of direct contact with children and youth with mild or moderate mental disabilities.
Prerequisite or co-requisite: EDFS 751 or permission of the instructor.

EDFS 760 Characteristics of the Gifted and Talented (3)

An in-depth study of the unique learning and behavioral characteristics of children and youth who are gifted and talented. Includes theory and practice related to identification and educational and community programs, and provisions for this exceptionality.
Prerequisite: EDFS 710 or permission of the instructor.

EDFS 761 Educational Procedures for the Gifted and Talented (3)

An in-depth study of educational procedures used to teach children and youth who are gifted and talented. Includes teaching procedures, development and use of materials, and curriculum development.
Prerequisite: EDFS 760.

EDFS 762 Practicum in Instruction of the Gifted and Talented (3)

A supervised field experience requiring a minimum of 75 clock hours of direct contact with children and youth who are gifted and talented.
Prerequisite: EDFS 761.

EDFS 765 Characteristics of the Young Exceptional Child (3)

An in-depth study of the unique learning and behavioral characteristics of young children with exceptionalities. Includes theory and practice related to identification and educational and community programs, and provision for this exceptionality.
Prerequisite: EDFS 710 or permission of the instructor.

EDFS 766 Educational Procedures for the Young Exceptional Child (3)

An in-depth study of the educational procedures used to teach young children with exceptionalities. Includes teaching procedures, development and use of materials, and individual and classroom management techniques.
Prerequisite: EDFS 765.

EDFS 767 Field Experiences with Instruction of the Young Exceptional Child (3)

A supervised field experience requiring a minimum of 75 clock hours of direct contact with young children with exceptionalities.
Prerequisite: EDFS 766.

EDFS 774 Language Development and Language Disorders (3)

A study of normal and abnormal development of speech and language. Includes disorders of speech characteristics of the mentally disabled, emotionally disabled, learning disabled, physically disabled and others. (summer)
Prerequisite: EDFS 710 and 654 or equivalent.

EDFS 782 Physical Education for Exceptional Children and Youth (3)

A course designed for general and special educators concerned with the physical education of exceptional children and youth. Includes procedures to use in inclusive settings as well as in special programs.
Prerequisite: EDFS 710.

EDFS 795 Independent Study in Special Education (1–6)

A course designed to offer advanced students an opportunity to pursue an in-depth study

of a chosen topic in special education. Each student must develop a plan of study and file the completed study at the end of the semester.

Prerequisite: Permission of the instructor and department chair.

ENGLISH TO SPEAKERS OF OTHER LANGUAGES (ESOL) CERTIFICATE PROGRAMS

Department of Foundations, Secondary and Special Education

Meta Van Sickle, Interim Chair

Angela Crespo Cozart
Program Director

843-953-6353
cozarta@cofc.edu

Program Description

The goal of the ESOL program is to train individuals to teach English to non-native English speakers. Individuals who take both programs will meet South Carolina requirements for endorsement to teach in public schools. This program will attract both practicing teachers as well as individuals who want to work in other arenas, such as non-profit organizations, businesses, or those who expect to work/teach abroad; for such individuals, this certificate will constitute evidence of a body of knowledge in the field of ESOL.

The program is divided into two certificates. Completion of Certificate I will form a solid foundation for beginning ESOL teachers, whether they will be teaching in public or private schools, working as volunteers with children and/or adults or working within the business sector. For teachers who have already taken ESOL courses

provided by the state, or who have taken the four courses outlined in Certificate I, the courses included in Certificate II will help them complete the hours they need for endorsement.

Courses offered in both certificate programs are designed to give students a strong underpinning in the theories and methodologies necessary for teaching ESOL.

Certificate I (Initial) Courses

EDFS 670 Principles and Strategies for Teaching English to Speakers of Other Languages (ESOL) (K–12) (3)

A survey course intended to provide pre-K through grade 12 educators with knowledge of the principles, underlying methodologies and techniques for promoting acquisition of a second language through academic content. The main focus is to demonstrate a variety of instructional strategies that can benefit all students in a multicultural classroom.

EDFS 671 Teaching Reading and Writing to K–12 Speakers of Other Languages (ESOL) (3)

This course is intended to provide a theoretical foundation for the teaching of reading and writing English to limited English proficient (LEP) learners in K–12 schools. Participants will learn about dialogue journal writing, reading/writing workshops, family literacy, writing for publication and writing in the content areas.

EDFS 672 Linguistic and Cultural Diversity in Education (3)

This survey course provides pre-K through grade 12 educators with an understanding of the issues affecting linguistically and culturally diverse learners in American schools. Topics include: history of ESOL and bilingual education, cultural and learning style preferences, cultural influences in curriculum and materials, legal issues and assessment, etc.

EDFS 673 Assessing Student Performance (3)

This class will provide a theoretical foundation for gathering and analyzing the data necessary for effective assessment of instruction serving language minority learners. Students will learn to question what kinds of data are collected, why and how data are used and what kinds of data may be overlooked in the assessment process.

Certificate II (Advanced) Program Admission Requirements

Entrance Requirements

- Completion of Certificate I courses or permission of the director.
- Undergraduate degree from any certified institution of higher learning, whether American or foreign.
- Second language learning experience as documented by any of the following:
Six semester hours in courses in a single second language

OR

Completion of intensive language training by

the Peace Corps, the Foreign Service Institute, or the Defense Language Institute

OR

Placement by the language department of an accredited institution in a third semester level. Demonstration of second language proficiency as verified in writing by an official designated by the SCDE for languages unavailable at accredited institutions.

(The College should have a faculty or staff member who is certified in oral proficiency interviewing. Training for such certification is made available several times a year in various parts of the country.)

Certificate II (Advanced) Courses

EDFS 680 Teaching English through the Content Areas (or Content Modification for ESOL Students K–12) (3)

This course will focus on successful techniques for teaching both content and related academic language to all students. Students will learn how to make modifications for limited English proficiency students by using several techniques, including graphic organizers, scaffolded lessons, cooperative learning, alternative assessment and multicultural activities.

EDFS 681 Second Language Acquisition for Teachers of Elementary and Secondary Learners (3)

This course will provide students with an opportunity to compare first and second language acquisition theories, such as the biological, learning, cognitive, behaviorist and interactionist theories. Students will also explore political, social and economic factors that impede or accelerate the learning of a second language.

EDFS 682 ESOL Curriculum Design and Materials Development for K–12 Students (3)

This course will explore current trends in developing effective curriculum and materials for K–12 students who are non-native English speakers. Topics include instructional strategies

and materials for content-area instruction and developing the four language components.

EDFS 683 English Grammar/Structure (for ESOL Teachers) (3)

This course will provide educators with an understanding of facts and generalizations about the English language and the resources to use that understanding in ESOL/EFL instruction. Students will develop skill in linguistic analysis through exploring traditional, transformational, case and discourse perspectives.

EDFS 684 ESOL/Talented and Gifted and Special Education Issues (3)

This course will explore ways of differentiating language and learning differences from disabilities. The following will be addressed: building learning communities for diverse learners, identifying gifted and talented non-native English speakers, deconstructing concepts of disability in society, family and school partnerships, issues in ESOL, talented and gifted and special education.

EDFS 704 Field Experiences in the Instruction of English as a Second Language to Elementary and Secondary Learners (3)

This course includes 100 hours of supervised fieldwork and a weekly, one-hour seminar. Students will “shadow” an ESOL teacher and work towards jointly preparing and delivering classroom instruction.

SCHOOL OF HUMANITIES & SOCIAL SCIENCES

DEGREES OFFERED:

Master of Arts in Communication

Master of Arts in English

Master of Arts in History

Master of Public Administration

Certificate in Organizational and Corporate Communication

MASTER OF ARTS IN COMMUNICATION

<http://www.cofc.edu/communication/gradcomm/>

Department of Communication

843-953-7017

Brian McGee, Chair

**Douglas Ferguson,
Program Director**

Fergusond@cofc.edu 843-953-7854

Description

This 33-hour master's degree program emphasizes organizational and corporate communication. Courses are available in the evening and conveniently located at the Lowcountry Graduate Center. Full- and part-time students are welcome. All graduate students must earn a satisfactory rating on a comprehensive examination after completing 24 graduate hours in the program. Students may choose a thesis option or a non-thesis option for completing the program. The thesis option requires completion of a traditional research project, with students registering for three credit hours of Master's Thesis during each of two consecutive semesters (COMM 701-702). The non-thesis option requires completion of an approved three-credit-hour graduate Internship (COMM 795), with a provision for waiving the internship requirement if a student demonstrates appropriate professional experience in a communication career.

Required Courses:

COMM 501 Quantitative Research Methods

COMM 502 Qualitative Research Methods

COMM 510 Communication Theory

Choose one from:

COMM 681 Classical Rhetorical Theory

COMM 682 Modern and Contemporary Rhetorical Theory

Choose one from:

COMM 521 Seminar in Small Group Communication

COMM 580 Seminar in Organizational Communication

Choose COMM electives, plus either 6 thesis hours or 3 internship hours, to reach the 33-hour minimum.

Minimum Admission Requirements

- Baccalaureate degree from an accredited institution of higher education with a 2.75 minimum GPA (3.0 GPA in the major)
- Minimum GRE composite score of 1000 on the combined verbal and quantitative sections and 4 on the writing assessment section
- Acceptable coursework in communication or a closely related discipline
- Two letters of recommendation
- A writing sample
- A personal statement outlining your background and goals

Applicants are expected to have earned at least 15 undergraduate hours in communication or a related discipline. Applicants who do not meet the requirements for regular admission may be admitted provisionally until the deficiencies are corrected. Conditions of the provisional acceptances that will lead to degree status will

be clearly outlined for the prospective student by the Department of Communication Graduate Committee.

Graduate Certificate in Organizational and Corporate Communication

www.cofc.edu/communication/major/gradcert.htm

Description

The certificate program provides the means by which students can enhance or upgrade their skills in the realm of public relations, advertising and organizational communication. Students enrolled in this program take four courses that are designed for post-baccalaureate study in communication. The certificate program is specially designed for students who are mid-career professionals or former corporate communication majors. A secondary objective is to prepare students who wish to transfer their fundamental graduate-level CofC coursework to a regular master's program. All courses are taught at the Lowcountry Graduate Center near the Charleston airport.

Required Courses (may be amended as needed)

COMM 501 Research Methods in Communication

COMM 510 Communication Theory

COMM 535 Public Relations Campaigns

or COMM 580 Special Topics

COMM 507 Seminar in Communication Management

or COMM 580 Special Topics in Organizational Communication

(There is no limit on how many times a student can take COMM 580)

Minimum Admission Requirements

- Baccalaureate degree from an accredited institution of higher education with a 2.5 minimum GPA.
- Written essay (1,000 words) on a topic related to communication.

Admission Procedures and Deadlines

- Submit a completed application form together with a nonrefundable \$45 application fee (\$35 online).
- Submit a one-page statement about educational goals and interest in a post-baccalaureate education.
- Submit an official copy of a transcript from each institute of higher education attended, including documentation of graduation from an accredited four-year college or university, or a copy of an official transcript from the graduate institution in which the student is currently enrolled.

Application Deadlines for Certificate Program

fall.....July 15

springNovember 15

summer.....May 1

Certificate Program Requirements

Students must maintain a grade point average of 3.0 (B) in order to receive the certificate.

Course Descriptions

COMM 501 Quantitative Research Methods in Communication (3)

Quantitative methods employed in communication research, including experiments and surveys. Students will design quantitative research projects, learn to analyze data and write research reports.

COMM 502: Qualitative Research Methods (3)

Qualitative methods employed in communication research, including ethnography, textual analysis and interviewing methods. Students will design qualitative research projects, learn to analyze data and write research reports.

COMM 507 Issues in Communication Management (3)

A seminar course on the problems, issues, and practices affecting the management of complex organizations, with an emphasis on conflict communication and negotiation.

COMM 510 Communication Theory (3)

This course focuses on three epistemological approaches to the study of communication – empirical, interpretive and critical. The student will learn to consider each of these approaches, and in particular, what constitutes ways of knowing from each of the three perspectives, leading to an advanced understanding of the main theories of human and mediated communication.

COMM 521: Seminar in Small Group Communication (3)

This seminar course will focus on problems, issues and contexts studied by group communication scholars (e.g., task-oriented group decisional process).
Prerequisite: COMM 510 or consent of instructor.

COMM 522: International and Intercultural Communication (3)

A review of intercultural, cross-cultural and international communication theories and issues. Implications for culturally diverse organizations.

COMM 524: Speechwriting in Public Communication (3)

Case-driven study of major types of contemporary speeches and the speechwriting process in public communication, with an emphasis on the preparation of speech manuscripts and training in manuscript speech delivery and presentational technologies.

COMM 525: Executive Communication (3)

A study of the communication competencies required for successful organizational leadership, including individual and group presentations, meeting management and utilization of communication technologies.

COMM 535 Public Relations Campaigns (3)

The course has a primary emphasis on group work on behalf of an outside client based on current theories of organizational communication. Students will engage in significant research elements such as focus group and surveys, as well as budgets and timetables. Students formally present comprehensive findings and proposals to the client.

COMM 561: Identity and Impression Management (3)

This course surveys theories and research regarding how individuals, groups and organizations attempt to manage the ways they are perceived by others through the strategic manipulation of communication practices and cues.

COMM 580 Seminar in Organizational Communication (3)

This course offers graduate students advanced understanding of theory and research in special topics areas. The focus is on topics most applicable to the areas of organizational communication and public relations.

COMM 584: Contemporary Problems in Communication Ethics (3)

This course applies classical and contemporary philosophical and social scientific theories to ethical issues associated with interpersonal,

group organizational and other communication contexts.

COMM 681: Classical Rhetorical Theory (3)

A critical survey of Greco-Roman rhetorical thought, from the pre-Socratic Sophists to St. Augustine, including the influence of classical theories on the Medieval and Renaissance periods in Europe. Readings drawn from primary sources as well as contemporary commentary on classical theories. Prerequisite: COMM 510 or consent of instructor.

COMM 682: Modern and Contemporary Rhetorical Theory (3)

The study of Western rhetorical theory from the seventeenth century to the present. This course will survey the insights of rhetorical theory with respect to messages delivered in interpersonal, group, organizational and public communication contexts. Prerequisite: COMM 510 or consent of instructor.

COMM 698: Tutorial (3)

Individual study of a given topic following a syllabus of readings, papers and other requirements prescribed by a faculty member.

COMM 699: Independent Study (1-3)

Individual study of an agreed-upon topic under the direction of a faculty member, following a course of reading and other requirements proposed by the student and established by negotiation with the graduate faculty member. Prerequisite: permission of instructor.

COMM 701: Master's Thesis (3)

Credit hours for completion of a formal master's thesis under faculty direction. A successful oral defense of the thesis is required. Prerequisite: permission of the Graduate Program Director.

COMM 702: Master's Thesis (3)

Credit hours for completion of a formal master's thesis under faculty direction. A successful oral defense of the thesis is required. Prerequisite: permission of the Graduate Program Director.

COMM 795: Internship (3)

A supervised field experience in which the student observes and participates in work related to the communication degree, such as public relations or teaching. The internship requires 120 or more hours of work and completion of a formal report. Graded on a satisfactory/unsatisfactory basis. Prerequisite: permission of the Graduate Program Director.

MASTER OF ARTS IN ENGLISH

www.cofc.edu/~english/MA.html

Department of English

843-953-5665

Larry A. Carlson, Chair

**Patricia Ward,
Program Director**

warpd@cofc.edu; 843-953-5648

Program Description

The Graduate School of the College of Charleston and The Citadel offer a joint Master of Arts in English. The thirty-six (36) hour program, with a thesis option, provides advanced coursework in British literature, American literature, English language, and composition and rhetoric. The program is designed to attract qualified holders of the baccalaureate degree, whether recent college graduates, English teachers, or others interested in pursuing graduate studies in English. A joint program committee, comprised of faculty members from each institution, oversees admissions, course scheduling, comprehensive examinations, degree certification, and other matters related to the management of the program. Diplomas and other official documents will indicate that the program is a joint endeavor and will include the names of both institutions.

Minimum Admission Requirements

Degree-seeking students:

- Submit a completed application form with a nonrefundable application fee of \$45 (\$35 online).

- Submit an official copy of a transcript from each institution of higher learning attended, including documentation of graduation from an accredited four-year college or university. The transcript(s) should be sent directly from the institution(s) attended to the Graduate School Office at The Graduate School of the College of Charleston.
- Submit at least two letters of recommendation from former professors or immediate supervisors in recent employment. Each referee should be as specific as possible in addressing the applicant's motivation and ability to successfully complete a graduate degree.
- Submit a two-page statement about educational goals and interest in a graduate program in English.
- Submit a writing sample that demonstrates an ability to perform literary analysis and conduct research. Typically, this requirement can be met by submitting a research paper prepared for an advanced undergraduate English course.
- Submit an official copy of scores from the general test of the Graduate Record Examination or the Miller Analogies Test (MAT). The test(s) must have been taken during the past five years.
- Applicants are expected to have a cumulative undergraduate GPA of at least 2.5 on a 4.0 scale and a 3.0 in the major. They should also have a composite GRE verbal and quantitative score of at least 1000 and a 4 on the writing assessment section. Those taking the MAT should have a score of at least 45.
- An applicant who fails to meet these minimum

requirements or who has an inadequate undergraduate background in English may be allowed, upon making a written request to the Joint Program Committee, to pursue coursework as a provisional student. Upon completing nine semester hours with a minimum GPA of 3.00, the student may be considered for regular degree-seeking status.

Non-degree students:

- Submit a completed application form with a nonrefundable application fee of \$45 (\$35 online).
- Submit one official copy of a transcript from each institution of higher learning attended, including documentation of graduation from an accredited four-year college or university. The transcript(s) should be sent directly from the institution(s) attended to the Graduate School Office at The Graduate School of the College of Charleston.

Non-degree students may be permitted to register for up to 12 semester hours of credit prior to applying for admission to the program. Non-degree students who have taken in excess of 12 semester hours of graduate courses in English must have written permission from the Joint Program Committee to continue enrollment in a non-degree status.

Application Deadlines

The Joint Program Committee will consider completed applications for the regular degree program on the following dates:

fall June 1

spring November 1

summer April 1

Applications will be considered year round for non-degree, provisional, and transient students.

Plan of Study

In consultation with the program director, each degree-seeking candidate will develop a plan of study which includes coursework at both institutions. The plan of study must be prepared no later than the end of the student's first semester of registration or upon completion of the first six hours of graduate work.

Courses

Graduate study in English demands extensive reading and writing, thorough research, and advanced literary analysis. Only graduate students will be automatically enrolled. However, advanced undergraduates – upper-level students in English and related fields – may request enrollment in 500-level classes. To do this they will need permission from the instructor and the Joint Program Committee. No more than two 500-level courses may be taken by an undergraduate. Courses at the 600- and 700- levels are for graduate students exclusively.

Degree Requirements

The Master of Arts in English is conferred upon those candidates who successfully complete an approved program of study consisting of at least 36 semester hours of graduate credit with a cumulative GPA of 3.0. Specific requirements are listed below:

Thesis Option

- British Literature Before 1800 6 hours
- British Literature After 1800 6 hours
- American Literature 6 hours
- Electives 12 hours
- Thesis and Oral Defense of Thesis 6 hours
- Comprehensive Examination
- Demonstration of competency in one foreign language, ancient or modern

Non-thesis Option

Same as above, except that the thesis is deleted and the number of elective hours is 18.

Notes:

- At least one course must be a seminar.
- Approved electives will, in most cases, be graduate courses in English. Others will be considered on a case-by-case basis by the Joint Program Committee.
- The foreign language requirement can be satisfied by translating a passage provided by The Citadel and The Graduate School of the College of Charleston. Acceptable languages will include at least the following: German, French, Spanish, Italian, Ancient Greek, Latin. Others will be considered on a case-by-case basis. This requirement must be satisfied before taking the comprehensive examination.
- At least nine hours must be taken at each campus.
- No more than nine hours of 698 (3), 699 (3), and 701 (6) in any combination may count toward the 36 hours.

A comprehensive examination is prepared and administered by the Joint Program Committee, and is taken by all candidates after the completion of at least 27 hours of coursework. This comprehensive examination is a thorough review of the fields covered in the student's program. For those who complete a thesis, a satisfactory oral defense is also required before final certification for the degree.

African American Concentration

Students opting to add a concentration in African American literature must meet the normal requirements for the M.A. degree. As part of their 36-hour course of study, they also must complete one of these two courses of study:

Standard Option

- 9 hours of African American literature (any combination of 535, 570, 571, 572, and 573)
- 3 hours of study of an African American topic in another discipline, as approved by the program director
- 3 hours of independent study or internship in

an African American topic, as approved by the program director

Thesis Option

- 6 hours of African American literature (any combination of 535, 570, 571, 572, and 573)
- 3 hours of study of an African American topic in another discipline, as approved by the program director
- 6 hours of thesis on an African American topic

Students can apply one of their African American literature courses to the American literature requirement for the M.A. Students can use their elective hours to meet these course requirements.

Course Descriptions

ENGL 500 Old and Middle English Literature (3)

A study of Beowulf, other Old English poems, and Old English prose in translation; and also a study of such Middle English works as *Sir Gawain and the Green Knight*, *Pearl*, *Piers Plowman*, *Ancrene Riwe*, *The Owl and the Nightingale*, and other romances, lyrics, and drama. Most of the Middle English is read in the original. (Chaucer is excluded.)

ENGL 501 Chaucer (3)

A study of Chaucer's language, art, and cultural milieu through the reading of Troilus and Criseyde, the *Canterbury Tales* and many of the shorter works.

ENGL 502 Shakespeare (3)

A comprehensive study of Shakespeare's art, including an intensive reading of several plays and appropriate attention to the primary critical approaches.

ENGL 503 English Drama to 1642 (3)

A study of English drama from its origins in the Middle Ages, through the predecessors and contemporaries of Shakespeare, and on to the closing of the theatres in 1642.

ENGL 504 Poetry and Prose of the English Renaissance (3)

Non-dramatic poetry and prose of the 16th and early 17th centuries, with emphasis on the major authors (Spenser, Sidney, Marlowe, Jonson, Donne and Herbert) and on the major literary types.

ENGL 505 Milton (3)

A study of the major poetry, selected prose, and selected minor poems with emphasis on *Paradise Lost*.

ENGL 506 Restoration and Eighteenth-Century Drama (3)

A study of such important dramatists of the period as Otway, Etherege, Wycherley, Dryden, Congreve, Vanbrugh, Farquhar, Goldsmith, Sheridan and others.

ENGL 507 Survey of Restoration and Eighteenth-Century Literature (3)

A study of Dryden, Swift, Pope, Johnson, Blake and other important poets and prose writers of the period.

ENGL 509 Romantic Literature (3)

A study of the chief features of the Romantic writings of the early 19th century, with special emphasis on Wordsworth, Coleridge, Byron, Shelley and Keats.

ENGL 510 Victorian Literature (3)

A study of English literature from 1832 to 1900 of major writers such as Tennyson, Browning, Arnold, Carlyle, Swinburne and Rossetti.

ENGL 512 Southern Literature (3)

A study of a wide range of literature written in or about the American South.

ENGL 516 Continental Literature (3)

A study of European literature in translation since the Renaissance, including works by such authors as Cervantes, Moliere, Racine, Goethe, Stendhal, Balzac, Tolstoy, Dostoyevski and important writers of the 20th century.

ENGL 517, 518 Special Topics in Literature (3, 3)

A study of a special author, period, topic, or problem in literature outside the routine offerings

of the department. The subject for each course will be announced.

ENGL 520 A Survey of World Literature I (3)

Masterpieces of world literature in translation from the beginnings to around 1650 with special attention to the philosophical content and the development of literary forms.

ENGL 521 A Survey of World Literature II (3)

Masterpieces of world literature in translation from around 1650 to the present time with special attention to the philosophical content and the development of literary forms.

ENGL 522 Colonial and Revolutionary American Literature (3)

A detailed study of major American writers from the earliest settlers through the end of the 18th century.

ENGL 523 Nineteenth-Century American Literature I – Romanticism (3)

A study of major figures of the American Romantic period (approximately 1830–1860).

ENGL 524 Nineteenth-Century American Literature II – Realism (3)

A study of major figures of the American Realistic period (approximately 1860–1900).

ENGL 525 Eighteenth-Century British Novel (3)

A study of the origins of the British novel, including such figures as Fielding, Richardson, and Defoe.

ENGL 526 Victorian Novel (3)

A study of major British novelists of the late 19th century, including Dickens, Eliot and Hardy.

ENGL 527 British Fiction 1900 to 1945 (3)

A study of the novels and short stories of major 20th-century British writers up to 1945, including such figures as Conrad, Lawrence, Forster, Woolf and Joyce.

ENGL 528 American Fiction 1900 to Present (3)

A study of the novels and short stories of major writers of the first half of the twentieth century, including such figures as Fitzgerald, Wolfe, Faulkner and Hemingway.

ENGL 529 American Fiction Since 1945 (3)

A study of significant American novels and short fiction published since World War II.

ENGL 530 Special Topics in Humanities (3)

A study of special areas of the humanities or related areas which are outside the normal course offerings of the English department. The subject for each course will be announced.

ENGL 531 British Poetry 1900 to Present (3)

A study of the poetry of major 20th-century British authors, such as Hardy, Yeats, Thomas and Auden.

ENGL 532 American Poetry 1900 to Present (3)

A study of major poets after 1900.

ENGL 533 British Drama 1900 to Present (3)

A study of the work of major 20th-century British dramatists, such as Shaw, Pinter, Stoppard and Beckett.

ENGL 534 American Drama 1900 to Present (3)

A study of significant American plays written after 1900.

ENGL 535 African American Literature (3)

A survey of African American literature from the early days of slavery to the struggle for emancipation, to the 20th-century Harlem Renaissance and civil rights movement.

ENGL 537 Contemporary British Literature (3)

A study of post-World War II British writers.

ENGL 550, 551 Special Topics in Composition or Language (3, 3)

A study of a special author, period, topic, or problem in composition or language that is

outside the routine offerings of the department. The subject for each course will be announced.

ENGL 552 Literature for Adolescents (3)

The study, discussion, and practice of advanced composition techniques; including the use of computer technology for print documents, audio-visual presentations, and Web applications.

ENGL 553 Modern English Grammar (3)

An intensive study of the syntax of Present Day English. The course also includes a review of traditional grammar, focusing primarily on the parts of speech. Special attention is given to linguistic theory, particularly regarding the acquisition of language.

ENGL 554 History of the English Language (3)

A historical survey of the syntactic and phonological features of Old, Middle, Early Modern, and Present Day English. Special attention is given to the varieties of American English, particularly African American Vernacular English.

ENGL 555 Literary Criticism (3)

A study of the major theories of how to understand literature and practical application of the theories to particular works of literature.

ENGL 556 Theory and Practice of Teaching Composition (3)

A study of traditional and contemporary theories of the composition process and applications of those theories to teaching composition.

ENGL 557 Creative Writing – Poetry (3)

Class discussion of student writing using 20th-century poems as models.

ENGL 558 Technical and Professional Writing (3)

Principles and practice of technical communication as applied to reports, technical papers, oral presentations and business communications.

ENGL 559 History and Theory of Rhetoric (3)

A study of language as a means of winning the assent, sympathy or cooperation of an audience.

Includes contemporary rhetorical theory and its development from classical rhetoric.

ENGL 560 Film Studies (3)

This film course will expose students to films from a variety of nations and filmmakers that represent the chief cinematic movements of the twentieth century (Weimar Expressionism, French New Wave, American Noir, etc.), and it will instruct students in the terminology and techniques of filmmaking. The students will, by studying the relationship between the tools of filmmaking and the finished products, learn to “read” films as metaphors of reality.

ENGL 562 Workshop in Advanced Composition (3)

The study, discussion, and practice of advanced composition techniques; including the use of computer technology for print documents, audio-visual presentations and web applications.

ENGL 563 Creative Writing – Fiction (3)

Class discussion of student writing using 20th-century short stories as models.

ENGL 570 Topics in African American Literary Genres (3)

A study of a particular genre of African American literature, such as drama, the novel or poetry. Topics will vary according to instructors.

ENGL 571 Topics in African American Literary Periods (3)

A study of a particular period of African American literature, such as the Harlem Renaissance. Topics will vary according to instructors.

ENGL 572 Topics in Major African American Writers (3)

A study of a particular African American writer, such as Langston Hughes or Toni Morrison. Topics will vary according to instructors.

ENGL 573 Special Topics in African American Literature (3)

A study of a specific topic in African American literature that is not a genre, period, or individual writer. Topics will vary according to instructors.

ENGL 650 Principles of Literary Research (3)

Study of textual bibliography, research methods and resources, and methods of presenting research.

ENGL 698 Tutorial (3)

Individual study of a given topic following a syllabus of readings, papers and other requirements prescribed by a faculty member.

ENGL 699 Independent Study (3)

Individual study of an agreed-upon topic under the direction of a faculty member but following a course of reading and other requirements proposed by the student and established by negotiation with the director.

ENGL 700 Seminar (3)

Individual research into a scholarly or critical problem in literature, composition or language. Progress, methods, and results will be shared with the class by presentation and discussion and will lead to the preparation of a single long paper.

ENGL 701 Thesis (6)

Six credit hours for completion of a formal master's thesis under faculty direction.

ENGL 702 Internship (1–3)

A supervised field experience in which the student observes and participates in a professional occupation related to the English degree, such as publishing, technical writing, or teaching. The internship will consist of 100–300 hours of work and completion of a formal report. Permission of the graduate director is required. Graded on a satisfactory/unsatisfactory basis.

MASTER OF ARTS IN HISTORY

William J. Olejniczak, Chair

W. Scott Poole
Program Director

poolews@cofc.edu; 843-953-4862

Program Description

The Graduate School of the College of Charleston and The Citadel offer a joint master of arts in history providing each student with advanced specialized work in one of three areas: United States history, European history and Asian/African/Latin American history. The program offers qualified holders of the baccalaureate degree the opportunity to pursue historical studies in the midst of some of America's richest historical treasures. The management of the program is vested in a joint program committee composed of representatives of the two history departments, including the director and the associate director. (The latter two positions rotate between the two institutions.) Diplomas and other documents will indicate that the program was a joint endeavor and will include the names of both institutions.

Minimum Admission Requirements

Degree-seeking students

- Submit a completed application form with a nonrefundable application fee of \$45 (\$35 online).
- Submit one official copy of a transcript from each institution of higher learning attended,

including documentation of graduation from an accredited four-year college or university.

- Submit three letters of recommendation, normally from former professors. Each referee should be as specific as possible in the analysis of the applicant's potential for academic success.
- Submit an official copy of test scores of the Graduate Record Examination or Miller Analogies Test (must be taken during the last five years). Applicants are expected to score at least 500 on the verbal and between 4-6 on the writing assessment sections of the text. An applicant who fails to meet this score may be allowed to pursue coursework as a provisional student. Upon completion of nine semester hours with no more than three hours in independent study (HIST 770), and a minimum GPA of 3.25, the test score may be waived. The student must make this request in writing to the Joint Program Committee.
- Submit written evidence of your ability to conduct research and present findings. Ideally, this requirement should be met by submission of a term paper, honors thesis, etc. from a graduate or upper-level course taken in college.
- Ordinarily, applicants are expected to have completed and passed at least 15 hours of undergraduate history courses beyond the introductory level.
- Applicants are expected to have a cumulative undergraduate GPA of at least 2.5 on a 4.0 scale and a 3.0 in the major.

Non-degree students

- Submit a completed application form with a nonrefundable application fee of \$45 (\$35 online).
- Submit one official copy of a transcript from each institution of higher learning attended, including documentation of graduation from an accredited four-year college or university.

With the approval of the director or associate director, non-degree students may be permitted to register for up to 12 semester hours of credit prior to applying for admission to the program. Non-degree students who have taken in excess of 12 semester hours of graduate courses in history must have permission of the Joint Program Committee to continue enrollment in a non-degree status. Courses taken in non-degree status may only be applied towards a degree with the approval of the Joint Program Committee.

Application Deadlines

The Joint Program Committee will consider completed applications for the degree program on the following dates:

summer and fall sessions	March 1
spring semester	October 15

Plan of Study

In consultation with an advisor, each degree candidate will develop a plan of study which includes a minimum of nine hours of coursework at both institutions. The plan of study must be submitted to the Graduate School Office in order to be approved for graduation.

Courses

In addition to lectures and examinations, graduate courses will demand wide reading,

thorough research, and advanced historical writing. Only graduate students will be automatically enrolled, but exceptional undergraduates – upper division majors in history and related disciplines who have a minimum GPA of 3.40 in history courses – may be enrolled in 500-level courses. For this, however, they will need permission from the instructor and the Joint Program Committee. No more than two 500-level courses may be taken by an undergraduate, while 600-level and 700-level courses are for graduate students exclusively. Since juniors and seniors will not receive graduate credit for completing these courses, the amount of work required of them will not be as great as that expected of the graduate students. The qualitative expectations remain the same for all students.

Degree Requirements

The Master of Arts in History is conferred upon those candidates who successfully complete an approved program of study consisting of a minimum of 33 semester hours of graduate credit with a cumulative GPA of 3.0. The distribution of courses follows this general scheme:

Major concentration	18 hours*
First minor area	3 hours**
Second minor area	3 hours**
Historiography	3 hours
Electives	6 hours***

*Includes either a thesis (6) or two research seminars (3, 3), both of which should be taken in the major concentration when possible.

**The minor areas must be distributed between both institutions.

***In history or a related discipline in the humanities or social sciences. Non-history courses require prior approval of the program director.

All students are encouraged to attain proficiency in a foreign language. There is no formal requirement for students in the program to demonstrate language proficiency at a certain level. Depending upon the program, however, a candidate may be required by the advisor to demonstrate mastery of an appropriate foreign

language, indicated by the satisfactory use of source material or literature in the relevant foreign language in seminar or research work.

A comprehensive written examination is prepared and administered by the director and associate director and is required of all candidates to be taken after the completion of 27 hours of coursework. This comprehensive examination is a thorough review of the fields covered in the student's program. The examination committee is composed of faculty from both institutions. Those who intend to write a thesis must first have a proposal approved by a thesis committee and by the Joint Program Committee. A satisfactory oral defense is also required before final certification for the degree. Non-thesis track students must satisfactorily complete two 700-level research seminars before final certification for the degree.

African American Concentration

Students opting to add a concentration in African American history must meet all the normal requirements for the master's degree. In addition, they must complete one of the two courses of study below and all courses chosen must meet the approval of the graduate program director:

Thesis Option

6 hours in African American oriented history
3 approved hours in another discipline
6 hours in an African American oriented thesis

Non-Thesis Option

9 hours in African American oriented history
3 approved hours in another discipline
3 hours in African American oriented independent study or similar (i.e. research seminar)
Three hours of independent study on an African American topic may be included as part of the nine hours of coursework.

Course Descriptions

Normally, 500-level courses enroll a maximum of 20 students. In these courses,

lectures are accompanied by some discussion of the readings, and the writing requirements are usually a minimum of 15 pages. In contrast, 600-level courses are restricted to 15 M.A. students and normally are conducted as seminars with discussions of assigned readings in the scholarly literature. Emphasis is placed upon the analysis and synthesis of diverse historical materials and a longer research paper of 20 to 25 pages is required.

HIST 502 Colonial America and the American Revolution to 1789 (3)

The motives of colonization; the evolution of self-government; the extension of the frontier; economic, social, and religious life; imperial rivalries; the causes of the Revolution; the War for American Independence; problems of the Confederation; and the establishment of the Federal Union.

HIST 504 Civil War and Reconstruction (3)

The political, economic, diplomatic and military history of the United States, between 1850–1877, emphasizing the forces that tended to bind or disrupt the Union, including a detailed account of the war and its consequences.

HIST 506 The U.S. in the 20th Century (3)

A study of the efforts to fulfill the democratic vision in the era of wars and depressions, accelerating technological innovation, material progress and cultural change.

HIST 521 The American South (3)

The political, social and economic development of the South from the 1820s to the present, with emphasis on the region within the national context as one of both change and continuity.

HIST 522 South Carolina History (3)

A survey of the political, economic, social and intellectual development of South Carolina from its discovery to the present, with emphasis on the relation of the state to the South and to the nation.

HIST 523 Afro-American History (3)

An introduction to the history of black Americans in the United States, with emphasis on the social forces underlying transitions from West Africa to the New World, from slavery to freedom, and from rural to urban life. Topics to be discussed include the Atlantic slave trade, American slave societies, maroon communities, free blacks in the antebellum United States, Reconstruction and free labor, colonization, emigration and urban migrations.

HIST 532 Ancient Greece (3)

Greek civilization from its beginning to Alexander the Great. Emphasis on political, economic, social and intellectual movements.

HIST 533 Ancient Rome (3)

Roman history from its beginning until the Age of Constantine. Emphasis on political and social development in the Republic and the early empire.

HIST 535 Medieval Europe (3)

European social, political, economic, and religious institutions and cultural and intellectual phenomena in the light of the changing historical environment from the end of the Ancient World to the Renaissance.

HIST 537 Renaissance and Reformation (3)

The Renaissance as a European-wide movement emanating from the Italian peninsula; the crisis of the church medieval and the rise of the Renaissance papacy; Humanism, with special emphasis on the great painters, architects and sculptors such as Giotto, Brunelleschi, Donatello, Botticelli, da Vinci, Raphael and Michelangelo; the Renaissance city-states; Machiavelli and the Renaissance monarchies of France, England, Spain and the Holy Roman Empire; the continuing crisis of the church medieval and the religious upheavals of Protestantism; the work of Luther, Calvin, Zwingli and the Anabaptists; the Catholic Reformation; the age of civil and religious wars.

HIST 541 Enlightenment and French Revolution (3)

The major social, political and cultural changes in Europe from the death of Louis XIV to the fall of Napoleon. Topics include the intellectual history of the Enlightenment, the causes of the Revolution, the development of radical ideologies, the French impact on Europe and the achievements of Napoleon as civil administrator, military strategist and commander.

HIST 542 Nineteenth-Century Europe (3)

Europe from Waterloo to Sarajevo; political reaction and reform; the Industrial Revolution with its economic, social and political effects; nationalism and the renewed interest in imperialism; other factors in international rivalries and the coming of World War I.

HIST 543 Twentieth-Century Europe (3)

An examination of the origins and consequences of two World Wars on the major European states; the political, social and economic development of those states and their relative positions today.

HIST 545 History of Modern Russia (3)

History of the development of Tsarist absolutism under the Romanov dynasty and of the religious, social and economic institutions of the Tsarist state. Intensive treatment of the 1917 Revolution and the institutional development of the Soviet Union to world power status.

HIST 551 Women in the Western World (3)

An examination of the ideas, institutions, and events in Western Civilization which specifically affected women. Lectures and readings will be organized topically rather than geographically or chronologically. Areas to be examined include religion, education, sex and marriage, the family, work and feminist and suffragist movements.

HIST 562 Colonial Latin America (3)

A survey of Spanish and Portuguese colonial America to 1825. Topics include native populations on the eve of conquest; exploration and conquest by Europeans; the development of multiracial

societies; the colonial economies; the institutions of Ibero-American empires; the social, economic and intellectual roots of revolution; independence movements.

HIST 563 Modern Latin America (3)

A survey of Spanish and Portuguese America since the wars for independence. Topics include the aftermath of the independence movements, incorporation into the international economy, changing social organization, race relations, the search for political stability, the role of the military, 20th century revolutionary movements and intellectual currents.

HIST 572 Pre-colonial Africa (3)

An introduction to the pre-colonial history of sub-Saharan Africa. Special focus on the growth of Islam in West Africa, the East African city-states and kingdoms and the upheaval in 19th-century southern Africa. African slavery and the slave trade are also considered.

HIST 573 Modern Africa (3)

A history of the development of Africa during the modern period, including European penetration, the Colonial era, African resistance and independence and contemporary issues.

HIST 577 Modern Middle East (3)

Tradition, modernization, and change in the contemporary Islamic World. The impact of nationalism, secularism and Westernization in the Middle East, from the disintegration of the Ottoman Empire and the emergence of successor states, to the Arab-Israeli conflict, the oil crisis and Great Power confrontation.

HIST 582 China to 1800 (3)

A survey of traditional Chinese history from earliest times to 1800. Emphasis is on intellectual development against the background of social, political and economic transformations.

HIST 583 Modern China (3)

A study of Chinese history from 1800 to the present, emphasizing the transformation of the Confucian universal empire into a modern national state. The course focuses on the problems of imperialism, nationalism and revolution, the rise of communism, the proletarian Cultural

Revolution and the Four Modernizations in post-Mao China.

HIST 586 Japan to 1800 (3)

A survey of the political, economic, and cultural development of Japan from earliest times to 1800, with emphasis on the borrowing and adaptation of Chinese culture and the development of a unique Japanese civilization.

HIST 587 Modern Japan (3)

A study of modern Japanese history from 1800 to the present, with emphasis on the creation of the modern state, the impact of Western civilization on Japanese culture, Japan's experience with liberalism and militarism and imperialism and the postwar transformation.

HIST 590 Special Topics in U.S. History (3)

Examples include: Turning Points in American History; the Progressive Era; The Social and Cultural Transformation of the 1920s.

HIST 591 Special Topics in European History (3)

Examples include: Georgian Britain; Edwardian Britain; the European Left and Labor.

HIST 592 Special Topics in Asian/African/Latin American History (3)

This course concentrates on an important historical period or topic within one of four principal regions: Latin America and the Caribbean, Asia, Africa or the Middle East.

HIST 593 Special Topics in Peace, War, and Diplomacy (3)

Examples include: World War I; the Vietnam War; Diplomacy of the American Civil War.

HIST 610 Special Topics in U. S. History (3)

Examples include: the Depression and New Deal; Business, Labor, and Economic History; Social and Cultural History, etc.

HIST 620 Special Topics in Lowcountry Studies (3)

An interdisciplinary course organized around a specific topic, such as education, the environment of the Lowcountry, plantation culture, Gullah or the Caribbean origins of the Lowcountry. This

interdisciplinary course will allow a student to explore an area of specific interest.

HIST 630 Special Topics in Peace, War, and Diplomacy (3)

Examples include: The Diplomacy of the American Revolution; Disarmament during the 1920s. This course may be offered as HIST 660 (3) for topics in European history and as HIST 680 (3) for topics in Asian, African or Latin American history.

HIST 640 Special Topics in European History (3)

Examples include: Social and Cultural History; the Scientific Revolution; the Age of Louis XIV.

HIST 650 Special Topics in British History (3)

Examples include: The English Reformation, the English Civil War, the Victorian Age.

HIST 670 Special Topics in Asian/African/Latin American History (3)

A course that concentrates upon an important historical period or topic within one of four principal regions: Latin America and the Caribbean, Asia, Africa, or the Middle East.

HIST 691 Historiography (3)

A core course, it examines various methods of gathering historical data and issues of conceptualization and interpretation. The course thus seeks to develop in students critical awareness and expertise based on familiarity with a variety of historical techniques, methods, and concepts.

HIST 692 Teaching History and Social Sciences (3)

Organization, methods and procedures for teaching history and the social studies in the secondary and middle schools.

HIST 693 Historical Geography (3)

A study of differing economic and social patterns, with emphasis on such fundamental determinants of economic activities as climate, raw materials, locations and the interrelationships of these to each other and to world affairs generally. Construction and use of simplified models and diagrams to illustrate the foregoing are a basic part of the course.

HIST 710 Research Seminar in U.S. History (3)

A topical seminar that focuses on a central historical problem with a major research paper required. Primary sources are utilized whenever possible.

HIST 720 Research Seminar in Low Country Studies (3)

An interdisciplinary seminar designed to acquaint students with the historical methods necessary to successfully pursue a research topic, including an introduction to primary sources.

HIST 740 Research Seminar in European History (3)

A topical seminar that focuses on a central historical problem with a major research paper required.

HIST 760 Research Seminar in Asian/African/Latin American History (3)

A topical seminar that focuses on a central historical problem within one of four principal regions: Latin America and the Caribbean, Asia, Africa or the Middle East. A major research paper is required.

HIST 770 Independent Study in History (3)

Repeatable once.

HIST 801–802 Master's Thesis (6)

Program Mission

To enhance the qualifications and skills of individuals employed in the public sector in the South Carolina Lowcountry, to prepare pre-service students for careers in the public sector and to prepare all students for the roles and responsibilities of the administrator in a democratic society. Our goal is a straightforward one: to provide a comprehensive graduate education in public administration, public sector management, nonprofit administration and arts management. To obtain our goal, we offer a rigorous core curriculum supplemented with the opportunity to take courses in three areas of study: Arts Management, Nonprofit Administration and Metropolitan Public Service Administration.

Program Description

The joint Master of Public Administration degree is conferred by both The Graduate School of the College of Charleston and the University of South Carolina. We are fully accredited by the National Association of the Schools of Public Affairs and Administration (NASPAA). Program faculty includes six professors and, in any given year, three faculty members from the University of South Carolina and several highly qualified adjunct faculty. Program governance and admissions decisions are made jointly by The Graduate School of the College of Charleston and the University of South Carolina.

The M.P.A. program at The Graduate School of the College of Charleston is designed to provide the following:

- A carefully structured core curriculum that focuses on the major components of modern

public management.

- An elective curriculum that allows the student to develop a program of study suited to his/her career goals.
- Opportunities to apply administrative knowledge and skills and gain practical experience in a public or nonprofit agency.
- Opportunities for graduate assistants to learn through participation in various research projects conducted by the Joseph P. Riley Jr. Institute for Urban Affairs and Policy Studies.

Core Curriculum

The program's core curriculum is designed to explore the essential elements of public management and public policy and to prepare students for increasingly complex public responsibilities in local and state government, nonprofit organizations, public/private partnerships and regional and federal agencies. The core curriculum emphasizes both the skills and knowledge required to effectively manage and develop organizational resources and to understand the larger constitutional and political setting in which policy is developed and administrative tasks are defined and assessed.

The core curriculum consists of 21 semester hours of coursework and a three-hour internship:

PUBA 600	Perspectives on Public Administration
PUBA 601	Research and Quantitative Methods for Public Administration
PUBA 602	Public Policy
PUBA 603	Administrative Ethics and Accountability

PUBA 604	Personnel Administration
PUBA 605	Financial Administration
PUBA 701	Capstone Seminar
PUBA 777	Internship (The internship can be waived for students with extensive employment experience in public administration.)

Specialized Study

Elective courses are available in three areas of specialized study:

- Arts Management
- Nonprofit Administration
- Metropolitan Public Service Administration

Opportunities to develop higher levels of skill and specialized study include a thesis project (PUBA 710), directed independent studies (PUBA 710A) and special topics seminars (PUBA 502). In addition, with the permission of the director, courses are often available through other graduate programs on campus and through the Medical University of South Carolina's Health Administration Program and The Citadel's Master of Business Administration Program. Credit earned at The Citadel or the Medical University of South Carolina is not considered transfer credit provided the student registers for the coursework using the cross-registration process. All transfer credits (no more than twelve [12] hours) completed at other institutions must be approved by the director.

Applied Focus

Students are introduced to practical administrative and analytic skills in a variety of ways. The joint program regularly uses adjunct faculty to teach elective courses. These practitioners instruct students in their particular specialty, providing them with a valuable, hands-on perspective useful in supplementing their broader training. In addition, the program fosters contacts with professional mentors. A variety of workshops, training sessions, and speakers are sponsored by the program and by the M.P.A. Student Association. Finally, students gain

practical experience in the internship component of the program by working with practitioners on a daily basis.

Internships

The internship should augment the student's area of study. To satisfy the requirement, students will be required to work no fewer than 300 hours (20 hours per week) for three hours of internship credit. A contract is required between the supervisor, student and program director. The student will be expected to satisfactorily meet the expectations of the agency. To that end, the M.P.A. director will periodically evaluate the student's performance, and consult the on-site internship supervisor. Finally, the student must submit a paper on the duties, responsibilities and experience provided by the internship. Those who are in-service or who have significant experience in public administration may formally request to have the internship requirement waived. Students granted a waiver will take an additional elective course (3 hours) in order to satisfy the hourly requirements for the degree.

Assistantships

Graduate assistantships are available on a competitive basis for full-time students. Individuals receiving assistantships must enroll in nine hours of coursework per semester. Research assistants work up to 20 hours a week on various institute projects or may be assigned to individual faculty for research assistance. A variety of assistantships are available with the M.P.A. Program, the Arts Management Program, the Riley Institute for Urban Affairs and Policy Studies, the Graduate School and other places on campus. Full-time M.P.A. students with assistantships have the opportunity to participate in projects conducted by the Riley Institute for Urban Affairs and Policy Studies. Institute projects range from technical assistance to local governments to major research initiatives.

Application Procedures and Admission Requirements

Students from diverse undergraduate backgrounds are strongly encouraged to apply. In certain cases, students with no prior training in the social and behavior sciences may be required to enroll in undergraduate courses to properly prepare themselves for graduate study in the M.P.A. program.

Procedures

Students may apply to the M.P.A. program at any time during the year. Applications must be completed at least six weeks prior to the starting date of the next semester for enrollment for that semester. All materials, including application forms, transcripts, letters of recommendation and supporting documentation, should be mailed to:

College of Charleston
Graduate School Office
Randolph Hall, Suite 310
Charleston, SC 29424-0001

Application Requirements for Degree-Seeking Students:

- Submit a completed application form along with a non-refundable application fee of \$45 (\$35 online).
- Submit a letter of intent stating the applicant's reasons for applying to the program, areas of interest, and career objectives.
- Submit an official transcript from the applicant's undergraduate college or university. Students who have attended more than one undergraduate institution may be required to submit official transcripts from those schools.
- Submit three letters of recommendation from persons familiar with the applicant's academic record. References should address the student's academic ability and motivation to successfully complete a graduate degree.
- Submit official copy of test scores from the Graduate Record Examination (GRE).*
- Submit optional materials, such as undergraduate theses or term papers, samples

of work projects, etc.

**Students are not required to take an advanced (subject area) test on the GRE.*

Minimum Admission Requirements for Degree-Seeking Students

Degree-seeking students are expected to have:

- Minimum grade point average of 3.0 (on a 4.0 scale)
- Graduate Record Examination (GRE) A combined score in excess of 1000 on the Quantitative and Verbal sections is required. While no specific minimum score on the writing assessment section is required, performance on the writing assessment section will be used as a factor in admissions.
- Training in basic statistics. Otherwise, students may be required to take a basic statistics course prior to enrolling in Research and Quantitative Analysis for Public Administration.

NOTE: The admissions committee will carefully consider both GPA and GRE scores, as well as letters of recommendation and significant life experiences, particularly in public administration.

NOTE: International students must also fulfill the requirements listed elsewhere in the Graduate Catalog.

Requirements for Non-degree students

Occasionally, students may desire to take courses in the M.P.A. program but not pursue the degree. These students are welcome to enroll in M.P.A. courses on a space-available basis as professional development students. Those seeking to enroll as professional development students must:

- Submit a completed application form along with a nonrefundable application fee of \$45 (\$35 online).
- Provide verification of successful completion of an undergraduate degree with at least a 2.5 GPA.

- Receive the written permission of the director.

NOTE: Students wishing to take courses while fulfilling admission criteria (for example, waiting to take the GRE) are restricted to six hours of enrollment prior to admission.

Plan of Study

After being admitted, new students should meet with the M.P.A. director to outline a tentative plan of study. Initially, the M.P.A. director acts as the student's advisor. After they become familiar with the M.P.A. faculty, students may wish to choose an advisor with a specialization in their area of professional interest. In the initial meeting with the M.P.A. director, a plan of study is developed based on the student's background, interest, training, experience and career objectives. These factors play a significant role in the elective courses chosen and eventual internship placement. Students should begin exploring internship opportunities early in their program of study and contact the internship coordinator. The initial plan of study will be reviewed as necessary on a semester-by-semester basis during the student's enrollment in the M.P.A. program. Before registering each semester, students should carefully select appropriate courses in order to fulfill degree requirements. The M.P.A. program provides the flexibility for students to develop a focus in a variety of areas through careful selection of elective courses and internship arrangements.

Degree Requirements

The M.P.A. is a professional degree requiring:

- 39 semester hours, including the following:
 - a. 21 hours of core courses.
 - b. 15 hours of electives (18 if the internship requirement is waived for previous experience).
 - c. A three-hour credit internship. Internships are graded on a satisfactory/unsatisfactory basis.
- A minimum grade point average of 3.0.

Course Descriptions

Core Courses

PUBA 600 Perspectives on Public Administration (3)

This course studies the practice of public administration in the United States in the 21st century. This course also examines the historical development of the field of public administration and current approaches to the study and practice of public administration.

PUBA 601 Research and Quantitative Methods for Public Administration (3)

This course examines the various aspects of locating, collecting and processing primary and secondary data utilized by public administrators and policy analysts. It includes design of original surveys, library and archive searches, problems of storage and retrieval and statistical description.

PUBA 602 Public Policy (3)

This course examines the activities of individuals, groups, and institutions that define or ignore public problems, participate or fail to participate in political struggles over these problems and confront or avoid opportunities to develop and implement solutions. The implications of these complexities for public employees and public management are emphasized.

PUBA 603 Administrative Ethics and Accountability (3)

A critical examination of the legal, political, professional and organizational accountability demands made on administrators and their relationship to ethical decision making and ethical integrity.

PUBA 604 Personnel Administration (3)

This course examines organization, techniques, and theories of personnel management; interpersonal relations in organizations; personnel change and development; changing conditions in the public service-educational specializations, unions, collective bargaining, and ethics.

PUBA 605 Financial Administration (3)

This course examines the organization and techniques of governmental financial management, budgetary theories and intergovernmental financial relations.

PUBA 701 Capstone Seminar (3)

The capstone seminar is designed to be a culminating experience that helps the student integrate knowledge and skills acquired throughout the program. Students engage in applied research.

Prerequisite: Completion of all M.P.A. core courses and at least 30 semester hours or permission of the instructor or M.P.A. director.

PUBA 777 Internship (3)

A supervised field experience in which the student observes and participates in the functioning of a public sector or other nonprofit organization for at least 15 weeks.

Prerequisite: At least 15 credits earned in the M.P.A. program. Permission of the M.P.A. director required. Graded on a satisfactory/unsatisfactory basis.

Arts Management

PUBA 502 Special Topics: Legal Aspects of Non-Profits (3)

This class provides an in-depth analysis of the legal status of nonprofit organizations and explores legal issues as they arise in operations and governance, solicitation of funds and tax law.

PUBA 502 Special Topics: Fundraising and Marketing for Non-Profits (3)

This course examines the many fundraising techniques that generate financial support for non-profits from foundations, corporations and individuals; proposal writing and presentation; long-range development; and special event fundraising are examined.

PUBA 502 Special Topics: Finance and Accounting for Non-Profits (3)

This class is designed to provide practical knowledge and techniques for financial management and accounting in non-profit organizations. These techniques are understood

in the context of planning, goal setting and the role of the executive director and the board.

PUBA 640 Leadership and Decision Making (3)

This course examines leadership and decision making by identifying the environment of decision making, the techniques and characteristics of leadership styles and decision-making approaches.

PUBA 650 Essential Elements of Non-Profit Administration (3)

This course orients students to the history, values and issues of the third sector in American society; and to the leadership and management challenges peculiar to the administration of non-profit organizations. The latter includes board relations, fundraising, program advocacy and lobbying, legal frameworks, human resource management in volunteer settings, financial management and grants administration.

Prerequisite: Completion of one semester in the M.P.A. program preferred.

PUBA 654 Human Resource Management for Non-Profit Organizations (3)

This course examines the human resource development issues for non-profit organizations. Personnel play a vital role in the non-profit sector. Distinctively, this sector is dependent not only upon a core group of salaried employees, but upon a voluminous network of volunteers. There are specific issues including training, development and leadership, which take on unique characteristics in the nonprofit sector. The course will center on the executive director's role in the success of shaping, managing and leading the organization.

PUBA 660 Contemporary Perspectives on Arts Management (3)

This course will focus on the role of non-profit arts and cultural institutions, and the artists and managers who lead them. By examining the rapid changes occurring in the performing and visual arts management field, as well as the humanities, and analyzing the impact of these changes within the public domain, the course

seeks to encourage interested students to pursue careers in this dynamic profession.

PUBA 661 Advanced Arts Management (3)

This course will involve students in the examination, analysis and involvement in applied experiences with non-profit arts and cultural organizations. Students will produce case studies in a variety of topical areas in arts administration that examine the resources, leadership, collaboration, skills, critical issues and practices of managers of select non-profit arts and cultural organizations in Charleston and the tri-county region.

PUBA 662 Cultural Administration and Applied Research at the Avery (3)

This course is the first course of its kind that uses the Avery Research Center for African American History and Culture as a laboratory to expose students to what the Center does to serve the needs of a diverse market and constituency base. Through practical and service learning experiences, students will examine issues germane to public administration and education, arts administration and cultural management.

PUBA 663 Arts and Technology (3)

Artists have always experimented with emerging technologies, but in recent decades, the field of Arts & Technology has emerged as a dynamic and historically significant artistic practice. Discover the opportunities new technologies offer to arts managers, initiatives at the convergence of art and technology and the impact of technology and the arts on culture. Examine and conceptualize the themes of new media, sound art, moving images, the media artist, cyber culture and intellectual property issues.

PUBA 664 Arts Education (3)

This course will examine current trends in arts education. Dealing primarily from an administrative viewpoint, the course will focus on government funding (local, state and national), arts education organizations, specific pilot programs and individual teaching situations. Although developed initially for the administrator,

the course should prove equally valuable to the educator.

Metropolitan Area Public Service Administration

PUBA 502 Special Topics: Program Evaluation (3)

This course provides an introduction to both qualitative and quantitative methods of evaluating public programs. The emphasis is on building skills in research design, data collection, methods of analysis and communication of findings. Special attention is paid to assessing the strength and weakness of alternative research designs, developing strategies for data collection, communicating research findings to diverse audiences and selecting evaluation strategies that are practical in light of real world constraints on resources and time.

PUBA 512 Females/Minorities in Public Administration (3)

This course explores the historical and legal foundations for equal opportunity in employment and education. The social and political aspects of class/gender stratification are discussed. The concepts of equal opportunity, affirmative action, cultural diversity and harassment are addressed.

PUBA 611 Urban Policy (3)

The history of American urban policy is surveyed, with special emphasis on national urban policy. It is designed to develop an understanding of the nature of U.S. urban policy, its relation to urban policy in other countries and of the forces which have structured urban growth.

PUBA 620 Local Government Politics and Administration (3)

This course examines the role of local government administrators as leaders and service providers. The course explores an understanding of local political environments and develops an understanding of what they mean in terms of democratic institutions and theory.

PUBA 622 Intergovernmental Relations (3)

This course provides an understanding of the nature and dynamics of the American federal system of government: the functions, powers and

service delivery capacities of county, municipal and special purpose district governments, the creation of new jurisdictions, the reciprocal influences of local, state, and federal bureaucracies, the grant-in-aid system and revenue sharing among different units of government. A special emphasis is placed on the complex nature of state-local and inter-local relations in an urban setting.

PUBA 623 South Carolina Government and Policy (3)

This course will allow those students who intend to pursue administrative careers (either local government or state government) in South Carolina to become familiar with the state's political and policy processes.

PUBA 631 Administrative Law (3)

This course studies the legislative, adjudicatory and general policy-making powers of administrative agencies and regulatory commissions, and the scope of judicial review of administrative action. The course is directed primarily toward an analysis of the political nature of bureaucracy, and secondarily toward the procedural requirements for administrative policy-making.

PUBA 632 Environmental Politics (3)

This course is intended to provide students with a broad understanding of environmental politics in the United States. It examines the emergence of environmentalism, its social bases, its political impact and its political influence.

PUBA 633 Urban Planning (3)

This course provides a critical evaluation of the field of planning. The class focuses on the origins and evolution of the discipline, tools of planning practice, and the interrelated planning elements of economic development, social justice and environmental protection.

PUBA 634 Environmental Law and Regulatory Policy (3)

This course examines the development of environmental law and regulatory policy in the United States. It provides an overview of the scope and substance of environmental law and the various regulatory techniques they employ.

Both criminal and civil litigation surrounding the implementation of environmental law are examined.

PUBA 635 Land Use Law (3)

This course examines zoning and land use control in the United States and incorporates illustrations and cases from South Carolina in particular. It focuses on enabling legislation for local governments, regulation, the process of development, eminent domain, contract and conditional zoning and enforcement and violation of land use regulations.

PUBA 636 Coastal Resource Management (3)

This course examines the complex issues that are confronting policymakers, citizens and scientists in the coastal zone. Specifically, it explores our scientific understanding of the coastal ecosystems; the degree to which the United States economy is based on the development of these systems; the nature of human activities and impacts; and the political, economic and cultural components of our decision-making processes.

PUBA 637 Wetlands Protection (3)

This course is intended to provide the student with a broad understanding of the social origins, philosophies, and political, economic and cultural impacts of wetlands protection in the United States. Topics address the goals of and policymakers' approaches to wetlands protection.

PUBA 640 Leadership and Decision Making (3)

This course examines leadership and decision making by identifying the environment of decision making, the techniques and characteristics of leadership styles and decision-making approaches.

PUBA 706 Economic Theory for Policy Analysis (3)

This course develops and applies microeconomic models and theories to the analysis of contemporary public sector issues. Attention is given to the conceptual and practical problems associated with resource allocation decisions

given conflicts between efficiency and equity and limited information.

PUBA 712 Organizational Behavior (3)

This course is a survey of theories of organizational behavior from the classical to systems perspectives. The objective is to provide a conceptual framework for the understanding and study of organizational behavior and human behavior in organizations. Topics include formal and informal structure, motivation, organizational environments, decision making, leadership, organizational change and development.

PUBA 720 The Practice of Public Administration (3)

The world of the practicing manager is complex. Making decisions with often severe limits on resources and time means that managers must consider various aspects of management – personnel, legal accountability, resource management and ethics – in rapidly changing contexts. This seminar addresses these complexities by exploring particular cases in depth.

Prerequisite: Completion of 15 hours of core courses or permission of the instructor.

PUBA 722 Information Systems and Public Administration (3)

This course examines the development and uses of information systems in local, state and federal administrative agencies with emphasis on the management of information systems in the public agency environment; the problems of interagency and intergovernmental relations; the politics of technological innovation; privacy, confidentiality, security and information policy; and the role of information technology in democratic government.

PUBA 723 Contemporary Administrative Organizations (3)

This course examines the problems, processes, and theories of communication, decision making, agency planning and control in administrative agencies.

PUBA 730 Politics and the Budgetary Process (3)

This course analyzes the political, economic, and social influences on the budgetary process.

Nonprofit Administration

PUBA 502 Special Topics: Legal Aspects of Non-Profits (3)

This class provides an in-depth analysis of the legal status of nonprofit organizations and explores legal issues as they arise in operations and governance, solicitation of funds and tax law.

PUBA 502 Special Topics: Fundraising and Marketing for Non-Profits (3)

This course examines the many fundraising techniques that generate financial support for non-profits from foundations, corporations and individuals; proposal writing and presentation; long-range development, and special event fundraising are examined.

PUBA 502 Special Topics: Finance and Accounting for Non-Profits (3)

This class is designed to provide practical knowledge and techniques for financial management and accounting in non-profit organizations. These techniques are understood in the context of planning, goal setting and the role of the executive director and the board.

PUBA 611 Urban Policy (3)

The history of American urban policy is surveyed, with special emphasis on national urban policy. It is designed to develop an understanding of the nature of U.S. urban policy, its relation to urban policy in other countries, and of the forces which have structured urban growth.

PUBA 620 Local Government Politics and Administration (3)

This course examines the role of local government administrators as leaders and service providers. The course explores an understanding of local political environments and develops an understanding of what they mean in terms of democratic institutions and theory.

PUBA 622 Intergovernmental Relations (3)

This course provides an understanding of the nature and dynamics of the American federal system of government: the functions, powers and service delivery capacities of county, municipal, and special purpose district governments, the creation of new jurisdictions, the reciprocal influences of local, state, and federal bureaucracies, the grant-in-aid system and revenue sharing among different units of government. A special emphasis is placed on the complex nature of state-local and inter-local relations in an urban setting.

PUBA 631 Administrative Law (3)

This course studies the legislative, adjudicatory and general policy-making powers of administrative agencies and regulatory commissions, and the scope of judicial review of administrative action. The course is directed primarily toward an analysis of the political nature of bureaucracy, and secondarily toward the procedural requirements for administrative policy-making.

PUBA 640 Leadership and Decision Making (3)

This course examines leadership and decision making by identifying the environment of decision making, the techniques and characteristics of leadership styles and decision-making approaches.

PUBA 650 Essential Elements of Non-Profit Administration (3)

This course orients students to the history, values, and issues of the third sector in American society; and to the leadership and management challenges peculiar to the administration of non-profit organizations. The latter includes board relations, fundraising, program advocacy and lobbying, legal frameworks, human resource management in volunteer settings, financial management and grants administration.

Prerequisite: Completion of one semester in the M.P.A. program preferred.

PUBA 654 Human Resource Management for Non-Profit Organizations (3)

This course examines the human resource development issues for non-profit organizations. Personnel play a vital role in the non-profit sector. Distinctively, this sector is dependent not only upon a core group of salaried employees, but upon a voluminous network of volunteers. There are specific issues including training, development, and leadership, which take on unique characteristics in the non-profit sector. The course will center on the executive director's role in the success of shaping, managing and leading the organization.

Graduate Certificate in Arts Management

Scott Shanklin-Peterson
Program Director
843-953-8241
Petersons@cofc.edu

Program Description

The Graduate Certificate Program in Arts Management serves professionals currently working in arts management or related fields who desire to expand their knowledge and skills, but may not be able to enter a full graduate program. The program offers courses currently available in the Masters of Public Administration Program with an emphasis on preparing arts managers to meet the ever-changing challenges placed on non-profit cultural institutions.

Minimum Admission Requirements

The admission* and enrollment policy for the Graduate Certificate in Arts Management requires the following:

- Baccalaureate Degree
- Undergraduate Grade Point Average of 3.0 or better
- Writing sample demonstrating an ability to perform literary analysis and conduct research and/or a portfolio of arts management related work samples.

- Letter of intent stating the applicant's reasons for applying to the program, areas of interest and career objectives.
- Application to the Graduate School as an "Arts Management Certificate" Graduate Student
*Admission to the certificate program does not entail any admission to other masters programs at the College of Charleston.

Program Requirements

The Graduate Certificate Program in Arts Management requires a minimum of twelve (12) hours of graduate coursework selected from the following courses, including at least two (2) required classes and at least two (2) certificate electives.

Required Classes:

- PUBA 660 Contemporary Perspectives on Arts Management (3)
PUBA 661 Advanced Arts Management (3)
Electives:
PUBA 502 Special Topics: Fundraising and Marketing (3)
PUBA 662 Cultural Administrations and Applied Research at Avery (3)
PUBA 663 Technology and the Arts (3)
PUBA 664 Arts Education (3)
PUBA 710 Independent Research (3)

Course Descriptions

PUBA 502: Special Topics: Fundraising and Marketing for Non-Profits (3)

This course examines the many fundraising techniques that generate financial support for non-profits from foundations, corporations, and individuals; proposal writing and presentation; long-range development, and special event fundraising are examined.

PUBA 660: Contemporary Perspectives on Arts Management (3)

This course will focus on the role of non-profit arts and cultural institutions, and the artists and managers that lead them. By examining the rapid changes occurring in the performing and visual arts management field, as well as the humanities, and analyzing the impact of these changes within

the public domain, the course also seeks to encourage interested students to pursue careers in this dynamic profession.

PUBA 661: Advanced Arts Management (3)

This course will involve students in the examination, analysis and involvement in applied experiences with non-profit arts and cultural organizations. Students will produce case studies in a variety of topical areas in arts administration that examine the resources, leadership, collaboration, skills, critical issues and practices of managers of select non-profit arts and cultural organizations in Charleston and the Tri-County region.

PUBA 662: Cultural Administration and Applied Research at the Avery (3)

This course is the first course of its kind that uses the Avery Research Center for African American History and Culture as a laboratory to expose the students to what the Center does to serve the needs of a diverse market and constituency base. Through practical and service learning experiences, students will examine issues germane to public administration and education, arts administration, and cultural management.

PUBA 663: Arts and Technology (3)

Artists have always experimented with emerging technologies, but in recent decades the field of Arts & Technology has emerged as a dynamic and historically significant artistic practice. Discover the opportunities new technologies offer to arts managers; initiatives at the convergence of art and technology and the impact of technology and the arts on culture. Examine and conceptualize the themes of new media, sound art, moving images, the media artist, cyber culture and intellectual property issues.

PUBA 664: Arts Education (3)

This course will examine current trends in arts education. Dealing primarily from an administrative viewpoint, the course will focus on government funding (local, state, and national), arts education organizations, specific pilot programs, and individual teaching situations.

Although developed initially for the administrator, the course should prove equally valuable to the educator.

**PUBA 710: Independent Research
(maximum of 3)**

Sample Curricula

The following sequence represents the required courses and certificate electives of the Arts Management Certificate Program. Accepted students are expected to take two required classes and at least two certificate electives to complete the certificate program. The program may be completed in two year or less depending upon availability of courses. A sample two-year sequence follows:

Fall 2007

PUBA 660: Contemporary Perspectives on
Arts Management (3)

Spring 2008

PUBA 661: Advanced Arts Management (3)

Fall 2008/Spring 2009

Electives chosen from two or more of the
following:

PUBA 502: Special Topics: Fundraising and
Marketing (3)

PUBA 663: Technology and the Arts (3)

PUBA 662: Cultural Administration and
Applied Research at Avery (3)

PUBA 664: Arts Education (3)

PUBA 710: Independent Research (3)

SCHOOL OF LANGUAGES, CULTURES, AND WORLD AFFAIRS

DEGREES OFFERED:

Master of Arts in Bilingual Legal Interpreting

Certificate in Bilingual Legal Interpreting

Certificate in Medical and Health Care Interpreting

MASTER OF ARTS IN BILINGUAL LEGAL INTERPRETING

www.cofc.edu/%7Elegalint/

Hispanic Studies

843-953-7619

Virginia Benmaman,
Program Director

benmamanv@cofc.edu; 843-953-5718

The Profession

A recent census update has reported that 1 of every 7 persons in the United States is Hispanic, a record number of nearly 45 million persons. Currently, Hispanics are recognized as the largest minority in the country, comprising approximately 14% of the total population. Nearly every state is experiencing the effects of this increase, especially in legal settings. Federal, state and municipal courts throughout the nation are facing a severe shortage of qualified interpreters. Legal interpreters are also in high demand in all areas of law enforcement, administrative hearings and community service agencies. Additionally, attorneys regularly seek qualified interpreters to assist them in communicating effectively with Hispanic clients of limited English proficiency. In light of current and future needs for professionally trained interpreters, employment opportunities for individuals with these unique skills will continue to flourish during this and future decades.

Program Description

The master of arts in bilingual legal interpreting for English-Spanish prepares

students for careers in legal interpreting at the highest skill level, court interpreting. The program is a comprehensive, sequenced and integrated series of courses designed to provide the student with the competencies, techniques and research skills required of a professional legal interpreter. The curriculum consists of 13 courses (39 credits). The courses are scheduled during the fall and spring semesters, Maymester (3 weeks) and two four-week summer sessions. The final fall semester is reserved for the internship. The internship is conducted in a court system that has an established office of staff interpreters.

Interpreting Center

Classes will take place in a state-of-the-art interpreting facility furnished with soundproof booths, interpreting equipment and video and audio capabilities. The facility design, advanced digital technology and training materials offer students optimum conditions for developing their interpreting skills.

Minimum Admission Requirements

- A baccalaureate degree from an accredited institution of higher education with at least six courses completed in the language (English or Spanish) that is not the official language of the institution awarding the degree. Superior proficiency in English and Spanish; living experience in a Hispanic country preferred. Prior interpreting experience preferred, but not required.

- A cumulative minimum score of 1000 on the verbal and either quantitative or analytical portions of the Graduate Record Examination (GRE) general test preferred, if the candidate has taken the test prior to October 2002. For those taking the GRE in October 2002 and thereafter, a combined score of 1000 on the verbal and quantitative sections and a score in the range of 3–6 on the writing assessment section of the test are preferred.
- Successful completion of the General Test of Interpreting Aptitude. This examination is administered by the program and may be taken one time only each year.

NOTE: While candidates who meet the criteria mentioned in the requirement above will be given preference, candidates who have not completed six courses in their second language, but have comparable language experience in other settings, may be considered. Proof of their second language competency must be provided.

Admission Procedures

Degree Students

- Submit a completed application form together with a \$ 150 processing fee.
- Submit an official copy of a transcript from each institution of higher learning attended, including documentation of graduation from an accredited four-year college or university. The transcript should be sent directly from the institutions attended to The Graduate School of the College of Charleston.
- Submit an official copy of scores from the general test of the Graduate Record

Examination. The test must have been taken during the past five years.

- Complete the General Test of Interpreting Aptitude. Applicants may take this examination by appointment at the Interpreting Center on the campus of the College of Charleston. Applicants who prefer to take this examination in their home state must make the necessary arrangements for an individual to proctor the administration of the examination. That individual must be affiliated with an official institution.
- A section of the application form provides space for including relevant information. The processing fee of \$150 must be received prior to taking the examination.
- Submit a one-page statement about educational goals and interest in pursuing a Master of Arts degree in bilingual legal interpreting.
- Submit two letters of recommendation.

Non-degree Students

Students who do not plan to complete a degree may be admitted to the program provided space is available. However, applicants must successfully complete the same admission requirements listed above for degree-seeking students.

Application Deadline

April 15, 2008 – Results of the GRE and the General Test of Interpreting Aptitude should be received by the Graduate School Office by this date. Applicants must allow sufficient time for administering and processing the interpreting aptitude examination.

Components of the Program

The courses have been sequenced in a lock-step fashion in order to provide a comprehensive and intensive schedule that will allow students to complete the Master of Arts degree in one and one-half years.

Fall, 2007	4 courses
Fundamentals of Interpreting	INTR 515
Fundamentals of Translation	INTR 503

Legal Processes and Procedures	INTR 502
Practicum	INTR 625

(This course will be taken during fall and spring semesters)

Spring, 2008	3 courses
Consecutive 1	INTR 615
Language and Culture or Spanish in the U.S.	INTR 510
INTR 511	
Law and the Legal System of the U.S.	INTR 602
Practicum	INTR 625

(This course is a continuation of the fall semester)

Maymester, 2008	1 course

Summer, 2008	
Summer Session 1	2 courses
Consecutive II	INTR 616
Simultaneous I	INTR 626
Summer Session 2	2 courses
Sight translation	INTR 604
Simultaneous II	INTR 627

Fall, 2008	1 course
Internship	INTR 725

Total credits: 39

Graduation Requirements

The master of arts in bilingual legal interpreting is conferred upon those candidates who successfully complete the program of study with a minimum cumulative GPA of 3.0, and successfully complete one of the following: 1) a professional certification examination administered either by a state or federal court system or a recognized professional organization or 2) a written and oral comprehensive examination administered by the graduate program. Students who have been certified as stated in option #1 prior to entering the program may take the comprehensive examination upon completing the program of study or undertake a special research project. Students who do not pass the exit requirement may retake the examination at a subsequent time.

Graduate Certificate in Bilingual Legal Interpreting Description

The certificate program is comprised of existing courses within the present Master's program that will offer students with diverse backgrounds and experience the opportunity to acquire the foundational skills in legal interpreting in an abbreviated time frame.

This program is especially valuable for students who are enrolled in other language oriented graduate programs, translators and individuals who wish to learn about the profession in general and acquire some of the needed skills. Students enroll in four courses regularly offered during Maymester, Summer 1 and Summer 2 sessions

Minimum Admission Requirements

- Baccalaureate degree from an accredited institution of higher education and/or concurrent enrollment in a related graduate field.
- Demonstrated proficiency in both English and Spanish to be determined by successful completion of the General Test of Interpreting Aptitude. This examination is administered by the program and may be taken one time only each year.
- The GRE is not required.

Admission Procedures and Deadline

- Submit a completed application form together with a nonrefundable application together a fee of \$150
- Submit a one-page statement about educational goals and interest in a graduate certificate in bilingual legal interpreting.
- Submit an official copy of a transcript from each institute of higher education attended, including documentation of graduation from an accredited four-year college or university, or a copy of an official transcript from the

graduate institution in which the student is currently enrolled.

- Complete the General Test of Interpreting Aptitude, to be administered at The Graduate School of the College of Charleston, or at another approved site.

Application deadline for the certificate program is April 30, 2008.

Program Schedule: One full summer

One Maymester and two Summer sessions on the College of Charleston campus.

Courses

Maymester, 2008	1 course
Legal language	INTR 606
Summer, 2008	
Summer Session I	2 courses
Consecutive Interpreting II	INTR 616
Simultaneous Interpreting I	INTR 626
Summer Session 2	1 course
Sight Translation	INTR 604

- Students must maintain a Grade Point Average of 3.0 (B) in order to receive the certificate.
- Admission to the certificate program does not pertain to any admission or other criteria regarding the Master of Arts Program in Bilingual legal Interpreting

Course Descriptions

INTR 502 Legal Processes and Procedures (3)

A study of the trial process common to all American courts from initial court appearance of the defendant to disposition of the case, with emphasis on criminal procedures and terminology.

INTR 503 Fundamentals of Translation (3)

Analysis of source texts: units of meaning, context and situation. Introduction to types of translation equivalence. Translation exercises using general texts.

INTR 505 Interlingual Communication (3)

Presentation of the various factors involved in communication and of the similarities and differences between oral and written communication. Introduction to translation and interpretation as a process of interlingual communication. Analysis of source text: units of meaning, context, situation. Analysis of problems involved in interlingual communication. Development of skills required for interlingual communication.

INTR 510 Language and Culture (3)

Analysis of the interrelation between language and culture. Study of the salient features of American culture and comparison of these features with those of other pertinent cultures. Examination of means of communicating features alien to a given culture in the language of that culture.

INTR 511 Spanish in the United States (3)

A sociolinguistic study of the dialects of Spanish spoken in the United States. Topics include the history of Spanish-language presence in this country, bilingualism and diglossia; code; language maintenance and shift; and contemporary language policy issues related to legal interpreting, bilingual education and English Only movements.

NOTE: Students may select either INTR 510 or INTR 511 to fulfill the program requirement, but not both.

INTR 515 Fundamentals of Interpreting (3)

Presentation of interpretation and of different modes of interpretation used in the courtroom. Presentation of characteristics of professional work, interpreter ethics, professional organizations and professional development activities. Activities designed to develop oral/aural skills, memory, basic note-taking techniques, public speaking and language-switching skills.

INTR 530 Special Topics in Interpreting (1–3)

Special studies related to interpreting designed to supplement regular course offerings of the Bilingual Legal Interpreting programs. No more

than 3 credits may be taken during an academic semester or equivalent. Prerequisite: Permission of the program director.

INTR 590 Independent Study (1–3)

Individual study of a given topic following a syllabus of readings, papers, and other requirements prescribed by the faculty member. No more than six credits of independent study may be taken during the program of graduate study. Prerequisite: Permission of the program director.

INTR 602 Law and the Legal System of the United States (3)

Study of the hierarchy of the courts, the legal process, and the divisions of the law. Presentation of civil procedures, family and juvenile law and exploration of several other areas of substantive law.

INTR 603 Advanced Written Translation (3)

Further development of translation techniques and application of these techniques to different types of legal/judicial documents. Use of documentation and terminology research methods of problem solving.

INTR 604 Sight Translation (3)

Acquisition of the skills required to orally translate a written text with little or no prior preparation. Practice of sight translation from Spanish to English and from English to Spanish using both general texts and legal texts.

INTR 606 Legal Language (3)

Introduction to the characteristics of legal English: its terminology, its linguistic structures, and its social and psychological functions. Presentation of methods of legal documentation and terminology research, introduction to the use of a law library, case law, statutory law, legal dictionaries and other sources. Application of the tools and methods to the creation of legal terminology records.

INTR 615 Consecutive Interpreting I (3)

Role of consecutive interpreting in the courtroom. Practice in "short" consecutive interpretation using court transcripts. Use of basic note-taking

for accuracy. Bilingual terminology research related to transcripts interpreted.

INTR 616 Consecutive Interpreting II (3)

Practice in interpreting consecutively increasingly longer spans of speech, using more elaborate note-taking. Use of court transcripts, depositions and other legal documents. Preparation for interpretation in various legal settings.

INTR 625 Practicum in Legal Settings (3)

Observation and analysis of various monolingual and interpreted court proceedings including trials (60 hours). Discussion of interpreting problems with various court staff. Submission of reports based on questionnaires for all observations and discussions. Graded on a pass/fail basis.

Prerequisite: INTR 502.

INTR 626 Simultaneous Interpreting (3)

Role of simultaneous interpreting in the courtroom. Practice in simultaneous interpreting using the direct examination and cross-examination sections of court transcripts. Use of basic note-taking for accuracy.

INTR 627 Simultaneous Interpreting II (3)

Practice in simultaneous interpreting using opening statements, expert testimony, closing statements, and jury instructions taken from the appropriate sections of court transcripts. Preparation for simultaneous interpreting in the courts.

INTR 725 Internship in Legal Interpreting

Ten weeks of legal interpreting with a minimum of 300 contact hours of attendance and participation in a legal setting at which interpreter services are employed. Setting must be approved by the internship advisor. Submission of analytical reports of the internship experience by both the student and designated individual in the given legal setting are required. Graded on a pass/fail basis.

Graduate Certificate in Medical and Healthcare Interpreting

<http://lcwa.cofc.edu/medicalint/>

Elizabeth A. Martínez-Gibson

Program Director

martineze@cofc.edu; 843-953-8066

Program Description

Unique in the Southeast, this program was designed to meet the changing needs for English-Spanish medical and health care interpreters as a result of the growing trend of Hispanic immigration to the United States. The certificate program is specially designed for individuals with strong language skills interested in the healthcare profession, professional translators/interpreters, and college graduates interested in developing basic interpreting skills. A state-of-the-art interpreting facility furnished with soundproof booths, new interpreting equipment, and video and audio capabilities will provide students optimum conditions for developing their interpreting skills.

Minimum Admission Requirements

- Official transcripts from all previously attended colleges and universities.
- One page statement about educational goals and interest in a graduate degree in bilingual medical & health care interpreting
- Complete the General Test of Interpreting Aptitude. Please contact the Program Director to make an appointment (martineze@cofc.edu)
- Submit completed application with fee of \$50 + \$100 Interpreting Exam fee before April 15

Course Descriptions

Courses must be taken sequentially. The curriculum consists of two evening express courses taught in the Fall and two evening express courses in the Spring.

INTR 514: The Fundamentals of Medical Interpreting (3)

Presentation of the fundamental skills and information of medical interpreting. Students will study the differences between interpreting and translating; tools for modes of health care interpreting; techniques for the different modes of interpreting; the dilemmas of interpreting; and interpreting ethics for the healthcare setting.

INTR 601: Written and Sight Translation in Health Care (3)

Development of skills for written and sight translation in health care settings. Students will work bi-directionally (English « » Spanish) on a variety of text types commonly encountered in the health care interpreter profession. Translation issues specific to such documents will be emphasized. *Prerequisite:* INTR 514: Fundamentals of Medical Interpreting.

INTR 607: Languages and Cultures of Health Care (3)

Introduction to the characteristics of the languages used in medical settings when English-speaking health care providers and Spanish-speaking patients interact, and to familiarize students with the cultural dimensions of health and illness, so they can accurately interpret during these encounters. *Prerequisite:* INTR 514: Fundamentals of Medical Interpreting.

INTR 613: Consecutive Interpreting in Health Care (3)

Practice in consecutive interpretation for the medical/health care setting. Special emphasis is placed on memorization, listening, concentration and note-taking skills. Practice covers different types of medical and health care cases and encounters with various levels of linguistic complexity. *Prerequisites:* INTR 514, INTR 601 and INTR 607. (Additional Lab fee.)

SCHOOL OF SCIENCES AND MATHEMATICS

DEGREES OFFERED:

Master of Science in Computer and Information Science

Master of Science in Marine Biology

Master of Science in Mathematics

Graduate Certificate in Statistics

MASTER OF SCIENCE IN COMPUTER AND INFORMATION SCIENCES

www.cs.cofc.edu

Department of Computer Science

843-953-6905

Christopher W. Starr, Chair

**Paul A. Buhler, Program
Director**

buhlerp@cofc.edu; 843-953-7146

Program Description

The Graduate School of the College of Charleston and The Citadel offer a joint graduate program leading to a master of science in computer and information sciences. The program is designed to serve a growing professional work force in computer science, information technology and software engineering in the Lowcountry of South Carolina.

The 33-credit-hour program offers three areas of specialization: computer science, information systems and software engineering.

Courses are taught in the evenings or late afternoons, accommodating the schedules of most professional students. Courses are offered on both campuses, usually on alternating days, permitting full-time students to schedule up to four courses (12 credit hours) in a semester.

Thesis Options

Students may complete the degree in one of three ways for any of the three specialization areas.

1. Non-thesis option: A student must complete

33 credit hours of graduate coursework.

2. Project thesis option: A student must complete 30 hours of graduate coursework and a project thesis. This option is characterized by a research project that applies or extends course topics through systems development. The project may be associated with a current work-related problem. External documentation will accompany the project. Students electing this option will need to register for CSIS 698 during the semester in which the research begins.
3. Research thesis option: A student must complete 27 hours of coursework and a research thesis. The thesis option is a traditional research project characterized by a comprehensive paper on a research topic. Students selecting this option will register for CSIS 699, which is a six-credit-hour course that extends over two semesters.

NOTES:

1. *All options for degree completion requirements are constrained by elapsed time and GPA requirements for graduation.*
2. *For any thesis or project thesis with a duration that extends into additional semesters, including the summer, students are required to register for additional research hours. Research hours do not satisfy elective credit hours.*
3. *Both the thesis option and the project thesis option require a proposal for project approval. Proposals are submitted to the program director for approval by the program director and the thesis advisor.*

Program Duration

A typical professional student might take two courses per semester during the fall and spring terms and one course during the summer. Such a schedule would put the student on track to graduate in two and a half years, depending on which degree-completion option is selected. Non-degree students simply desiring to build skills and expertise in one or more specialized areas may, of course, simply schedule such courses as desired. A full-time, degree-seeking student would typically take between three and four courses during the fall and spring terms and up to two courses during the summer, putting the student on track to graduate within a year and a half, depending again on the degree-completion option.

Minimum Admission Requirements

Degree-seeking students

- A completed application form with a non-refundable application fee of \$45 (\$35 online)
- One official copy of a transcript from each institution of higher learning attended, including documentation of graduation from an accredited four-year college or university.
- One official copy of test scores of the Graduate Record Examination (GRE) with a minimum combined score of 1000 on the verbal and quantitative sections of the general test, and a minimum score of 4.0 on the writing assessment.

- There is a five-year time limit on the use of scores.
- Evidence of a command of spoken and written English, such as a TOEFL score of 550 or greater if English is not the primary language of the applicant.
- Either coursework or acceptable work experience in computer science and mathematics. All students must have an understanding of the following four core competencies:

- basic computer architecture
- object-oriented programming
- discrete mathematics
- data structures.

- In addition to the core competencies, it is highly recommended that students also have the proper background in their specialization of choice. Recommended competencies by specialization are:

- Computer science specialization: operating systems theory and programming language theory;
- Information systems specialization: business management;
- Software engineering specialization: programming language theory.

NOTE: Undergraduate courses are available for completing the competency requirements.

Application Deadlines

fall semester.....August 1
 spring semesterNovember 1
 summer semesterApril 1

Plan of Study

A plan of study must be approved by the program director and would include a list of any required undergraduate competency courses. The plan of study specifies the specialization selection and the thesis option and the earliest and latest possible date of graduation.

Degree Requirements

The master of science in computer and information sciences degree is conferred upon those candidates who successfully complete an approved program of study consisting of a minimum of 33 semester hours of graduate credit (of which no more than nine may be transfer credits) with a cumulative GPA of 3.0.

For all specializations, students must complete four core courses including:

CSIS 601	Data Modeling
CSIS 602	Foundations of Software Engineering
CSIS 603	Object-Oriented Design Patterns
CSIS 604	Distributed Computer Systems Architecture

Additional courses are required for each specialization:

Computer Science Specialization

The student will complete three courses from among the following:

CSIS 612	Advanced Computer Architecture
CSIS 614	Advanced Operating Systems
CSIS 616	Automata Theory
CSIS 618	Principles of Programming Languages

And one additional course from among
 CSIS 612, 614, 616, 618 (If not counted as one of the three above)

CSIS 638	Database Design
CSIS 674	Introduction to Computer Graphics
CSIS 690	Special Topics (if subject matter is appropriate for the Computer Science specialization as determined by the Joint Committee for the MS-CSIS)

Information Systems Specialization

The student will complete the following two courses:

CSIS 632	Data Communications and Networking
CSIS 638	Database Design

And two additional courses, chosen from among:

CSIS 631	Privacy and Security Issues
CSIS 634	Project Change and Management
CSIS 636	IT Policy and Strategy

CSIS 672	Human Computer Interaction
CSIS 690	Special Topics (if subject matter is appropriate for the Information Systems specialization as determined by the Joint Committee for the MS-CSIS)

Software Engineering Specialization

The student will complete:

CSIS 656	Software Systems Design and Implementation
----------	--

Either:

CSIS 654	Software Requirements Analysis and Specification, or
CSIS 658	Software Testing and Maintenance

And two additional courses, chosen from among the following:

CSIS 654 or 658	if not used above
CSIS 634	Project Change and Management
CSIS 657	Embedded Systems Design
CSIS 672	Human-Computer Interaction
CSIS 690	Special Topics (if subject matter is appropriate for the Software Engineering specialization as determined by the Joint Committee for the MS-CSIS)

Courses

The computer and information sciences program offers foundational theory courses as well as specialized study in technical areas.

CSIS 601 Data Modeling (3)

Data modeling includes conceptual, logical and physical modeling. The focus is on conceptual data modeling. Students learn about data element analysis, standardization, naming and normalization. They learn how to create a single model that supports multiple user views. In addition, they learn how to select and use modeling tools (e.g., the Unified Modeling Language).

CSIS 602 Foundations of Software Engineering (3)

A survey course in software engineering processes and methodologies. This course includes software life cycles, planning and managing projects, capturing and managing requirements, analysis and design, implementation, software testing and quality assurance and risk analysis in software

development. Emphasized are team-based development, quality standards, object-oriented design and CASE (computer-aided software engineering) tools.

CSIS 603 Object-Oriented Design Patterns (3)

A course in software design using design patterns as a tool for communicating software design solutions and as an aid in software refactoring. Creational, structural and behavioral patterns are emphasized. Also covered are finding and documenting software development patterns. The Unified Modeling Language is used as the design tool for software patterns and programming projects are in an object-oriented programming language.

CSIS 604 Distributed Computer Systems Architecture (3)

This course covers basic techniques for the design and construction of distributed systems. Its aim is to give the skills needed to build simple systems and to identify key issues for the analysis of distribution problems.

CSIS 612 Advanced Computer Architecture (3)

Currently, the trend in parallel computing is moving away from specialized, super-computing architectures, such as the Cray/SGI T3E, to less expensive, general-purpose systems consisting of loosely coupled components built from the PCs. We will study various topics relevant to clustering, including the following: interconnection networks, protocols, high performance I/O, load balancing, availability, programming models and environments, parallel algorithms and applications. The course will be lab-intensive and will include the implementation of parallel algorithms on a Beowulf Cluster. *Prerequisites:* CSIS 340 and CSIS 604 or their equivalents.

CSIS 614 Advanced Operating Systems (3)

This course covers a broad range of advanced operating systems concepts including protection, security, memory management, kernels, file systems, synchronization, naming, networks and distributed systems as well as recent

trends in operating systems design. Specific aspects of operating systems that support distributed computing will be emphasized.

Prerequisite: CSIS 604.

CSIS 616 Automata Theory (3)

The theory of finite state machines and regular expressions are applied to the design of switching circuits, components of compilers such as lexical analysis, pattern-matching, test-editors, unifications as needed in Prolog or for automated deduction, and almost any program which processes under commands. Undecidable problems and intractable problems are explored.

Prerequisite: Knowledge of discrete mathematics.

CSIS 618 Principles of Programming Language (3)

The course surveys the principles of programming language design and the issues related to their implementation. Topics will include a comparison of the major programming paradigms: imperative, functional, logic and object oriented. Also covered are data types, methods of specifying the semantics of language constructs and concurrency.

CSIS 631 Privacy and Security Issues (3)

A survey of the principles and practices related to computer security. The course concentrates on the problems of security associated with computer systems and emphasizes the application of cryptography to address those problems.

CSIS 632 Data Communications and Networking (3)

An introduction to data communications and computer networking. Topics include LAN topologies, transmission media, error detection, packet switching networks, Internet working of heterogeneous network technologies, Internet working protocol suites (with emphasis on TCP/IP), the client/server paradigm, the BSD socket interface, network security and important network applications.

CSIS 634 Project Change and Management (3)

Managing projects within an organizational context, including the processes related to initiating, planning, executing, controlling, reporting and closing a project form the major portion of this course. Project integration, scope, time, cost, quality control, risk management and managing the changes in organization resulting from introducing or revising information systems are also included.

CSIS 636 IT Policy and Strategy (3)

This course will consider the development and implementation of policies and plans to achieve organizational goals, the defining of systems that support the operational, administrative and strategic needs of the organization, as well as the study of approaches to managing the information systems function in organizations.

CSIS 638 Database Design (3)

Topics include conceptual and logical data models, relational database design, Structured Query Language (SQL), query processing, administration and CASE tools. A database design project is part of the requirement and includes a hands-on design, development and implementation using an available database software system like Oracle. *Prerequisite:* CSIS 601 or permission of the instructor.

CSIS 654 Software Requirements Analysis and Specifications (3)

An introduction to the software requirements engineering process. Topics to include feasibility studies, risk, requirement elicitation, modeling, analysis, specification and validation. *Prerequisite:* CSIS 602.

CSIS 656 Software Systems Design and Implementation (3)

An introduction to the issues, techniques, strategies, representations and patterns used in designing and implementing software. Possible design topics include: specification of internal interfaces, architectural design, data design, user-interface design, design tools and evaluation of design. Possible implementation topics include: language-oriented issues, construction technologies,

tools and formal constructions methods.

Prerequisites: CSIS 602 and CSIS 603.

CSIS 657 Embedded Systems Design (3)

This course is an introduction to specifying, designing, implementing, and testing (real-time) embedded systems. Topics include the embedded system lifecycle, choosing a processor, hardware/software partitioning, design techniques, cross-platform development, debugging, testing, and integration. Implementation languages may include Java, C/C++ or assembly.

Prerequisites: CSCI 602 and CSCI 604, or program director approval.

CSIS 658 Software Testing and Maintenance (3)

An introduction to the concepts and methods associated with software testing and maintenance. Testing topics to include: testing as part of the requirements for engineering and software design, test plan writing and static and dynamic testing. Maintenance topics to include: an overview of corrective, adaptive, perfective and preventive maintenance activities as well as organizational managerial issues.

Prerequisite: CSIS 602.

CSIS 672 Human-Computer Interaction (3)

Introduction to human-computer interaction and user-interface development. Topics include human factors of interactive software, interactive styles, design principles and considerations, development methods and tools, interface quality and evaluation methods. This course stresses the importance of good interfaces and the relationship of user interface design to human-computer interaction. It is intended for students whose future work may involve software development.

CSIS 674 Introduction to Computer Graphics (3)

This course is an introduction to the fundamental principles of computer graphics. Using the OpenGL application programming interface, students will learn these principles by writing a series of programming projects. The programming projects will be written in C++;

students who have programmed in C or Java should have little difficulty with the transition to the language.

CSIS 690 Special Topics in Computing (3)

A course in the special study of an advanced or new topic in computer science, information science or software engineering. This course may be repeated for additional credit, as the topics change.

Prerequisite: Permission of the instructor.

CSIS 691 Independent Study (3)

This course consists of individual study of an agreed-upon topic under the direction of a faculty member and following a course of reading and other requirements proposed by the student and established by negotiation with the director. This course is intended to provide graduate students with an opportunity to study in an area of computer science, software engineering or information systems that is not generally offered. This course may be repeated once.

CSIS 698 Project Thesis (3)

Project Thesis is a three-credit-hour course for the completion of a formal master's project thesis under faculty direction. A Project Thesis is characterized by a research project that applies or extends course topics through systems development.

Prerequisites: Completion of the four core courses (CSIS 601, CSIS 602, CSIS 603, and CSIS 604) and approval by the program director.

CSIS 699 Research Thesis (6)

Research Thesis is a six-credit-hour course for the completion of a formal master's research thesis under faculty direction. A Research Thesis is a traditional research project characterized by a comprehensive paper on a research topic.

Prerequisite: Completion of the four core courses (CSIS 601, CSIS 602, CSIS 603, and CSIS 604) and approval by the program director.

MASTER OF SCIENCE IN MARINE BIOLOGY

www.cofc.edu/~marine/

Department of Biology

843-953-5504

Mark D. Lazzaro, Chair

**Craig J. Plante, Program
Director**

plantec@cofc.edu; 843-953-9187

Grice Marine Laboratory

843-953-9200

Located at Ft. Johnson on James Island, about 10 miles from the main campus, the Grice Marine Laboratory houses classrooms, student laboratories, research laboratories, faculty offices, an aquarium room and a research collection of marine invertebrates and fishes. Courses related to the marine environment are conducted at the Grice Marine Laboratory. Adjacent to the College of Charleston facilities at Fort Johnson, the following facilities are all available to graduate students, staff and visiting scientists for research and training purposes: the Charleston Laboratory of the National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), the Marine Resources Division of the South Carolina Department of Natural Resources and the 78,000-square-foot, jointly administered, Hollings Marine Laboratory.

Program Description

The Graduate School of the College of Charleston offers a graduate program leading

to a master of science in marine biology. Several participating institutions contribute faculty and support to the program, including The Citadel, the Medical University of South Carolina, the Marine Resources Research Institute of the South Carolina Department of Natural Resources and the Charleston Laboratory of the National Ocean Service. The M.S. degree is awarded by The University of Charleston, and students use facilities and resources of all the participating institutions.

The program is research-oriented, and a thesis is required of all students. Because of the broad scope of faculty interests and facilities, an extremely wide variety of research and training opportunities are available in such areas as marine ecology, marine biodiversity (systematics, phylogeny, biogeography), evolutionary biology, cell and molecular biology, physiology, marine environmental sciences, fisheries biology, oceanography, aquatic toxicology, mariculture, marine biomedicine/biotechnology, microbiology and genomics.

Student offices and research spaces are provided in the Marine Resources Research Institute, Hollings Marine Laboratory and Grice Marine Laboratory of the College of Charleston, both of which are located at the Fort Johnson Marine Science Center on Charleston Harbor. In addition, an excellent Marine Resources Library, staffed by College of Charleston librarians, is located at the Ft. Johnson complex.

Assistantships

A number of research and teaching assistantships as well as four summer fellowships are awarded annually in the graduate program. In addition, two fellowships in marine genomics are now available. For information on additional financial assistance, please refer to the financial information section of this catalog.

Minimum Admission Requirements

- A completed application form with a nonrefundable application fee of \$45 (\$35 online).
- A personal statement/statement of goals.
- One official transcript from each institution of higher learning attended.
- An official copy of scores from the general and subject (biology) tests of the Graduate Record Examination.
- Three letters of recommendation from persons closely associated with previous work related to the discipline.
- Evidence of background in the sciences:
 - a. A bachelor's degree
 - b. Twenty semester hours of upper division biological courses, including a course in cellular or molecular biology (or the equivalent) and a course in ecology (or the equivalent).
 - c. Chemistry – two courses in organic chemistry or one course in analytical chemistry (beyond first-year chemistry).
 - d. General physics – two courses

- e. Calculus – one course
- f. Students with otherwise outstanding academic preparation who may lack one of the required courses may be admitted but could be required to complete the missing courses.
- Evidence of a command of spoken and written English (TOEFL score).

NOTE: Application for the fall with all supporting documents must be postmarked no later than February 1. Notification of acceptance is normally made within six weeks. Spring admissions are occasionally made; the deadline for spring applications is November 1.

Degree Requirements

- Courses: A minimum of 30 semester hours is required as follows: items a-e constitute the core (required) curriculum.*
 - a. BIOL 600 Physiology and Cell Biology of Marine Organisms (4)
 - b. BIOL 601 Ecology of Marine Organisms (4)
 - c. BIOL 610 Physical Oceanography (4)
 - d. BIOL 611 Biometry (4)
 - e. BIOL 620 and 621 Graduate Core Seminars (2)
 - f. BIOL 650 Seminar in Marine Biology (1)
 - g. Elective graduate courses, of which at least one must be organism-level (7-8)
 - h. BIOL 700 Thesis (4)
- Time Limit Requirements – All degree requirements for the M.S. degree in marine biology must be completed within four years. Extensions beyond the four-year time period must be approved in writing by the Marine Biology Graduate Council and the dean of graduate studies.
- By the end of the second semester in the program, a graduate student is expected to choose a major professor, establish a graduate committee, and file a plan of study in the program's office at Grice Marine Lab. This plan must be approved by the student's committee.
- Oral Comprehensive Examination—Successful completion of an oral comprehensive examination is required. This exam must be

taken no later than 45 days after completion of the second semester of courses. Successful completion of the comprehensive exam formally admits students to candidacy for the degree. The student must maintain continuous enrollment in the program. Continuous enrollment can be maintained by enrollment in at least one graduate course per semester. This will entitle the graduate student to a valid ID card, full service of the campus library, and such support from faculty and facilities of the program as the plan of study authorizes.

Thesis Proposal – A formal written presentation of the research problem is required. This presentation to the student's committee will include a detailed description of the scope of the research, the method(s) of approach and a timetable. The proposal is expected to be prepared by the time the student has completed the first 12 months of the program.

- Thesis – A formal written presentation of the student's research, the thesis, is required. The student's committee reviews the thesis and, if it is satisfactory, formally certifies its acceptance following an oral presentation and defense of the thesis by the student. A description of the required format for the thesis is available to students from the program office at Grice Marine Laboratory.

All degree requirements must be met in accordance with specified university and graduate program in marine biology regulations.

**NOTE: Acceptance of transfer credit(s) for fulfillment of the requirements above will be determined by the Marine Biology Graduate Council. No more than six semester hours of transfer credit is normally allowed. Credits to be applied toward the degree remain valid for five years from the date of enrollment. In unusual circumstances, exceptions may be made by the Marine Biology Graduate Council and with the approval of the dean of the Graduate School. Students must maintain at least a 3.0 grade point average on a 4.0 scale.*

Course Descriptions

BIOL 502 Special Topics (1–4)

Special studies designed to supplement regular offerings made in the program or to investigate an additional, specific area of marine biological research. Previous special topics courses have included Coral Reef Biology, Biology of Deep-Sea Organisms, and Marine Biodiversity.

BIOL 503 Special Topics in Ecology (3–4)

Investigation of advanced specific areas of ecology beyond General Ecology (BIOL 341). Examples of offerings may include marine microbial ecology, benthic ecology, community ecology and aquatic pollution. Prerequisites: BIOL 342 (General Ecology) or permission of the instructor.

NOTE: This course may sometimes include a lab, in which case the number of credits will be four.

BIOL 510 Field Methods in Marine Ecology (2)

The use of ecological theory and methods to obtain and interpret experimental data gathered in the local marine environment. Emphasis is placed on an intensive class project. Lecture and laboratory total four hours per week.

BIOL 600 Physiology and Cell Biology of Marine Organisms (4)

A study of the regulatory mechanisms found in marine organisms, especially as these relate to interactions between the organism and the environment. Mechanisms will be discussed at the organismal, organ-system, tissue and cellular levels. Lectures three hours per week; laboratory three hours per week.

BIOL 601 Ecology of Marine Organisms (4)

The study of living organisms in the marine environment – population and community ecology, reproduction and life histories, productivity, evolution and biogeography. A broad overview of these elements is followed by detailed consideration of major coastal and oceanic ecosystems around the world. Lectures three hours per week; laboratory three hours per week.

BIOL 610 Physical Oceanography (4)

A study of the physics and chemistry of ocean and estuarine waters, circulation, waves and tides. Lecture and laboratory work emphasizes the interrelationships of physical, chemical, geological and biological processes in the sea. Lectures three hours per week; laboratory three hours per week.

BIOL 611 Biometry (4)

A broad treatment of statistics concentrating on specific statistical techniques used in marine biological research. Topics covered include sampling procedures and analysis of distributions (binomial, poisson and normal), hypothesis testing and estimation with emphasis on analysis of variance and experimental design (Latin-square, nested, randomized block and factorial), analysis of frequencies, regression and correlation. Several nonparametric and multivariate methods that are pertinent to research in the marine biological science are also discussed. Emphasis is on application of statistical techniques and not theory; therefore, a knowledge of mathematics through calculus is expected. Lectures three hours per week; laboratory three hours per week.

BIOL 614 Environmental Immunology (3)

This course, directed at graduate and advanced undergraduate students, addresses the role of the immune system in maintaining the health of human and wildlife populations. Lectures and independent reading followed by classroom discussion build skills in critical analysis of current literature in immunotoxicology, clinical and comparative immunology.

BIOL 620, 621 Graduate Core Seminars (1 each)

Seminars on contemporary topics in marine biology acquaint students with the variety of disciplines and techniques available to scientists working in the marine environment. Designed especially to stimulate new-to-the-program students to choose thesis topics. Two hours per week. (620-fall, 621-spring)

BIOL 627 Marine Tetrapod Biology (4)

This lecture, laboratory, and field course emphasizes both the diversity and common themes of the physiological, behavioral and anatomical adaptations that characterize certain lineages of reptiles, birds and mammals that exploit a wide array of marine habitats. Highlighting the faunas of South Carolina, we will evaluate marine tetrapods as models for advanced studies in evolution, physiology, behavior, ecology and conservation.

Prerequisites: Ecology (BIOL 341) or its equivalent and at least one additional advanced biology course such as Genetics or Vertebrate Zoology.

BIOL 628 Plant Ecology (4)

Plant Ecology will explore the population ecology of plants covering the genetic, spatial, age, and size structure of plant populations. The focus will be on understanding the origin of these different kinds of structures, understanding how these influence each other, and understanding why these change with time.

Prerequisite: General Ecology (BIOL 341) or permission of the instructor.

BIOL 629 Conservation Biology (3)

A course exploring the origin, maintenance, and preservation of biodiversity at all levels: genetic, population, community, ecosystem and biosphere. The focus will be on applying ecological, genetic and evolutionary principles to problems of conservation. Optional field trips will make use of the rich biota of the Charleston area.

Prerequisites: BIOL 341 (General Ecology) and either BIOL 311 (Genetics) or BIOL 350 (Evolution), or permission of the instructor.

BIOL 630 Marine Invertebrate Zoology (4)

A study of the functional morphology, life history, systematics, evolution and other selected aspects of the biology of marine invertebrates. Lectures three hours per week; laboratory three hours per week.

BIOL 631 Biology of Crustacea (4)

A study of the biology of crustacean arthropods. Topics include evolution, taxonomy, functional morphology, physiology, embryology, ecology, behavior and commercial management. Lectures three hours per week; laboratory three hours per week.

Prerequisite: A course in invertebrate zoology.

BIOL 632 Ichthyology (4)

A study of the biology of fishes, emphasizing diversity and evolution, morphology, physiology, ecology, life histories, behavior, systematics and biogeography. Laboratory work focuses on groups important in the local fauna. Lectures three hours per week; laboratory three hours per week.

BIOL 635 Marine Botany (4)

Introduction to taxonomy, morphology, phylogeny and ecology of marine plants. Major groups of planktonic and benthic algae and vascular plants from the coast of South Carolina are studied. Lectures three hours per week; laboratory three hours per week.

BIOL 640 Applied and Environmental Microbiology (4)

A lecture and laboratory study of the special applications of microbiology to domestic water and waste water and solid wastes, food and dairy products and industrial processes. Includes the microbial distribution and its role in various marine and freshwater, terrestrial, animal and product environments. Lectures three hours per week; laboratory three hours per week.

BIOL 641 Marine Parasitology (4)

The morphology, life cycles, ecology, physiology and pathogenic effects of animals parasitic in or on marine hosts are considered. The parasites to be studied include protozoa, helminths, arthropods and other miscellaneous groups typical of the marine environment. The principles and practice of parasite taxonomy and evaluation, along with morphologic and physiologic studies, are emphasized in the laboratory. Lectures three hours per week; laboratory three hours per week.

BIOL 642 Aquatic Toxicology (4)

An introduction to assessing the effects of toxic substances on aquatic organisms and ecosystems. Topics include general principles of toxicology, fate and transport models, quantitative structure-activity relationships, single-species and community-level toxicity measures, regulatory issues and career opportunities. Examples are drawn from marine, freshwater and brackish-water systems. Lectures three hours per week; laboratory three hours per week.

BIOL 643 Fisheries Science (3)

A general introduction to methods of harvesting aquatic resources, and collection and evaluation of biological data to effectively manage these resources. Topics include age and growth analysis; mortality, recruitment and yield; production and early life history; stock assessment techniques; and the detailed study of certain important fisheries. Lectures three hours per week.

BIOL 644 Aquaculture (3)

Principles and techniques of aquaculture, with emphasis on warm-water species that spend all or part of their lives in salt water. Status and potential of aquaculture, including detailed discussions of established and candidate species. Design and management of aquaculture systems. Importance of water quality, feeding and nutrition, diseases and predators, genetics and breeding and economic considerations in aquaculture. Lectures three hours per week.

BIOL 645 Systematic Biology (3)

An in-depth coverage of the principles of systematics with emphasis on reconstruction of relationships and evolutionary history of organisms. Topics include current theories of systematic and evolutionary biology, methods of phylogenetic systematics and critical evaluation of phylogenetic hypotheses.

Prerequisite: At least one upper division course in organismal biology.

BIOL 650 Seminar in Marine Biology (1)

A seminar covering topics in marine biology, fisheries and aquaculture, marine biomedical science and coastal ecology. Total semester hours in BIOL 650 is normally limited to three. Does

not satisfy elective unit requirement. (fall and spring)

BIOL 700 Thesis (1–4)

Individual thesis research in marine biology. No more than four semester hours of the thesis may be counted toward fulfilling the minimum degree requirements.

Examples of Ancillary Graduate Courses Available in Collaborating Institutions

The Graduate School of the College of Charleston

Program in public administration:

PUBA 700–704 Special Topic Seminars

Issues in Coastal Zone Management and Issues in Growth versus Environmental Quality.

MASTER OF SCIENCE IN MATHEMATICS

math.cofc.edu/grad-prog.html

Department of Mathematics

843-953-5730

Robert J. Mignone, Chair

Ben Cox, Program Director

coxbl@cofc.edu; 843-953-5715

Program Description

The Department of Mathematics at The Graduate School of the College of Charleston offers a graduate degree program leading to a Master of Science in Mathematics. The program prepares students for careers in industry, academia or government, or for doctoral studies. It also provides people in teaching and other professions with the means for career advancement or career change.

Courses are offered in the summer and late afternoon/evening to accommodate working professionals. Classes are small, providing personal attention for students who can work closely on projects with individual faculty members.

The graduate mathematics faculty is actively involved in a wide variety of research areas, including algebra, analysis, combinatorics, dynamical systems, geometry, logic, mathematical biology, mathematical physics, number theory, numerical analysis, probability, scientific computing, statistics and topology.

The Department of Mathematics also offers a graduate certificate in statistics. For more information, contact the program director or visit the program's website.

Assistantships

A number of graduate assistantships are available for full-time students in the Department of Mathematics. The awards will normally be made by April 30 for the following academic year; applications indicating an interest in an assistantship should be completed by April 15. However, applications for assistantships will be considered throughout the year if funds permit.

NOTE: For information on additional financial aid, please refer to the financial information section of the Graduate Catalog.

Minimum Admission Requirements

A bachelor's degree in mathematics or its equivalent with a minimum GPA of 3.0 in the major is the usual requirement for admission. This undergraduate training should include abstract algebra, differential equations, linear algebra and advanced calculus. Students who have not had all of these courses will still be considered for the program but must make up any deficiencies.

Students requesting admission should submit the following:

- a completed application form including a brief statement of goals, with a nonrefundable application fee of \$45 (\$35 online).
- one official copy of a transcript from each institution of higher learning attended, including documentation of graduation from an accredited four-year college or university
- one official copy of test scores of the Graduate Record Examination, if available
- two letters of recommendation from former professors or immediate superiors in recent employment

Admission Procedures

The Graduate Steering Committee encourages completed applications for the program by the following dates:

fall semester.....April 30
spring semester.....November 15
(However, applications will be considered throughout the year.)

Degree Requirements

The master of science in mathematics requires 30 hours of coursework or 24–27 hours of coursework and a thesis.

Core Curriculum

MATH 502 Advanced Linear Algebra
MATH 503 Applied Algebra I
MATH 511 Real Analysis I
MATH 515 Complex Variables
MATH 530 Mathematical Statistics I

As part of the student's coursework, the student must take MATH 502, three additional courses from the core curriculum and at least one sequence chosen from the following: MATH 530–531 (Mathematical Statistics I and II), MATH 503–604 (Applied Algebra I and II), MATH 511–612 (Real Analysis I and II), MATH 511–515 or MATH 515–511 (Complex Variables and Real Analysis I).

The remaining hours will normally be selected from courses numbered 500 and above.

The program will be subject to the policies of The Graduate School of the College of Charleston. In particular, no more than 12 semester hours of transfer credit may be credited toward a degree. Please see the "Academic Information" section of this catalog for more detail. Approved graduate

courses at The Citadel or Medical University of South Carolina are not considered transfer credit, provided the student uses the Graduate School's cross-registration procedures (forms available in the Graduate School Office). However, the master of science in mathematics requires that at least 18 credits be from courses taught at The Graduate School of the College of Charleston.

Course Descriptions

NOTE: The frequency with which courses are offered is determined primarily by student needs and a balanced program. Following each course description is a code indicating when the Department of Mathematics plans to offer the course: F-every fall; S-every spring; oF-odd year fall; eF-even year fall; oS-odd year spring; eS-even year spring; oSu-odd year summer; eSu-even year summer. Schedule is subject to change based on student interests, faculty availability, curriculum changes and other factors. Courses without a code are offered when there is sufficient interest from students and faculty.

MATH 502 Advanced Linear Algebra (3)

This course provides the background in linear algebra needed for advanced work in algebra, analysis, and applications. Topics include vector spaces over a field, dual spaces, bilinear functions, linear transformations, determinants, eigenvalues, projections, diagonalization, Jordan canonical form and infinite dimensional spaces. Special topics such as applications to approximation theory, positive matrices, computation, multilinear algebra and spectral theory will be selected by the instructor.

Prerequisite: MATH 203 (Linear Algebra). F

MATH 503 Applied Algebra I (3)

This course introduces basic concepts of abstract algebra and its applications. Topics include sets, relations, functions; introduction to groups, group theory, Lagrange's theorem, the homomorphism theorems, applications to coding theory and connections with graph theory; Boolean algebra, with applications to combinatorial circuits.

Prerequisite: MATH 303 (Abstract Algebra). oSu, eS

MATH 511 Real Analysis I (3)

Topics include set theory and metric spaces, topological properties, local and uniform convergence criteria, properties of continuous functions and differentiation of vector valued functions.

Prerequisite: Math 411 (Advanced Calculus II). F

MATH 515 Complex Variables (3)

Topics to be covered include the complex number system, analytic and harmonic functions, power series, integration, residue theory, analytic continuation, conformal mapping and applications.

Prerequisites: MATH 311 (Advanced Calculus I), MATH 411 (Advanced Calculus II) recommended.

MATH 523 Partial Differential Equations I (3)

This course is designed to provide first-year graduate students with an understanding of and the ability to solve some of the partial differential equations arising in science and engineering.

Prerequisites: MATH 221 (Calculus III) and Math 323 (Differential Equations). eF

MATH 530 Mathematical Statistics I (3)

Topics include probability, probability functions, probability densities, mathematical expectation, sums of random variables and sampling distributions.

Prerequisite: MATH 221 (Calculus III) F

MATH 531 Mathematical Statistics II (3)

Topics include decision theory, estimation, hypothesis testing, regression, correlation and analysis of variance.

Prerequisite: MATH 530. S

MATH 545 Numerical Analysis I (3)

This course is a study of numerical methods and analysis of the associated errors. Topics include both direct and iterative methods of numerical linear algebra, computation of eigenvalues and singular values, approximation of functions and numerical solution of ordinary differential equations. Standard computer software libraries will be used. *Prerequisites:* MATH 203 (Linear

Algebra), MATH 323 (Differential Equations), and CSCI 220 (Computer Programming I) or permission of the instructor. oS

MATH 551 Linear Programming and Optimization (3)

This course is designed to provide first-year graduate students with an introduction to deterministic models in operations research. Topics include linear programming, network analysis, dynamic programming and game theory.

Prerequisites: MATH 221 (Calculus III), MATH 203 (Linear Algebra), and CSCI 220, or permission of the instructor. oF

MATH 552 Operations Research (3)

This course is designed to provide first-year graduate students with an introduction to probabilistic models in operations research. Topics include nonlinear programming, queueing theory, Markov chains, simulation and integer programming.

Prerequisites: MATH 221 (Calculus III), MATH 530 (Mathematical Statistics I), CSCI 220, or permission of the instructor. eS

MATH 580 Topics in Applied Mathematics (3)

This course is a one-semester introduction to an advanced topic in applied mathematics with generally only undergraduate mathematics prerequisites.

Note: Since the content of this course is variable, it may be repeated for credit.

MATH 585 Topics in Pure Mathematics (3)

This course is a one-semester introduction to an advanced topic in pure mathematics with generally only undergraduate mathematics prerequisites.

Note: Since the course content of this course is variable, it may be repeated for credit.

MATH 601 General Topology (3)

This course provides an introduction to general topology. Topics include the generation of topological spaces, continuity, connectedness, compactness, separation and countability.

Prerequisites: MATH 311 (Advanced Calculus

I), MATH 411 (Advanced Calculus II) recommended.

MATH 604 Applied Algebra II (3)

This course is a continuation of MATH 603. Topics include rings and fields with applications to block designs, BCH and difference codes, public key cryptography; semigroups and monoids, with applications to automata and languages.
Prerequisite: MATH 503.

MATH 607 Discrete Mathematics (3)

This course is an introduction to the theory and applications of discrete mathematics. Topics include enumeration techniques, combinatorial identities, matching theory, basic graph theory, combinatorial designs and related topics.
Prerequisite: MATH 203 (Linear Algebra).

MATH 612 Real Analysis II (3)

This course is a continuation of MATH 611. Topics include the Riemann-Stieltjes integral, equicontinuous families of functions, L_p spaces, linear transformations, the inverse and implicit function theorems and elementary measure theory.
Prerequisite: MATH 512.

MATH 623 Partial Differential Equations II (3)

Topics include first-order equations and the Cauchy problem, canonical forms of second order equations, the Cauchy-Kowalevski Theorem, separation of variables and eigenfunction expansions, Green's functions, maximum principles and numerical methods. Special topics such as the calculus of variations, the Galerkin method, perturbations, bifurcations and group methods will be selected by the instructor.
Prerequisite: MATH 523 (Partial Differential Equations I). oS

MATH 624 Dynamical Systems (3)

This course provides an introduction to the qualitative theory of ordinary differential and difference equations. Topics include existence-uniqueness, stability theory, limit cycles, Poincaré maps, structural stability and bifurcation theory. Applications will be provided throughout the course. Special topics such as Hamiltonian systems, gradient systems, perturbations,

symbolic dynamics, strange attractors and chaos will be selected by the instructor.

Prerequisites: MATH 323 (Differential Equations) and MATH 502.

MATH 645 Numerical Analysis II (3)

This course is a continuation of MATH 545. Topics include finite difference and finite element methods for partial differential equations and numerical optimization. Other topics will be selected by the instructor.

Prerequisite: MATH 545. oF

MATH 650 Statistical Quality Control (3)

This course is an introduction to basic methods of statistical process control. Topics include control charts, cumulative sum control charts, lot acceptance sampling plans and related topics.

Prerequisite: MATH 350 (Statistical Methods) or permission of the instructor. eSu

MATH 651 Design of Experiments (3)

This course is an introduction to how and why scientific experiments should be designed. The most commonly used designs and their variations along with resulting analysis will be covered.

Prerequisite: MATH 350, or equivalent, or permission of the instructor. oSu

MATH 680 Special Topics in Applied Mathematics (3)

This course is a semester study of an advanced topic in applied mathematics.

Prerequisite: Permission of the instructor.

Note: Since the content changes, this course may be repeated for credit.

MATH 685 Special Topics in Pure Mathematics (3)

This course is a semester study of an advanced topic in pure mathematics.

Prerequisite: Permission of the instructor.

NOTE: Since the content changes, this course may be repeated for credit.

MATH 699 Independent Study in Mathematics (3)

This course is designed to provide graduate students with an opportunity to study an area

of mathematics of interest to them that is not generally offered. *Prerequisite:* Depends on the particular topic being studied.

MATH 700 Thesis (3)

This course is an individual study in mathematics directed by a faculty member. *Prerequisite:* Approval of the Graduate Steering Committee and the instructor.

NOTE: This course may be taken for credit twice when the nature of the study warrants it.

The following courses, regularly taught in the Department of Biometry and Epidemiology at the Medical University of South Carolina, may also be used as part of the curriculum for students emphasizing statistics. Students enroll in these courses using the cross-registration procedures. At least 18 credit hours must be earned from graduate courses of the College of Charleston.

BIOMETRY 700 Introduction to Biostatistics (4)

This course introduces population samples, comparison of means, variances and proportions, confidence intervals, enumeration, data, regression, correlation, introduction to analysis of variance and nonparametric methods.

BIOMETRY 702 Introduction to Experimental Design (3)

This course emphasizes designs that are used widely in statistics. The Latin Square design, factorial design and two-way design with interaction are discussed. In addition, multiple regression models and an introduction to basic nonparametric procedures in analysis of variance are studied. Other topics covered may include life tables, nested and confounded designs and analysis of covariance.

Prerequisite: Biometry 700.

BIOMETRY 704 Nonparametric Methods in Biology and Medicine (3)

This course covers the advantages and disadvantages of nonparametric tests. In particular, the articles covered consist of levels of measurements, tests for one and two sample location and dispersion, tests for independence and two-way layouts.

Prerequisites: MATH 530 and Biometry 700.

BIOMETRY 710 Regression Methods in Biology Medicine (3)

This course covers techniques in regression analysis including the least squares equation, methods for adding and eliminating variables in a regression model and plotting techniques. The SAS software system is used throughout the course.

Prerequisites: MATH 530 and Biometry 700.

BIOMETRY 711 Analysis of Categorical Data (3)

This is an applications-oriented course intended for Ph.D and advanced M.S. students. A short review of the standard chi-square methods is followed by several special purpose techniques for two-dimensional tables. Other areas covered include the logit transformation, maximum likelihood and weighted least squares methodologies, analysis of three-dimensional and higher tables and treatment of zero cells.

Graduate Certificate Program in Statistics

The Graduate Certificate Program in Statistics allows non-degree students to strengthen their expertise in applied statistics while recognizing them with an official certificate of their achievement. The program combines a solid theoretical foundation with a variety of applied tools and techniques to prepare the student to handle statistical problems in business and industry.

Requirements

The Graduate Certificate Program in Statistics requires a minimum of 9 hours of graduate coursework selected from the following courses, including at least two from the first four courses:

MATH 530	Mathematical Statistics I
MATH 531	Mathematical Statistics II
MATH 650	Statistical Quality Control
MATH 651	Design of Experiments

Elective: A graduate course in statistics or probability approved by the M.S. in Mathematics Steering Committee.

Course Descriptions

MATH 530 Mathematical Statistics I (3)

Topics include probability, probability functions, probability densities, mathematical expectation, sums of random variables and sampling distributions.

Prerequisite: MATH 221 (Calculus III). F

MATH 531 Mathematical Statistics II (3)

Topics include decision theory, estimation, hypothesis testing, regression, correlation and analysis of variance.

Prerequisite: MATH 530. S

MATH 650 Statistical Quality Control (3)

This course is an introduction to the basic methods of statistical process control. Topics include control charts, cumulative sum control charts, lots acceptance sampling plans and related topics.

Prerequisite: MATH 350 (Statistical Methods) or permission of the instructor. eSu

MATH 651 Design of Experiments (3)

This course is an introduction to how and why scientific experiments should be designed. The most commonly used designs and their variations along with the resulting analysis will be covered.

Prerequisite: MATH 350 (Statistical Methods) or permission of the instructor. oSu

ELECTIVE (3)

Typically, this course would be MATH 580 Special Topics in Applied Mathematics (3). This course is a one-semester introduction to an advanced topic in applied mathematics, with generally only undergraduate mathematics prerequisites. Recently offered topics include stochastic processes, time series, introduction to bootstrap, excursions in mathematical statistics, applied nonparametric statistics and statistical learning theory.

Sample Curricula

I: 12 months at one course per semester

- Fall: MATH 530 Mathematical Statistics I
- Spring: MATH 531 Mathematical Statistics II

- Summer Evening: MATH 650 Statistical Quality Control

II: 24 months at one course per semester

- Fall: MATH 530 Mathematical Statistics I
- Summer Evening (1st year): MATH 650 Statistical Quality Control
- Summer Evening (2nd year): MATH 651 Design of Experiment

III: 10 months at one course per semester

- Fall: MATH 530 Mathematical Statistics I
- Spring: MATH 531 Mathematical Statistics II
- May Evening: MATH 580 Topics in Applied Mathematics

MATH 530 provides the student with an understanding of calculus-based probability theory, which is essential for understanding the development of statistical procedures. For those students wishing to acquire a stronger background in the theoretical developments, MATH 531 is an appropriate option. MATH 650 and MATH 651 ensure that students are exposed to possible practical applications of statistical theory. Finally, the variety of special topics courses offered as MATH 580 give both the theoretician and the practicing statisticians the option of learning material specifically tailored to their needs and interests.

Regulations

Except as noted below, the admission, enrollment, and continuation policies for the Graduate Certificate Program in Statistics are the same as those for the M.S. in Mathematics. The exceptions are:

- Transfer Credit: No transfer credit is permitted.
- Time Limit Requirements: All work credited toward the Graduate Certificate in Statistics must be completed within three years.

For more information, contact Ben Cox at 843-953-5715 or by email at coxbl@cofc.edu.

INTERDISCIPLINARY PROGRAMS

DEGREES OFFERED:

Master of Education in Languages

Master of Education in Science and Mathematics

Master of Science in Environmental Studies

MASTER OF EDUCATION IN LANGUAGES

www.cofc.edu/~medlang/

Graduate Program in Languages for Teachers

843-953-5713

Robyn Holman
Program Director

holmanr@cofc.edu; 843-953-5459

Program Description

The School of Languages, Cultures, and World Affairs and the School of Education, Health, and Human Performance jointly offer a Master of Education in Languages. This degree program is designed to broaden the content area knowledge, strengthen the language and language teaching skills, and satisfy the professional development needs of practicing teachers. It may also respond to the interests of other language professionals or qualified individuals desiring to pursue advanced studies in language and linguistics. This program provides a solid background for future doctoral study in language education.

The program is made up of two major components: core courses in applied linguistics, teaching and research methods; and language-specific courses in French, Spanish and ESOL. Candidates will also complete various capstone experiences. This is a part-time program that generally offers the student one or two courses per semester, including summer. Students are asked to choose an advisor early in their course of study. The degree must be completed within

six years of the entrance date. Courses in this program are taught by full-time faculty who hold terminal degrees in their fields and have extensive teaching backgrounds, which often include public or private school experience at the secondary level.

Minimum Admission Requirements

Language teachers holding a valid teaching certificate from any state will be admitted as long as they have a bachelor's degree or its equivalent in the language that they teach with a GPA of 2.5 or better on a 4.0 scale. The Graduate Record Examination (GRE) exam is not required. Other applicants will be considered on a case-by-case basis by the program steering committee, which will apply the following criteria:

- A bachelor's degree from an accredited institution;
- A minimum GPA of 2.5;
- At least 30 hours of undergraduate coursework, or an approved equivalent, in the relevant modern language;
- Evidence of a command of English (if English is not the primary language of the applicant, a TOEFL score of 550 or greater is required);
- Two letters of recommendation.

Provisional Admission

Students who do not meet the requirements for admission may be admitted provisionally until the deficiencies are corrected. Conditions of provisional acceptances that lead to regular degree status will be clearly outlined for such

applicants by the steering committee. Also required for admission are an application form accompanied by a \$45 nonrefundable fee (\$35 online), official transcripts of all undergraduate and graduate coursework, two letters of recommendation and a copy of the applicant's valid teaching certificate (if applicable). All application materials should be submitted to the Graduate School Office. Application deadlines are April 15 for summer admission; June 15 for fall admission; and November 15 for spring admission.

Degree Requirements

The M.Ed. in Languages degree is awarded to candidates who successfully complete an approved program of study consisting of 36 hours of graduate credit with a cumulative GPA of 3.0. At least 27 of the 36 hours must be taken at the College of Charleston. In addition, candidates will complete the master's capstone experience as identified in the specific requirements listed below.

Core Courses

All students will complete 15 hours of core courses, which are taught in English.

LALE 601	Applied Linguistics
LALE 602	Advanced Methods of Second Language Teaching
LALE 603	Second Language Acquisition
EDFS 635	Educational Research
EDFS 687	Introduction to Education Technology (or another approved intermediate or advanced technology course)

Language Specific Courses

French/Spanish concentration

Students will take 15 hours of coursework in the language, literature, and culture of the target language. All French and Spanish courses are taught in the target language.

ESOL concentration

Students will take 15 hours of ESOL courses, which generally include the following:

EDFS 670	Principles and Strategies
EDFS 671	Reading and Writing
EDFS 672	Linguistics and Cultural Diversity
EDFS 673	Assessment
EDFS 680	Teaching English Through the Content Areas

Capstone Experiences

Students choose from three options to meet this 6-hour requirement: thesis, an action research project or two electives related to the student's area of interest.

All students must fulfill a general requirement of at least 50 hours of field experience (practicum). For ESOL students, the field experience may be the practicum course EDFS 704.

At the conclusion of the program all students will either pass a comprehensive exam or submit a professional portfolio.

Non-Degree Status

Teachers seeking re-certification credit or other qualified individuals wishing to take coursework may be admitted as non-degree-seeking students. Advanced undergraduates may, under certain conditions, request permission to enroll in M.Ed. classes (6-hour limit). Non-degree-seeking students who later wish to be admitted to the degree program may apply up to 12 semester hours of credit taken in non-degree status.

Course Descriptions

(For a listing of the ESOL courses, please see the ESOL certificate section of the catalog.)

LALE 601 Applied Linguistics (3)

The course explores the different areas that comprise the field of Applied Linguistics with the goal of observing how they inform second language teaching and learning. It addresses questions about the complexities of L2 learning, as well as issues surrounding the education and training of second language teachers.

LALE 602 Advanced Language Teaching Methodology (3)

The course incorporates the latest research findings on foreign language pedagogy and theory. Students will create lesson plans, units and activities based on specific aspects of foreign language teaching. Class sessions involve discussion of assigned readings and application of the content of the readings to teaching diverse learners.

LALE 603 Second Language Acquisition (3)

The course introduces the field of second language acquisition from a theoretical and methodological perspective. Students will explore the most important linguistic, psychological and social influences that affect the rate and course of second language acquisition. The course draws comparisons between the acquisition of a first and second language. Students will analyze actual second language learner data.
Prerequisite: LALE 601.

LALE 690 Special Topics in Language Education (3)

The course examines current issues in language teaching such as FLES, immersion programs, AP training and standards, from both a theoretical and practical viewpoint. Course content changes regularly.

FREN 602 Approaches to French Literature and Textual Analysis (3)

The course introduces various modern theories for literary analysis (thematic, stylistic, sociological, psychological etc.). It presents an interdisciplinary approach to literature and demonstrates that the study and teaching of literature is important and relevant in our modern world. The instructor furnishes students with materials they can adapt

and use in their own courses, including basic language classes.

FREN 603 Stylistics (3)

The purpose of this course is to familiarize participants with a stylistic approach to language, literature, and linguistics. The course will deepen the participants' understanding of the different fields involved in language studies such as grammar, semantics, syntax, morphology, rhetoric and semiotics.

FREN 614 French Colonial Legacy and Francophony (3)

The purpose of this course is to examine the French colonial legacy and to determine its role in the expansion of the French language and in the birth of francophone societies.

FREN 630 Seminar in French Language Studies (3)

The study of a topic in language that is outside the routine offerings of the department. This course may be repeated for additional credit as the topics change.

Prerequisites: graduate status, 30 hours of French or permission of the instructor.

FREN 680 French Phonetics and Phonology (3)

The course equips teachers with the knowledge and control of how spoken French is produced and enables them to identify and correct their own and others' non-French performance. Standard French at a neutral stylistic level is the dialect studied, but some exposure is given to the less formal pronunciation often used by native speakers and to phonetic variation according to demography, social status or ethnic origin. The course also provides an overview of the historical evolution of sounds.

FREN 681 Oral Proficiency in French (3)

This course is designed to give an opportunity in French for each student to advance at least one level in the American Council on the Teaching of Foreign Languages' oral proficiency rating system. Instruction follows closely upon the oral proficiency interview itself, allowing students to improve in language production while incorporating linguistic understanding

into the language acquisition process. Students will improve in interpersonal communicative competence as well as presentational competence, and make cross-cultural comparisons of language events such as complaints, apologies, exclamations, undertaken with an extended look at intonation and nuance.

FREN 682 French Mass Media (3)

French Mass Media is designed for teachers and other advanced students of French. The purpose is to examine French mass media and its role in French society and to explore how to incorporate this topic into standards-based curricula.

FREN 683 Realism and Naturalism in French Literature and Art (3)

The course surveys Realism and Naturalism through the works of painters such as Courbet, photographers such as Nadar, and writers such as Balzac, Flaubert, Zola and Maupassant. It examines, through a selection of visual and literary works, the development of Realism and Naturalism in the historical and social context of the time.

SPAN 614 Topics in Spanish Culture and Civilization (3)

An intensive exploration and analysis of the culture of Spain through the study of selected topics in history, science, philosophy, the arts and popular culture. Such topics will be approached through the study of primary and secondary texts, artistic works and through film. The goal of this course is to prepare teachers to incorporate and adapt a wide variety of cultural aspects of Spain into their lesson plans as well as to provide an understanding of central aspects of post-1700s Spain.

SPAN 615 Topics in Latin American Culture and Civilization (3)

An Intensive exploration and analysis of Spanish-American culture and civilization through the study of selected topics in history, film, the arts and popular culture. This course prepares teachers to incorporate and/or adapt cultural aspects that are appropriate for middle and high school curricula.

SPAN 624 U.S. Latinos/as Literatures and Cultures (3)

An in-depth study of topics in U.S. Latino/a literature and culture focusing on Mexican-Americans, Puerto Ricans and Cuban-Americans. Content includes history, literacy production and cultural manifestations within contemporary theoretical concepts.

SPAN 630 Seminar in Hispanic Studies (3)

An in-depth study of topics in Hispanic literature, linguistics and/or cultures. This course may be repeated for additional credit, as the topics change.

SPAN 682 Spanish Oral Proficiency (3)

Emphasis is on practical activities designed to increase students' level of proficiency and their understanding of the ACTFL Proficiency Guidelines. Assignments focus on analyzing oral skills, diagnosing problem areas, and on applying proficiency strategies to personal and professional needs.

MASTER OF EDUCATION IN SCIENCE AND MATHEMATICS

www.cofc.edu/~medsm/

Graduate Program in Science and Mathematics for Teachers

843-953-5734

Gary Harrison,
Program Director

harrisong@cofc.edu; 843-953-5734

Program Description

The School of Sciences and Mathematics and the School of Education jointly offer a master of education in science and mathematics. This program offers graduate-level courses in the sciences, mathematics and education that address the needs of teachers and informal educators. The program's intention is to strengthen and broaden the practicing teacher's and informal educator's science, mathematics and education knowledge and understanding for use in elementary, middle, and high school classrooms and informal source centers. It also provides a solid background for those who might eventually pursue a doctoral degree in science and mathematics education.

Content courses in science and mathematics will be offered by faculty in the discipline using pedagogical practices consistent with the discipline and appropriate for the PK–12 classroom curriculum. Integrated courses that blend several disciplines along a theme line and education content courses complement the science and mathematics content component of

the program by emphasizing the interrelationships that exist among the science and mathematics content areas across the PK–12 curriculum.

Minimum Admission Requirements

To be admitted to the degree program, an applicant is required to have a bachelor's degree or its equivalent with a GPA of 2.50 or better, both overall and in the major, and be a teacher or informal science educator. This program is designed for certified elementary, middle and secondary teachers. It is possible to be admitted without certification. Exceptions will be considered on a case-by-case basis.

Also required for admission are a \$45 nonrefundable application fee (\$35 online), official transcripts of all undergraduate and graduate coursework, a statement of goals and two letters of recommendation from individuals familiar with the applicant's academic and/or work experience and which indicate evidence of potential for success in graduate work. Additionally, the applicant must submit a valid teaching certificate, if held. TOEFL scores must be submitted if English is not the applicant's primary language. Applicants also must submit official GRE, or PRAXIS scores for content area exams.

Assistantships

A number of graduate assistantships are available for full-time students. The awards will normally be made by April 15 for the following academic year. Assistantship applications

should be completed by March 15. However, assistantships will be considered on an ongoing basis.

Degree Requirements

A total of 36 hours will be required for completion of the program, with at least 27 earned at The Graduate School of the College of Charleston. Courses must be selected from the following four categories:

- Fundamental Education Curriculum (9 semester hours)
- Fundamental Science and Mathematics Curriculum (at least 14 semester hours)
- Integrated Science Courses (6 semester hours)
- Capstone Experiences (at least 6 semester hours) including at least one formal presentation
- 75 hours of field experience

Fundamental Education Curriculum

(9 semester hours)

- EDFS 632* Learning Cognition and Motivation (3)
- EDFS 635* Educational Research (3)
- EDFS 660* Nature of Science, Mathematics, and Science/Mathematics Education (3)

**See EDFS section of the catalog for course description.*

Fundamental Science and Mathematics Curriculum

(At least 14 semester hours: a minimum of one mathematics course and two science courses must be taken in this category.)

Course Descriptions

SMFT 510 Introduction to Problem Solving (3)

A course designed primarily for elementary and middle-level teachers to investigate mathematics topics through problem-solving activities. Topics covered will include numeric and algebraic concepts and operations; patterns, relationships and functions; geometry and spatial sense and measurement. The NCTM Standards, NCTM Addenda Series and the South Carolina Mathematics Curriculum Framework will serve as a basis for the nature and content of activities. Graduate credit only. †

SMFT 511 Introduction to Probability and Statistics (3)

This course is designed primarily for elementary and middle-level teachers. The course will examine methods of statistical measurement and their uses and misuses in interpreting and describing data. The course also addresses variation, the underlying framework and application of basic probability distributions and inductive reasoning through probability. Graduate credit only. †

SMFT 514 Geometry for Elementary and Middle School Teachers (4)

This course will investigate plane and geometric shapes, transformations, lines and coordinate geometry and measurement. Students will investigate geometric formulas, theorems and simple proofs through a hands-on approach that includes developing geometric constructions, making models and using technology. †

SMFT 516 Applications Across the Mathematics Curriculum with Technology (3)

This course, intended for practicing middle and secondary school teachers, explores applications of mathematics which use geometry, trigonometry, probability and statistics, networks, matrices and

linear programming. We will develop practical classroom presentations of various applications, and integrate computer and graphing calculator activities into these classroom modules. Graduate credit only. † **

SMFT 518 Applications of Calculus for Teachers (4)

A course designed primarily for secondary science and math teachers to investigate applications of calculus in science and technology. Topics will include a review of limits, derivatives and integration techniques, as well as applications to physics, geology, chemistry, biology and technology. Investigative labs, utilizing data collection, and interdisciplinary projects will be major components of the course. Prerequisites: One undergraduate calculus course and the student teaches secondary science or mathematics. †

SMFT 523 Earth Science for Teachers (4)

This course will cover the fundamentals of earth science and its application to environmental issues. We will explore the history of Earth's formation and the dynamic processes that continue to shape and alter the Earth's surface. Discussion and hands-on activities will be geared toward the understanding of "how the Earth works," Earth's dynamic formation and metamorphosis and the interconnectedness of the solid Earth with the hydrosphere and atmosphere. Graduate credit only. †

SMFT 524 Space Science for Teachers (3)

This course will consist of two components: astronomy and comparative planetology. Students will learn the physical properties of the solar system and the geological characteristics of the planets and moons within the context of the origin of the solar system. Astronomy will be used to develop an understanding of stellar evolution and composition of the cosmos. Students will use acquired conceptual knowledge to develop classroom activities appropriate for middle and high school students. Teaching methods will include a variety of teaching methods appropriate for middle and high school classroom. **

SMFT 537 Topics in Botany for Teachers (4)

This course will focus on plant structure and physiology. The course will cover the evolution of diversity in the plant kingdom, processes of growth, reproduction and development and basic principles of plant ecology. The course will include workshops and field trips to help teachers translate content information into classroom activities. †

SMFT 538 Topics in Zoology for Teachers (4)

This course will provide an introduction to animal diversity with emphasis on South Carolina species and their habitats. It will address the anatomy and physiology of animals. The fundamental concepts of genetics and evolution will be introduced through appropriate model organisms. Graduate credit only. Prerequisite: One year of college biology or permission of the instructor. †

SMFT 540 Fundamentals of Physical Science (4)

The course will explore the creative nature of science, build observational and descriptive skills, discover laws of chemistry and physics, familiarize students with and use the tools of science (from meter sticks to computers) and develop instructional, hands-on activities for students appropriate for the K–8 classroom. Graduate credit only. †

SMFT 548 Atomic Theory of Matter from Lucretius to Quarks (4)

This course looks at milestones in the development of atomic theory as a means to understand the basic concepts of modern theories of the nature of matter and as a means to convey the dynamic nature of model building in science. Data that led to the atomic theory, the concept of energy states of atoms, the discovery of elemental materials and proposals as to the nature of the nucleus will be explored. Prerequisite: One year of teaching high school chemistry, physics or physical science; or one year of college chemistry or physics; or permission of the instructor. †

SMFT 555 Applications of Physics for Teachers: How Things Work (4)

This course will develop an understanding and appreciation of the concepts and principles of physics by examining objects of everyday experiences. Items such as a microwave oven, vacuum cleaner or elevator will be explored for the physics that makes them work. Historical and social perspectives of science will also be discussed. †

EDEE 670 Elementary Science Instruction (3)

A course for elementary teachers who have at least partial responsibility for science teaching. It focuses on comprehension and application of integrated science process skills using concepts from life, earth and physical science to teach them. †

† Courses in this program address national and state science and mathematics standards.

SMFT 697 Special Topics in Science or Mathematics for Teachers (1–4)

This is a one-semester course introduction to an advanced topic in science, integrated science or mathematics education.

NOTE: Since the content for this course is variable, it may be repeated for graduate credit. †

SMFT 698 Independent Study (1–6)

Independent study with coursework agreed upon between student and instructor. May be repeated up to a total of six (6) hours of credit.

Integrated Science Courses

(at least six semester hours)

EVSS 640 Earth Systems Science (3)

(See EVSS course descriptions)

EVSS 650 Energy Production and Resource Management (3)

(See EVSS course descriptions)

SMFT 516 Applications Across the Mathematics Curriculum with Technology (3)

This course, intended for practicing middle and secondary school teachers, explores applications of

mathematics which use geometry, trigonometry, probability and statistics, networks, matrices and linear programming. We will develop practical classroom presentations of various applications, and integrate computer and graphing calculator activities into these classroom modules. Graduate credit only. † **

SMFT 524 Space Science for Teachers (3)

This course will consist of two components: astronomy and comparative planetology. Students will learn the physical properties of the solar system and the geological characteristics of the planets and moons within the context of the origin of the solar system. Astronomy will be used to develop an understanding of stellar evolution and composition of the cosmos. Students will use acquired conceptual knowledge to develop classroom activities appropriate for middle and high school students. Teaching methods will include a variety of teaching methods appropriate for middle and high school classroom. **

SMFT 637 Biotechnology (4)

This course will cover approaches and techniques that are used in biotechnology. The structure of proteins and DNA will be reviewed and the importance of these molecules in biotechnology will be discussed. Techniques to be described in the course include gel electrophoresis, hybridization techniques and basic cloning techniques. Applications of these techniques will be discussed along with ethics issues raised by their use. Graduate credit only. Prerequisite: One year of college biology or one year of college chemistry or permission of the instructor. †

SMFT 639 Genetics and Molecular Biology for Teachers (3)

The course will introduce teachers to content and methodology necessary to effectively teach genetics and molecular biology at the high school level. Many of the topics may be suitable (or can be modified) for the middle school classroom. Topics addressed in the course will include Mendelian and chromosomal genetics, evolutionary genetics, molecular biology (the path from gene to protein), biotechnology and the ethical implications of this new technology.

Graduate students only. Prerequisite: One year of college biology. †

SMFT 645 The Physics of Force and Motion for Teachers (4)

The laws of force and motion will be examined in a lecture, discussion and laboratory environment. Students will enhance their skills employing logical and mathematical techniques to solve problems, using appropriate scientific equipment from meter sticks to computers, and develop teaching methods suitable for the K–8 classroom. Graduate credit only. †

SMFT 647 Determination of the Structure of Matter: Analytical Tools Employed Across the Science Curriculum (3)

The interaction of matter and light allows chemists, physicists, biologists, astronomers and geologists to study the nature of matter. This course will investigate the application of absorption and emission spectroscopy across a broad range of the electromagnetic spectrum, X-ray crystallography, laser technology and remote sensing developments to explore the nature of matter from the atomic level to galaxies. Each topic introduced will be related to the 9–12th curriculum and to the South Carolina standards. †

EDFS 703 Curriculum, Policy, and Systems in Science and Mathematics (3)

This course is designed to examine possible solutions to current problems in curriculum and policy within school systems in South Carolina. This course is designed to increase organizational and interpersonal skills that empower teachers to alter school climates and garner technical support while designing and implementing K–12 programs of excellence. Prerequisites: 15 hours credit in the SMFT program, or permission of the instructor. †

Capstone Experiences

(at least six semester hours)

Students have five basic options in choosing capstone credit experiences. They can choose from:

1. Take EDFS 703 and successfully complete all course requirements.

2. Take an extra course from the Fundamental Science and Mathematics Curriculum category, the Integrated Science category or an appropriate course not in the program, and do a suitable project in addition to the required coursework. Such capstone experiences require a proposal and steering committee approval. The student must make a presentation of the completed project at a professional meeting, teacher workshop, and/or session of capstone presentations attended by steering committee members and other interested parties.

3. Do an independent study project in science, mathematics or science or mathematics education. This, too, requires a proposal and steering committee approval. The student must make a presentation of the completed project at a professional meeting, teacher workshop, and/or session of capstone presentations attended by steering committee members and other interested parties.

4. Take one or more courses from an M.S. degree program offered by the School of Sciences and Mathematics at The Graduate School of the College of Charleston – environmental studies (but not EVSS 640 and EVSS 650, each of which counts in category B2), marine biology, or mathematics. The student must meet any course prerequisites. A written proposal to do this is not necessary.

5. Complete an informal education internship. The internship must be approved by the steering committee just as with options (2) and (3).

NOTE: Students must make at least one formal capstone experience presentation at a professional meeting, teacher workshop, or session of capstone presentations attended by steering committee members and interested parties.

† Courses in this program address national and state science and mathematics standards.

*** SMFT 516 and SMFT 524 can be applied to satisfy the required credit hours for either the Fundamental Science and Mathematics Curriculum or the Integrated Science Curriculum – not both.*

Field Experience Options

The SMFT program requires significant field experience prior to graduation. Students may acquire this experience in their own classroom, as a visitor in a classroom or in a non-classroom educational setting such as a museum or aquarium. The required field experiences in EDFSS 632 and 660 will be 25 hours each. The remaining required field experience will be attained by the development of an independent project, a class project, and/or a capstone project of the student's choice that is implemented in any of the above settings. Each student will complete at least 25 hours of field experiences to meet this requirement, and the total number of formal field experience hours across the program will be at least 75 hours.

The field experiences will be designed, implemented and evaluated by the candidate with written reports. These reports will be submitted to the project advisor. The proposal should include a detailed summary of the planned project (including lesson plans, worksheets or handouts) and the planned objective measures of success. The final field experience report should include a self-evaluation of the success of both the project and the presentation, and some objective measure of the success of the project. The project advisor must approve the candidate's proposal, the completed project and the self-evaluation. Prior to successful completion of the program, each candidate must prepare a Field Experience Portfolio for review by the SMFT steering committee that includes reports for all field experiences. Each report should include:

- Field Experience project
- Student's self-evaluation (including objective measures of success)
- Project advisor's evaluation (including evaluation for content, pedagogy, K-12 student learning, meeting of standards/benchmarks)

Program accreditation also requires the SMFT steering committee to evaluate the

effectiveness of the field experience requirement. To evaluate programmatic effectiveness, the steering committee will analyze the portfolios for strengths and weaknesses, and adjust the requirements to ensure the educational value of the field experiences across the program. The field experience requirement will be evaluated and updated as necessary to promote field experiences that are:

- Learning-focused (content rich, activity rich, non-redundant)
- Subject-centered (relevant, neither teacher nor student centered)
- Pedagogically appropriate (effective use of teaching practices, focused on K-12 learning or informal education)

MASTER OF SCIENCE IN ENVIRONMENTAL STUDIES

Program Description

The Master of Science in Environmental Studies program (M.E.S.) prepares students to deal with the complex nature of environmental issues through an interdisciplinary approach that capitalizes on the unique faculty and research strengths of The Graduate School of the College of Charleston. The faculty contributes through policy sciences, mathematics and the natural and physical science areas of biology, geology and physics.

Mission

The M.E.S. program provides students with an appreciation of the interdisciplinary nature

of environmental problems without sacrificing the training rigor of a specific academic discipline. The interdisciplinary emphasis is established through a carefully designed set of required courses that provide students with an understanding of environmental issues. The M.E.S. curriculum addresses these issues by teaching students the principles of basic scientific research; by giving students the tools to evaluate the potential environmental risks; and by helping students examine the role of public policy in environmental decision making.

Program of Study and Advisory Committee

A student's program of study consists of a list of coursework and other requirements that the student must complete to graduate from the M.E.S. program. Upon entering the program, each student is either appointed or selects an academic advisor. The academic advisor develops a program of study in consultation with the student, oversees student progress, and advises the student about his or her career and academic options. Later, the student will constitute a thesis or internship advisory committee.

Admissions

Admission to the M.E.S. program requires a baccalaureate degree from an accredited institution. Students with any major are encouraged to apply, but must have a sufficient background in either the natural and/or social sciences.

Minimum admissions requirements are listed below. Some applicants may not satisfy

all requirements. Every effort will be made to accommodate such applicants through preparatory classes at the College of Charleston. Exceptions can be made on an individual basis, depending on a candidate's background or experience.

The environmental studies program is governed by an environmental studies steering committee comprised of six members that represent the contributing departments.

Minimum Requirements

- An overall undergraduate GPA of 3.0 on a 4.0 scale
- The Graduate Record Examination General Test (GRE) is required for admission. A combined score of at least 1100 on the quantitative and verbal sections, and of at least 4 (out of 6) on the writing assessment section, is required. GRE scores submitted must have been earned within the previous five years. Applicants with older GRE scores may be required to retake the examination.
- Students must have undergraduate coursework in biology (two courses with labs), chemistry (two courses with labs), and statistics (one semester). One year of another physical or natural science may be substituted for either biology or chemistry. The admissions committee recognizes that some students with exceptional backgrounds and training in other areas – either another science or social science – may wish to enter the program. These students are encouraged to apply and will be considered on a case-

by-case basis, but should understand that they may be required to take one or more additional science courses. To be considered for admission, students must complete an M.E.S. application packet.

- To be considered for admission, students must complete an M.E.S. application packet. An application packet for the M.E.S. program can be obtained by written request to:

M.E.S. Program Coordinator
Environmental Studies Program
The Graduate School of the
College of Charleston
Charleston, S.C. 29424

Application Deadlines

fall semester.....April 1
spring semesterNovember 1

Degree Requirements

The Master of Science in environmental studies degree requires a minimum of 41 hours.

Each student is required to complete a sequence of core courses. Students select electives from a range of approved courses, according to their area of interest. Students are required to complete either a thesis or a six-hour research internship.

Core Courses

Students are required to take 24 credit hours of core courses as outlined below. The core courses fall into four categories: statistics, science, policy and case-based.

Statistics:

EVSS 659 Environmental Statistics

Policy:

EVSS 601 Economic Theory for Policy Analysis

EVSS 602 Public Policy

Science:

EVSS 610 Environmental Biology
or

EVSS 640 Earth Systems Science
or

EVSS 641 Aqueous Geochemistry
or

EVSS 650 Energy Production Resource Management

Case-Based:

EVSS 680 Case Studies in Environmental Issues

EVSS 646 Core Seminar

Thesis/Internship:

EVSS 690 Internship

or

EVSS 691 Thesis

Selected Course Descriptions

Due to the interdisciplinary nature of the program and the large number of EVSS courses, several elective courses are not included in the following list of courses. Please visit www.cofc.edu/~environ for full course descriptions and information.

EVSS 601 Economic Theory for Policy Analysis (3)

This course covers the application of microeconomic theories to the analysis of contemporary public sector issues, with an emphasis on environmental problems. Attention is given to the conceptual and practical problems associated with resource allocation decisions when there is conflict among efficiency, equity and limited information in policy making. The foundations of welfare economics and applications of cost-benefit analysis as they relate to specific environmental policies and programs are examined as well.

EVSS 602 Public Policy (3)

This course seeks to develop a firm understanding of the public policy-making process in the United States. Students study policy making through various perspectives on implementation. The roles of major institutions including the executive, legislative and judicial branches of government, the bureaucracy and interest groups in this process are addressed. Includes various perspectives and interpretations of policymaking, including incrementalism, rationalism, pluralism

and elitism. Selected areas of public policy, including transportation, poverty, energy and the environment are used to illustrate both the process and the different perspectives.

EVSS 605 Environmental Law and Regulatory Policy (3)

This course examines the development of environmental law and regulatory policy in the United States. It provides an overview of the scope and substance of environmental law and the various regulatory techniques they employ. Both criminal and civil litigation surrounding the implementation of environmental law are examined.

EVSS 607 Administrative Law (3)

A study of the legislative, adjudicatory, and general policy-making powers of administrative agencies and regulatory commissions, and the scope of judicial review of administrative action. The course is directed primarily toward an analysis of the political nature of the bureaucracy, and secondarily toward the procedural requirements for administrative policy making.

EVSS 608 Perspectives on Public Administration (3)

The study and practice of public administration in the United States in the 20th Century. This course examines the historical development of the field of public administration and current approaches to the study and practice of public administration.

EVSS 609 Administrative Ethics and Accountability (3)

A critical examination of the legal, political, professional, and organizational accountability demands made on administrators and their relationship to ethical decision making and ethical integrity.

EVSS 610 Environmental Biology (3)

This course emphasizes the application of fundamental toxicological and microbiological concepts to problems which exist in the real world. The course should prepare the student interested in environmental problems with the necessary practical information to make sound

judgments in assessing meaningful solutions to existing environmental problems.

EVSS 620 Physiology & Cell Biology of Marine Organisms (4)

A study of the regulatory mechanisms found in marine organisms especially as they relate to interactions between the organism and the environment. Mechanisms will be discussed at the organismal, organ-system, tissue and cellular levels.

EVSS 622 Ecology of Marine Organisms (4)

The study of living organisms in the marine environment population and community ecology, reproduction and life histories, productivity, evolution and biogeography. A broad overview of these elements is followed by detailed consideration of major coastal and oceanic ecosystems around the world.

EVSS 623 Physical Oceanography (4)

A study of the physics and chemistry of ocean and estuarine water, circulation, waves, and tides. Lecture and laboratory work will emphasize the interrelationships of physical, chemical, geological and biological processes in the sea.

EVSS 624 Biometry (4)

A broad treatment of statistics concentrating on specific statistical techniques used in biological research. Topics covered include sampling procedures and analysis of distributions (binomial, poisson, and normal), hypothesis testing and estimation with emphasis on analysis of frequencies, regression and correlation. Several nonparametric and multivariate methods are also discussed. Emphasis is on application of statistical techniques and not theory; therefore a knowledge of mathematics through calculus is expected.

EVSS 627 Marine Tetrapod Biology (4)

This lecture, laboratory, and field course emphasizes both the diversity and common themes of the physiological, behavioral, and anatomical adaptations that characterize certain lineages of reptiles, birds and mammals that exploit

a wide array of marine habitats. Highlighting the faunas of South Carolina, we will evaluate marine tetrapods as models for advanced studies in evolution, physiology, behavior, ecology and conservation.

Prerequisites: Ecology (BIOL 341) or its equivalent and at least one additional advanced biology course such as Genetics or Vertebrate Zoology.

EVSS 628 Plant Ecology (4)

Plant ecology will explore the population ecology of plants covering the genetic, spatial, age, and size structure of plant populations. The focus will be on understanding the origin of these different kinds of structures, understanding how they influence each other, and understanding why they change with time.

Prerequisite: General Ecology (BIOL 341) or permission of the instructor.

EVSS 629 Conservation Biology (3)

A course exploring the origin, maintenance, and preservation of biodiversity at all levels: genetic, population, community, ecosystem, and biosphere. The focus will be on applying ecological, genetic and evolutionary principles to problems in conservation. Optional field trips will make use of the rich biota of the Charleston area.

Prerequisites: BIOL 341 (General Ecology) and either BIOL 311 (Genetics) or BIOL 350 (Evolution), or permission of the instructor.

EVSS 633 Urban Planning (3)

This course is designed as a critical analysis of the practice of urban planning. The focus is on how planners identify, define, and approach housing, economic development and environmental issues in the context of the political arena.

EVSS 635 Land Use Law (3)

This course examines zoning and land use control in the United States and incorporates illustrations and cases from South Carolina in particular. It focuses on enabling legislation for local governments, regulation, the process of development, eminent domain, contract and conditional zoning and enforcement and violation of land use regulations.

EVSS 637 Wetlands Policy (3)

This course is intended to provide the student with a broad understanding of the social origins, philosophies and political, economic and cultural impacts of wetlands protection in the United States. Topics address the goals of and policymakers' approaches to wetlands protection.

EVSS 638 Introduction to Hydrogeology (4)

Introduction to quantitative nature of water flow within geologic media. Discuss the significance of water flow theory and the dynamics of many natural flow systems in geologic settings. Quantitative analysis of water resources in a decision-making format. Lectures three hours per week; laboratory three hours per week. *Prerequisites:* MATH 120 or 220 or equivalent; or permission of the instructor.

EVSS 639 Wetlands Hydrology and Biogeochemistry (3)

Introduction to water flow and biogeochemical processes in wetland systems. Discuss the significance of hydrology in wetlands and importance of biogeochemical cycles on water quality in wetlands. Quantitative analysis of water budgets and biochemical. Lectures and student-led seminars: three hours per week.

EVSS 640 Earth Systems Science (3)

This course investigates the interactions among the atmosphere, ocean, ice, solid-Earth, and biological systems. Students study the evolution of solid Earth, the formation of the atmosphere and oceans, and the origin of life. Rate and scale of changes of the Earth's environment are examined through an analysis of changing climates. Finally, the course examines human evolution and technological development to gain an understanding of human impacts on the global environment.

EVSS 641 Aqueous Geochemistry (4)

A quantitative study of equilibrium inorganic and organic geochemical reactions that control surface- and groundwater composition. Geochemical modeling methods will be used

to better understand the complex interactions between rock, sediment, and water.

EVSS 642 Geological Applications of Remote Sensing (4)

Course will cover the fundamentals and applications of remote sensing. Topics include: remote sensing theory, data collection, reduction and application, computer software tools, data acquisition and ties to geographic information systems (GIS). The course emphasis is on environmental problems.

Prerequisite: Background or experience in remote sensing, or GEOL 314.

EVSS 643 Environmental Geochemistry (4)

A quantitative study of isotopic and organic geochemistry in reference to geological systems. The utility of combining stable isotopic data for pathway processes and radiogenic isotopes as environmental tracers for inorganic and organic compounds will be emphasized.

EVSS 644 Quantitative Hydrogeology (3)

A comprehensive survey of the underlying theory and applications of quantitative techniques for assessing groundwater movement, contaminant transport and geochemical evolution. Emphasis will be placed on applied engineering methods for evaluating aquifer properties from well hydraulics, tracer studies, and laboratory experimentation. The methods will be employed to make engineering decisions concerning the groundwater resource in client-driven hypothetical and real-world scenarios.

Prerequisite: MATH 220, GEOL 338, or permission of the instructor.

EVSS 645 Coastal Issues and Processes (3)

This course provides an in-depth understanding of the coastal environment, including coastal policies and environmental issues that result from the activity of humans. Subjects include: origin of coastlines, physical processes, coastal hazards and coastal zone management.

EVSS 646 Graduate Core Seminar (1 hour per week, fall and spring)

Seminars on contemporary topics in environmental studies acquaint students with the variety of disciplines and techniques available to natural, physical, and policy scientists working in the environmental field. Designed especially to stimulate new-to-the-program students to choose their thesis topics and/or determine the focus of their program of study. One hour per week. *Prerequisite:* Status as a degree-seeking M.E.S. graduate student.

EVSS 649 Geographic Information Systems (4)

This course will cover spatial types and quality, data input operations, database management, data analysis, and software design concerns. We will also examine institutional and political concerns for using GIS. Computer-based GIS software (Unix, PC, and Mac) will be used throughout the course. *Prerequisite:* Some computer experience necessary.

EVSS 650 Energy Production and Resource Management (3)

A study of the nature of energy and scientific issues relating to its production, storage, distribution, and use from a physics perspective. Production methods to be studied include: hydroelectric, fossil fuel, fission, fusion, wind, photovoltaic, biomass and solar-dynamic. Scientific issues will be related to the cultural and philosophical framework surrounding energy infrastructure and policy.

EVSS 652 Introduction to Nuclear Physics (4)

An introduction to the theory of the nucleus including constituents of the nucleus; nuclear forces and structure; natural and induced radioactivity; properties of alpha, radiation with matter, including biological systems; particle accelerators; fission reactions; fusion reactions; and nuclear reactors. *Prerequisite:* One year of introductory physics and calculus.

EVSS 656 Atmospheric Science (4)

An introduction to the study of the Earth's atmosphere. Topics include composition and distribution of the components of the atmosphere,

atmospheric thermodynamics, synoptic meteorology, atmospheric aerosol, nucleation processes, microphysics of warm and cold clouds, cloud morphology, violent storms and artificial modification of clouds and precipitation.

EVSS 657 Satellite Meteorology (3)

Satellite meteorology is the measurement of weather by sensors aboard Earth-orbiting satellites. Topics include satellite orbits and navigation; electromagnetic radiation; instrumentation; image interpretation; atmospheric temperature; winds, clouds, precipitation and radiation.

EVSS 658 Climate Change (4)

An introduction to the study of the physics of the Earth's climate. Topics include climatic classification, the spectrum of radiation, absorption, scattering, transmission, radiation, the tropospheric balance, the energy balance at the Earth's surface, time variations in the energy balance, the atmospheric transport of energy, the atmosphere as a heat engine, CFCs and stratospheric ozone, the carbon cycle, other greenhouse gases, climate heating, integrated assessment of models and human activities affecting climate change. In addition, some of the policy issues associated with such human activities will be addressed.

EVSS 659 Environmental Statistics (3)

This course provides an introduction to environmental statistics and risk assessment. Topics include probability, correlation, regression, hypothesis testing, analysis of variance, model testing, residual analysis, and nonparametric models. Environmental applications will be provided throughout the course.

Prerequisite: Math 250: Statistical Methods I (or an equivalent college-level statistics course) or pass an entrance exam.

EVSS 670 Environmental Chemistry (3)

This course is an introduction to the chemistry of natural systems with an emphasis on marine and coastal problems. The cycling of chemical species, the effect of manmade inputs and environmental analytical methodology will be stressed.

EVSS 674 Environmental Analytical Chemistry (3)

A course stressing the applications of analytical chemistry to environmental problems. Spectroscopic, chromatographic, and classical analytical methodologies are discussed. Certification requirements for data, quality assurance of laboratory measurements, laboratory information management systems (LIMS) and report writing are discussed in the framework of the analytical laboratory.

EVSS 680 Case Studies in Environmental Issues (4)

This course investigates specific case studies. Case studies impart a unique opportunity to explore basic principles of biology, chemistry, geology and physics through practical applications. This approach to problems will be similar to that used by the practitioners of science and public policy.

EVSS 690 Internship (3 or 6)**EVSS 691 Thesis (3 or 6)****EVSS 693 Independent Study (1–4)**

A directed study of an environmental issue in the area of policy or science. Topic and project outline must be approved by the Program of Study Committee. Repeatable up to six hours toward graduation.

EVSS 695 Special Topics in Environmental Studies (3–4)**EVSS 720 Aquatic Toxicology (4)**

An introduction to assessing the effects of toxic substances on aquatic organisms and ecosystems. Topics include general principles of toxicology, fate and transport models, quantitative structure-activity relationships, single-species and community-level toxicity measures, regulatory issues and career opportunities. Examples will be drawn from marine, freshwater and brackish-water systems.

EVSS 721 Aquaculture (3)

Principles and techniques of aquaculture, with emphasis on warm-water species that spend all or part of their lives in salt water. Status and potential of aquaculture, including discussions of established and candidate species. Design and management of aquaculture systems. Importance

of water quality, feeding, and nutrition; diseases and predators; genetics and breeding; and economic considerations in aquaculture.

EVSS 722 Marine Invertebrate Zoology (4)

A study of the functional morphology, life history, systematics, evolution and other selected aspects of the biology of marine invertebrates.

EVSS 723 Biology of Crustacea (4)

A study of the biology of crustacean arthropods. Topics include evolution, taxonomy, functional morphology, physiology, embryology, ecology, behavior, commercial management and aquaculture.

EVSS 724 Ichthyology (4)

A study of fishes, emphasizing diversity and evolution, morphology, physiology, ecology, life histories, behavior, systematics and biogeography. Laboratory work will focus on groups important in the local fauna.

EVSS 725 Marine Botany (4)

Introduction to taxonomy, morphology, phylogeny and ecology of marine plants. Major groups of planktonic and benthic algae and vascular plants from the coast of South Carolina are studied.

EVSS 726 Fisheries Science (3)

A general introduction to methods of harvesting aquatic resources and collection and evaluation of biological data to effectively manage these resources. Topics include age and growth analysis; mortality, recruitment, and yield; production and early life history; stock assessment techniques; and a detailed study of certain important fisheries.

COLLEGE OF CHARLESTON BOARD OF TRUSTEES

College of Charleston Board of Trustees

The Board of Trustees of the College of Charleston is composed of 17 members. Fifteen are elected by the General Assembly (two from each Congressional District and three at-large), one appointed by the governor, and one by the governor or his designee.

SKINNER, Emily, Assistant Professor, Ed.D., Columbia

University Teachers College. Elementary and Early Childhood Education (CofC)

SKINNER, Michael E., Professor, Ph.D., Ohio State University. Foundations and Special Education (CofC)

SWANSON, Julie D., Associate Professor, Ph.D., University of South Carolina. Foundations and Special Education (CofC)

VAN SICKLE, Meta L., Interim Chair, Professor, Ph.D., University of South Florida. Foundations and Secondary Education (CofC)

VEAL, William, Assistant Professor, Ph.D., University of Georgia, Athens. Elementary and Early Childhood Education (CofC)

VOORNEVELD, Richard B., Associate Professor, Ph.D., University of Florida. Foundations and Special Education (CofC)

WALLACE, Ann, Associate Professor, Ph.D., University of Maryland. Elementary and Early Childhood Education (CofC)

WELCH, Frances C., Professor, Ph.D., University of South Carolina. Foundations, Secondary, and Special Education (CofC)

English Program

ALLEN, David G., Professor, Ph.D., Duke University. Medieval British; English language; contemporary American poetry (The Citadel)

ARTILES, Erica, Assistant Professor, Ph.D., Purdue University. British Renaissance (CofC)

BERNSTEIN, Jennifer, Assistant Professor, Ph.D., The Graduate Center of the City University of New York. Colonial American (The Citadel)

BIRREER, Doryjane Assistant Professor, Ph.D., Washington State University. Contemporary British literature (CofC)

BOWERS, Terence N., Associate Professor, Ph.D., University of Chicago. 18th-century British (CofC)

BRUNS, John, Assistant Professor, Ph.D., University of Southern California. Film studies (CofC)

CALLOWAY, Licia M., Associate Professor, Ph.D., University of Michigan. African American literature (The Citadel)

CARENS, Tim, Associate Professor, Ph.D., New York University. Victorian (CofC)

CARLSON, Larry A., Professor, Ph.D., Pennsylvania State University. American literature; fiction; modern poetry (CofC)

DAVIS, Carol Ann, Associate Professor, M.F.A., University of Massachusetts. Creative writing (CofC)

DEVET, Bonnie D., Professor, Ph.D., University of South Carolina. Rhetoric and composition (CofC)

DUVALL, J. Michael, Assistant Professor, Ph.D., University of Maryland. 19th- and early-20th-century

American literature (CofC)

EICHELBERGER, Julia L., Professor, Ph.D., University of North Carolina at Chapel Hill. African American literature; Southern literature; contemporary American poetry (CofC)

FARRELL, Susan, Professor, Ph.D., University of Texas. Contemporary American literature; women's literature (CofC)

FRAME, E. Frances, Associate Professor, Ph.D., University of South Carolina. 19th-century British; humanities and computing (The Citadel)

FRANCIS, Conseula, Assistant Professor, Ph.D., University of Washington. African American literature (CofC)

FRAZIER, Valerie, Assistant Professor, Ph.D., University of Georgia. African American literature (CofC)

HEUSTON, Sean, Assistant Professor, Ph.D., Vanderbilt University. Modernist poetry (The Citadel)

HORAN, Thomas, Assistant Professor, Ph.D., University of North Carolina. Modern British (The Citadel)

HUNT, Bishop C., Professor, Ph.D., Harvard University. British Romantic; poetry (CofC)

HUNT, Caroline C., Professor, Ph.D., Harvard University. British Renaissance; adolescent (CofC)

HUTCHISSON, James M., Professor, Ph.D., University of Delaware. 19th-century American (The Citadel)

KELLY, Joseph P., Professor, Ph.D., University of Texas. Modern British; Irish literature (CofC)

LALLY, Margaret M., Associate Professor, Ph.D., Case Western Reserve University. 20th-century British and American; creative writing (The Citadel)

LEON, Philip W., Professor, Ph.D., Vanderbilt University. 20th-century American; adolescent (The Citadel)

LEONARD, James S., Professor, Ph.D., Brown University. Literary criticism; 19th-century American; 20th-century American (The Citadel)

LEWIS, Simon K., Associate Professor, Ph.D., University of Florida. World literature (CofC)

LIVINGSTON, Michael, Assistant Professor, Ph.D., University of Rochester. Medieval literature (The Citadel)

LUCAS, Scott, Associate Professor, Ph.D., Duke University. British Renaissance (The Citadel)

MAILLOUX, Peter, Associate Professor, Ph.D., University of California at Berkeley. 20th-century American and European fiction; composition (The Citadel)

MECKLENBERG-FAENGER, AMY, Assistant Professor, Ph.D., Ohio State University. Composition (CofC)

PEEPLER, Scott, Associate Professor, Louisiana State University. American literature (CofC)

PIEPMEIER, Alison, Assistant Professor, Ph.D., Vanderbilt University. 19th-century American women's

writing; third wave feminism (CofC)

RHODES, Jack R., Professor, Ph.D., University of South Carolina. British romantic; continental (The Citadel)

SEAMAN, Myra, Associate Professor, Ph.D., Claremont Graduate School. Medieval literature; English language (CofC)

SOLINGER, Jason, Assistant Professor, Ph.D., Brown University. 18th-century British (The Citadel)

THOMAS, Catherine, Assistant Professor, Ph.D., Pennsylvania State University. British Renaissance (CofC)

THOMPSON, Thomas C., Associate Professor, Ph.D., Florida State University. Composition and rhetoric (The Citadel)

VARALLO, Anthony, Assistant Professor, Ph.D., University of Missouri-Columbia. Creative writing (CofC)

WARD, Patricia H., Professor, Ph.D., University of North Carolina at Chapel Hill. Medieval literature; English language (CofC)

WARNICK, Christopher, Assistant Professor, Ph.D., University of Pittsburgh. Composition and rhetoric (CofC)

WHITE, Robert A., Professor, Ph.D., University of Kansas. British Renaissance (The Citadel)

Environmental Studies Program

Members of the environmental studies faculty come from a wide variety of disciplines and from a number of institutions. All have faculty status at The Graduate School of the College of Charleston.

MES Biology

COLEMAN, Mark, Ph.D., University of Washington. Forest resources (Center for Forested Wetlands)

CULVER, Mary, Ph.D., University of Washington. Remote sensing, marine education, coastal biological

DELORENZO, Marie, Ph.D., Clemson University. Estuaries, microbial food web, pesticides, nutrients, mesocosms, South Florida (NOAA NOS)

DUFAULT, Robert, Ph.D., Kansas State University. Vegetable and small fruit physiology and culture. (Clemson Coastal Research Center)

FARNHAM, Mark, Ph.D., University of Minnesota. Plant breeding and genetics, biodiversity, and integrated pest management (USDA Vegetable Laboratory)

FERY, Richard, Ph.D., Purdue University. Plant genetics (USDA Vegetable Laboratory)

FISH, Thomas, Ph.D., University of Minnesota. Conservation biology (NOAA Coastal Services Center)

GUSTAFSON, Danny, Ph.D., Southern Illinois University. Plant molecular ecology (Citadel)

HILLENIUS, Willem, Ph.D., Oregon State University. Vertebrate paleobiology (CofC)

HUGHES, Melissa, Ph.D., Duke University. Communication, sexual selection, mating behavior and aggression in animals (CofC)

JONES, Stephen, M.Sc., Clemson University. Coastal habitat and inhabiting biological populations (South Carolina Coastal Ecosystems Program)

LEVI, Amnon, Ph.D., Michigan State University. Plant genetics (USDA Vegetable Laboratory)

MAY, Harold, Ph.D., Virginia Tech. Environmental microbiology (MUSC)

MCMILLAN, JoEllyn, Ph.D., Texas A & M University. Toxicology (MUSC)

MORRIS, Pamela, Ph.D., Michigan State University. Microbial degradation of contaminants (MUSC)

MORRISON, Susan, Ph.D., Florida State University. Estuarine and marine microbiology (CofC)

MURREN, Courtney, Ph.D., University of Connecticut. How species exist and develop outside of their natural range (CofC)

RAMSDELL, John, Ph.D., University of California, San Francisco. Cell biology, growth mechanisms, marine toxins (MUSC)

RUTTER, Matthew, Ph.D., Duke University. Evolutionary biology, genetics (CofC)

SCHOLTENS, Brian, Ph.D., University of Michigan. Plant-insect interactions and the faunistics and systematics of the Lepidoptera (CofC)

SHEPARD, Eleanor, Ph.D., Clemson University. Molecular techniques; Invertebrate Pathology. (Hollings Marine Laboratory)

SOTKA, Eric, Ph.D., UNC Chapel Hill. Ecology and evolution of marine biotic interactions, larval dispersal, molecular ecology, chemical ecology. (CofC)

SPENCE, Lundie, Ph.D., North Carolina State University. Water quality, constructed wetlands, non-point source pollution (SC Sea Grant Consortium)

STRAND, Allan, Ph.D., New Mexico State University. Plant evolutionary biology; demography; molecular ecology, conservation genetics (CofC)

THIES, Judy, Ph.D., University of Minnesota. Plant pathology; root-knot nematode resistance (USDA Vegetable Laboratory)

TRETTIN, Carl, Ph.D., North Carolina State University. Carbon and nutrient cycling in forested wetland landscapes, forest hydrology, and water quality (Center for Forested Wetlands)

MES Chemistry

BROWN, Stacy, Ph.D., University of Georgia. Hydrocarbons in the environment. (The Citadel)

KINARD, Frank, Ph.D., USC. Environmental chemistry (CofC)

LEDBETTER, JR., John, Ph.D., Duke University. Short-lived enzyme transients, laser-induced biochemistry, protein dynamics, radicals (MUSC)

REED, Lou Ann, Ph.D., MUSC. Toxicokinetic/pharmacokinetic studies of xenobiotics in aquatic species (NOAA NOS)

SULLIVAN, Joann, Ph.D., University of South Carolina. Infrared and Raman spectroscopy. (MUSC)

MES Economics

BARON, Sy, Ph.D., Columbia University. Energy.

BLACKWELL, Calvin, Ph.D., University of New Mexico. Public goods (CofC)

SNYDER, Marcia, M.S., Troy State University, M.S., University of London. Healthcare, environment, and pedagogy (CofC)

MES Geology

AMATYA, Devendra, Ph.D., NC State University. Watershed planning (Center for Forested Wetlands)

BEUTEL, Erin, Ph.D., Northwestern University. Structural Geology and Tectonics (CofC)

CALLAHAN, Tim, Ph.D., New Mexico Institute of Mining and Technology. Hydrogeology (CofC)

CAREW, James, Ph.D., University of Texas at Austin. Carbonate Petrology and Paleogeology (CofC)

COLGAN, Mitchell, Ph.D., University of California, Santa Cruz. Climatology and environmental issues (CofC)

DOYLE, Briget, Ph.D., University of Missouri. Geohazards; GIS. (CofC)

FRONABARGER, Kem, Ph.D., University of Tennessee. Igneous petrology and micropaleontology (CofC)

HITCHCOCK, Dan, Ph.D., University of Georgia. Water quality (USDA Forest Service)

JAUME, Steven, Ph.D., Columbia University. Seismology and earthquake hazards (CofC)

KATUNA, Michael, Ph.D., UNC Chapel Hill. Sedimentology and coastal plain stratigraphy (CofC)

LEVINE, Norm, Ph.D., Purdue University. Remote sensing, mineralogy, planetary geology (CofC)

NUSBAUM, Robert, Ph.D., University of Missouri-Rolla. Volcanology, remote sensing, mineralogy and planetary geology (CofC)

RHODES, Elizabeth, M.S., College of Charleston. Coastal geology and environmental geoscience. (CofC)

RUNYON, Cassandra, Ph.D., University of Hawaii. Planetary geology, geomorphology, volcanology, using remote sensing, GIS (CofC)

SAUTTER, Leslie, Ph.D., USC. Marine geology, micropaleontology, and geological education (CofC)

VULAVA, Vijay, Ph.D., Swiss Federal Institute of

Technology in Zurich. Dissolution, transport, and bioavailability of coal tar contaminants in surface and groundwater environments. (CofC)

WADDILL, Dan, Ph.D., Virginia Tech. Soils and groundwater remediation projects (SD NAVFAC)

MES Marine Biology

ANDERSON, JR., William, Ph.D., University of South Carolina. Systematics of fishes, particularly percoids; history of natural history (CofC)

BOYLES, JR., Robert, M.S., University of Delaware. Marine policy (SC DNR)

BURNETT, Karen, Ph.D., University of South Carolina. Comparative immunology, environmental immunology (MUSC)

BURNETT, JR., Louis, Ph.D., University of South Carolina. Environmental animal physiology of marine organisms; respiration, ionic regulation, acid-base regulation (CofC)

COEN, Loren, Ph.D., University of Maryland, College Park. Marine ecology, invertebrate zoology, shellfish biology, habitat restoration & functioning (MRRRI)

COLLINS, Mark, Ph.D., University of Florida. Reef, coastal pelagic, estuarine and anadromous fishes. (SC DNR)

DILLON, JR., Robert, Ph.D., University of Pennsylvania, Philadelphia. Genetics, evolution and ecology of mollusks (CofC)

DITULLIO, Giacomo, Ph.D., University of Hawaii. Marine phytoplankton ecology (CofC)

DUSTAN, Phillip, Ph.D., SUNY Stony Brook. Caribbean reef-building corals and coastal hardbottom communities (CofC)

FAIR, Patricia, Ph.D., Clemson University. Biochemistry of marine lipids, toxicology (NOAA NOS)

GALLOWAY, Sylvia, Ph.D., MUSC. Marine biomedicine, marine resource management (NOAA NOS)

GOOCH, Janet, Ph.D., Mississippi State University. Microbiology; ecotoxicology. (NOAA NOS)

HADLEY, Nancy, M.S., College of Charleston. Oyster reef studies; oyster restoration (SC DNR)

HAROLD, Antony, Ph.D., Memorial University of Newfoundland. Phylogenetic systematics, biogeography and life history of marine and freshwater fishes (CofC)

HOLLAND, Fred, Ph.D., University of South Carolina. Integrated environmental assessments, watershed-aquatic system linkages. (NOAA)

HYLAND, Jeffrey, Ph.D., University of Rhode Island. Marine benthic ecology, ecotoxicology, animal-sediment/pollution interactions, integrative assessments of coastal ecosystem health (MRRRI)

KEY, Peter, Ph.D., USC Columbia. Aquatic toxicology of insecticides (NOAA NOS)

McFEE, Wayne, M.S., Northeastern University. Marine

mammalogy. (NOAA NOS)

MORTON, Steve, Ph.D., Southern Illinois University. Marine ecology (NOAA NOS)

OLMI, Geno, Ph.D., William and Mary. Estuarine and coastal ecology and management. (NOAA)

PLANTE, Craig, Ph.D., University of Washington. Benthic ecology; the influence of animal-microbe interactions on biogeochemical processes, microbial ecology, and the evolution of invertebrate-microbe associations (CofC)

SANDIFER, Paul, Ph.D., University of Virginia. Coastal issues; Marine policy and management (NOAA)

SANGER, Denise, Ph.D., University of South Carolina. Ecotoxicology. (SC DNR)

SCHWACKE, Lori, Ph.D., MUSC. Biometry and Epidemiology (NOAA NOS)

SCOTT, Geoffrey, Ph.D., University of South Carolina. Ecotoxicology. (SC DNR)

SEDBERRY, George, Ph.D., College of William and Mary. Marine fisheries, reef ecology, deep-sea biology (MRRRI)

SMITH, Theodore, Ph.D., University of Miami. Culture of marine finfishes and crustaceans (SC DNR)

VAN DOLAH, Robert, Ph.D., University of Maryland. Benthic ecology, toxicology, environmental assessment (SC DNR)

WENNER, Elizabeth, Ph.D., College of William and Mary. Marine ecology, crustacean biology (MRRRI)

WHITAKER, David, M.S., University of Charleston, S.C. Crustacean fisheries resource research (SC DNR)

WILBER, Pace, Ph.D. Florida State University. Ecology; GIS (NOAA CSC)

WILDE, Susan Bennett, Ph.D., University of Georgia. Epiphytic cyanobacteria and aquatic macrophytes. (Baruch)

ZOLMAN, Eric, M.S., University of Charleston, S.C. Marine mammals (NOAA NOS)

MES Mathematics

CALINI, Annalisa, Ph.D., University of Arizona. Integrable PDEs and dynamical systems (CofC)

CAVENY, Deanna, Ph.D., University of Colorado. Number theory (CofC)

HARRISON, Gary, Ph.D., Michigan State University. Mathematical modeling of ecological and environmental systems (CofC)

JONES, Martin, Ph.D., Georgia Institute of Technology. Stochastic processes, optimal stopping theory, extreme value theory, bandit processes (CofC)

NORTON, Robert, Ph.D., Oklahoma State University. Statistical Process Control (CofC)

YOUNG, James, Ph.D., University of California, Berkeley. Stochastic processes and dynamical

systems (CofC)

MES Philosophy

HETTINGER, Ned, Ph.D., University of Colorado at Boulder. Environmental philosophy; ethics, social and political philosophy (CofC)

KELLER, JR., Albert, D. Min., Princeton Theological Seminary. The moral dimensions of globalization (MUSC)

MES Physics

DUKES, Robert, Ph.D., University of Arizona. Climate change (CofC)

HAKKILA, Jon, Ph.D., New Mexico State University. Gamma-ray bursts, peculiar abundance stars and multi-wavelength observational astronomy (CofC)

LINDNER, Lee, Ph.D., University of Colorado, Boulder. Meteorology (CofC)

MILLS, Laney, Ph.D., Louisiana State University. Atmospheric science (CofC)

NEFF, James, Ph.D., University of Colorado. Solar and stellar physics; magnetospheric and atmospheric physics; energy production and policy (CofC)

RYAN, Michael, Ph.D., Georgia Institute of Technology. Occupational radiation dosimetry, radiological and environmental health physics and radiation protection (MUSC)

WRAGG, Jeff, Ph.D., University of Missouri-Columbia. Physics (CofC)

MES Political Science

CREED, John, Ph.D., USC. International environmental policy (CofC)

DAVIS, Braxton, Ph.D., University of Rhode Island. Coastal planning and management programs (USC)

DESROSIERS, Megan, M.A., Brown University. Energy, transportation, water supply. (Coastal Conservation League)

DeVOE, M. Richard, M.M.A., University of Rhode Island. Coastal and marine policy. (SC Sea Grant Consortium)

FELTS, Arthur, Ph.D., Pennsylvania State University. Public administration and public policy (CofC)

FORD, Lynne, Ph.D., University of Maryland. American politics (CofC)

HALFACRE, Angela, Ph.D., University of Florida. Environmental and regulatory policymaking, coastal and wetlands policy, environmental justice, environmental risk perception and communication (CofC)

HURLEY, Patrick, Ph.D., University of Oregon. Human environment interactions and environmental politics (CofC)

JOS, Phillip, Ph.D., USC. Problem definition and political power (CofC)

LIU, Guoli, Ph.D., SUNY Buffalo. International politics (CofC)

MILLS, Lindeke, J.D., Georgetown University. Environmental law and regulatory policy (CofC)

RABI, Marcela, M.A., American University. International Development (CofC)

RECKSIEK, Heidi, M.E.M., M.P.P., Duke University. Coastal management and Marine Protected Areas (NOAA)

TOMPkins, Mark, Ph.D., University of Minnesota. Public policy. (University of South Carolina)

MES Sociology

BURKETT, Tracy, Ph.D., USC. Research methods, political sociology, network analysis (CofC)

MCCARTHY, Deborah, Ph.D., Northeastern University. Interconnections between social, economic, environmental, and public decision making issues (CofC)

Historic Preservation Program

MCSTOTTS, Jennifer, J.D./M.S., University of Georgia. Law and economics (CofC)

MULDROW, Ralph, M.Arch./M.S., University of Pennsylvania. Architectural history and conservation (CofC)

ROBBINS, Ashley, M.Arch., University of Notre Dame. Preservation studio, theory and materials analysis (Clemson University)

History Program

BAH, M. Alpha, Professor, Ph.D., Howard University. BAH, M. Alpha, Professor, Ph.D., Howard University. Africa (CofC)

BARRETT, Michael B., Associate Professor, Ph.D., University of Massachusetts. Modern Germany, Europe (The Citadel)

BISHOP, Jane C., Associate Professor, Ph.D., Columbia University. Ancient, Medieval, and Byzantine (The Citadel)

BODEK, Richard H., Associate Professor, Ph.D., University of Michigan. Modern Germany, European social and labor (CofC)

BOUCHER, Christophe J. M., Associate Professor, Ph.D., University of Kansas. Native American, American West, Atlantic World (CofC)

BRANA-SHUTE, Rosemary A., Associate Professor, Ph.D., University of Florida. Latin America, Caribbean, slavery (CofC)

CARMICHAEL, Timothy, Assistant Professor, Ph.D.,

Michigan State University. African, Islam in Africa (CofC)

COATES, Timothy J., Associate Professor, Ph.D., University of Minnesota. Latin America (CofC)

COX, Marcus, Assistant Professor, Ph.D., Northwestern; African-American (The Citadel)

COY, Jason, Assistant Professor, Ph.D., University of California, Los Angeles; Early Modern Europe (CofC)

DIAMOND, Jeffrey, Assistant Professor, Ph.D., University of London. South Asia, British Empire (CofC)

- OWENS, David William, Ph.D., University of Arizona. Sea turtle behavior, physiology and ecology (CofC)
- PEDEN-ADAMS, Margie M., Ph.D., Clemson University. Environmental toxicology (MUSC)
- PENNINGTON, Paul L., Ph.D., University of South Carolina. Marine and estuarine ecotoxicology (Natl. Ocean Svc. – Charleston Lab)
- PETERS, John S., M.S., College of Charleston. Age and growth of fishes (CofC)
- PLANTE, Craig J., Ph.D., University of Washington. Microbial ecology, benthic ecology, the influence of animal-microbe interactions on biogeochemical processes, and the role of autoinduction in the development of marine biofilms (CofC)
- PODOLSKY, Robert D., Ph.D., University of Washington. Functional biology and evolutionary ecology of marine invertebrates; larval ecology and life-history evolution; fertilization ecology; physiological ecology; phenotypic plasticity (CofC)
- POST, William, Ph.D., North Carolina State University. Ornithology; coastal avian ecology (The Charleston Museum)
- PRITCHARD, Seth, Ph.D., Auburn University. Plant physiological ecology (CofC)
- RAMSDELL, John S., Ph.D., University of California, San Francisco. Toxicology of algal derived toxins, mechanism of toxin action (NOAA)
- REICHERT, Marcel J.M., Ph.D., University of Groningen. Fish ecology, fisheries science (SCDNR, MRD)
- ROSENBLUM, Paul M., Ph.D., Boston University. Fish endocrinology, reproduction, and nutrition (The Citadel)
- ROUMILLAT, William A., M.S., Old Dominion University. Biology of fishes (MRRI)
- SANCHO, Gorka, Ph.D., Massachusetts Institute of Technology/Woods Hole Oceanographic Institution. Behavioral ecology of fishes, fisheries conservation (CofC)
- SANDIFER, Paul A., Ph.D., University of Virginia. Biology of decapod Crustacea, aquaculture, coastal ecology (MRRI)
- SANGER, Denise M., Ph.D., University of South Carolina. Impacts of human land use, benthic ecology, water quality, sediment chemistry, and toxicology (MRRI)
- SAUTTER, Leslie R., Ph.D., University of South Carolina. Biological oceanography, marine phytoplankton ecology, marine geology (CofC)
- SCHOLTENS, Brian G., Ph.D., University of Michigan, Ann Arbor. Ecological models of plant-insect interactions (CofC)
- SCHWACKE, Lori H., Ph.D., Medical University of South Carolina. Development and application of mathematical and computer models for the analysis of marine mammal health data (Natl. Ocean Svc. – Charleston Lab)
- SCOTT, Geoffrey I., Ph.D., University of South Carolina. Aquatic toxicology (Natl. Ocean Svc. – Charleston Lab)
- SEDBERRY, George R., Ph.D., College of William and Mary. Community population and trophic ecology of marine fishes, coral reef biology, fisheries biology (MRRI)
- SEGARS, Al, DVM, University of Georgia. Health/population assessment in marine turtles (MRRI)
- SIEWICKI, Thomas C., Ph.D., University of South Carolina. Environmental toxicology, environmental modeling, risk assessment (NOAA)
- SMITH, Theodore I.J., Ph.D., University of Miami. Aquaculture of crustaceans and fish, fisheries biology (MRRI)
- SOTKA, Erik, Ph.D., University of North Carolina at Chapel Hill. Ecology and evolution of marine biotic interactions, larval dispersal, molecular ecology, chemical ecology (CofC)
- STEWART, Jill R. Ph.D., University of North Carolina-Chapel Hill. Water-quality research, with a concentration on detecting and tracking microbial pollution in coastal environments (NOS-CCEHBR)
- STRAND, Allan E., Ph.D., New Mexico State University. Molecular ecology, evolution, and demography of plants (CofC)
- VAN DOLAH, Frances M., Ph.D., Medical University of South Carolina. Functional genomics of toxic dinoflagellates; effects of algal toxins on marine mammals and human consumers (Natl. Ocean Svc. – Charleston Lab)
- VAN DOLAH, Robert F., Ph.D., University of Maryland. Benthic ecology, toxicology, environmental assessment, invertebrate community structure, population dynamics (MRRI)
- WALTERS, Keith, Ph.D., University of South Florida. Marine ecology, habitat restoration, marine snow dynamics, plant-animal interactions, meiofauna (Coastal Carolina University)
- WARR, Gregory W., Ph.D., University of London, England. Structure and expression of fish antibody genes (MUSC)
- WEINSTEIN, John E., Ph.D., University of South Carolina. Environmental toxicology; physiological ecology and toxicology of invertebrates and fish (The Citadel)
- WENNER, Charles A., Ph.D., College of William and Mary. Ichthyology, ecology of deep water fishes, fisheries biology (MRRI)
- WENNER, Elizabeth L., Ph.D., College of William and Mary. Crustacean biology, marine and estuarine invertebrate and fish communities (MRRI)
- WHITAKER, J. David, M.S., College of Charleston. Crustacean fisheries resource research (MRRI)
- WILBER, Dara, Ph.D., Florida State University. Ecological impact assessment in the marine and estuarine environment.
- WILBER, Pace, Ph.D., Florida State University. Geographical information systems (NOAA Coastal Service Center)
- WIRTH, Edward F., Ph.D., University of South Carolina. Effects of pesticides on crustaceans, particularly reproduction and physiology (Center for Coastal Environmental Health and Biomolecular Research, Natl. Ocean Svc. Charleston Lab)
- WISEMAN, D. Reid, Ph.D., Duke University. Coastal and marine botany (CofC)
- WOODLEY, Cheryl M., Ph.D., Medical University of South Carolina. The application of biochemistry, molecular and cellular biology to understanding the effects of biotic and abiotic stressors on ecosystem health (Natl. Ocean Svc. – Charleston Lab)
- WYANSKI, David M., M.S., College of William and Mary. Biology and taxonomy of marine fishes, fisheries biology (MRRI)
- ZARDUS, John D., Ph.D., Northeastern University. Evolution and ecology of commensal barnacles (The Citadel)
- ZIMMERMAN, Anastasia M., Ph.D., Washington State University. Molecular evolution of the vertebrate immune system; genome-wide analyses of innate and adaptive immune loci in fishes; use of the zebrafish as an immunological model (CofC)

Mathematics Program

- CALINI, Annalisa, Associate Professor, Ph.D., University of Arizona. Geometric aspects of integrable systems, nonlinear partial differential equations, chaos in finite and infinite dimensional dynamical systems, mathematical physics. (CofC)
- CARTER, James, Associate Professor, Ph.D., University of Illinois, Champaign-Urbana. Algebraic number theory (CofC)
- CAVENY, Deanna, Associate Professor, Ph.D., University of Colorado, Boulder. Transcendental number theory (CofC)

CHEN, Mei Q., Professor, Ph.D., University of Illinois. Numerical linear algebra and optimization (The Citadel)

CLEAVER, Charles, Professor, Ph.D., University of Kentucky. Functional analysis (The Citadel)

COHN, Leslie, Associate Professor, Ph.D., University of Chicago. Algebra (The Citadel)

COMER, Stephen, Professor, Ph.D., University of Colorado. Universal algebra (The Citadel)

COX, Ben, Associate Professor, Ph.D., University of California, San Diego. Representation Theory; Infinite Dimensional Lie Algebras (CofC)

DIAMOND, Beverly, Professor, Ph.D., University of Manitoba. Topology, dynamical systems (CofC)

DURGUN, Kanat, Associate Professor, Ph.D., Syracuse University. Numerical analysis (The Citadel)

ENGLAND, Michael Rohn, Senior Instructor, Ph.D., University of Virginia. Nonlinear elasticity, shell theory (CofC)

GOLIGHTLY, William L., Associate Professor, Ph.D., Emeritus, Clemson University. Analysis (CofC)

GREIM, Peter, Professor, Ph.D., Freie Universitaet Berlin. Functional analysis (The Citadel)

HARRISON, Gary W., Professor, Ph.D., Michigan State University. Mathematical ecology, numerical analysis, dynamical systems (CofC)

HAYNSWORTH, W. Hugh, Professor, Ph.D., Emeritus, University of Miami. Topology, mathematics education (CofC)

HOYLE, Hughes, Associate Professor, Ph.D., University of North Carolina, Chapel Hill. Topology (The Citadel)

HURD, Spencer, Associate Professor, Ph.D., University of Georgia. Algebra (The Citadel)

IVEY, Thomas, Associate Professor, Ph.D., Duke University. Geometry and differential equations (CofC)

JIN, Renling, Associate Professor, Ph.D., University of Wisconsin-Madison. Foundations of mathematics, math logic, nonstandard analysis (CofC)

JOHNSTON, Katherine, Professor, Ph.D., Vanderbilt University. Semigroups, universal algebra (CofC)

JONES, Martin, Associate Professor, Ph.D., Georgia Institute of Technology. Probability and statistics (CofC)

JURISICH, Elizabeth, Associate Professor, Ph.D., Rutgers University. Infinite dimensional lie algebras; vertex operator algebras (CofC)

KASMAN, Alex, Associate Professor, Ph.D., Boston University. Algebraic geometry; mathematical physics (CofC)

KUNKLE, Tom, Associate Professor, Ph.D., University of Wisconsin, Madison. Numerical approximation (CofC)

LAFORTUNE, Stephane, Assistant Professor, Ph.D., University of Paris VII and University of Montreal.

Integrable systems, applied analysis.

LANGVILLE, Amy N., Assistant Professor, Ph.D., North Carolina State University. Numerical linear algebra, numerical methods, operations research (CofC)

LEMESURIER, Brenton, Associate Professor, Ph.D., Courant Institute of Mathematical Sciences at New York University. Numerical methods, partial differential equations (CofC)

LI, Jiexiang, Assistant Professor, Ph.D., Indiana University. Classical parametric estimation, nonparametric estimation on random fields (CofC)

MIGNONE, Robert J., Professor, Ph.D., Pennsylvania State University. Logic/set theory (CofC)

MITCHENER, W. Garrett, Assistant Professor, Ph.D., Princeton University. Applied mathematics, dynamical systems, stochastic processes with applications to population dynamics and learning models (CofC)

NORTON, Robert M., Professor, Ph.D. Oklahoma State University. Probability, mathematical statistics, nonparametric statistics, statistical quality control (CofC)

POTHERING, George, Professor, Ph.D., Emeritus, University of Notre Dame. Algorithm analysis, automated deduction (CofC)

SARVATE, Dinesh G., Professor, Ph.D., University of Sydney. Combinatorics (CofC)

SHIELDS, Sandi, Associate Professor, Ph.D., University of North Carolina, Chapel Hill. Geometric topology, dynamical systems (CofC)

SILVERMAN, Herb, Distinguished Professor, Ph.D., Syracuse University. Complex/real analysis (CofC)

SMIRNOV, Oleg, Associate Professor, Ph.D., Institute of Mathematics of the Russian Academy of Sciences, Novosibirsk. Algebra (CofC)

TANGEDAL, Brett, Associate Professor, Ph.D., University of California at San Diego. Number theory (CofC)

VARTANIAN, Arthur, Assistant Professor, Ph.D., Université de Bourgogne. Applied analysis and applied mathematics.

YOUNG, James, Assistant Professor, Ph.D., University of California, Berkeley. Stochastic processes and dynamical systems (CofC)

YOUNG, Paul, Professor, Ph.D., Oklahoma State University. Number theory, P-adic differential equations (CofC)

Public Administration Program

BOWMAN, Ann O., Professor, Ph.D., University of Florida. State and local administration, organizational theory (USC)

CHANDLER, Karen, Associate Professor, Ph.D., New York University. Arts and cultural management, case study and ethnographic methodology (CofC)

FELTS, Arthur A., Professor, Ph.D., Pennsylvania State University. Organization/bureaucratic theory, financial administration/public budgeting, public management administration (CofC)

GRAHAM, Blease, Professor, Ph.D., University of South Carolina. Administrative law, personnel, financial administration (USC)

HALFACRE-HITCHCOCK, Angela, Associate Professor, Ph.D., University of Florida. Methodology, public management, environmental politics (CofC)

HAYS, Steve, Professor, Ph.D., University of Florida. Personnel administration, administrative theory, administrative law (USC)

GETHA-TAYLOR, Heather, Ph.D., Maxwell School of Citizenship of Syracuse University. Personnel, public management (USC)

JOS, Philip H., Professor, Ph.D., University of South Carolina. Administrative ethics and accountability, public policy; administrative theory (CofC)

KEY, Janet L., Instructor, M.P.A., College of Charleston. Human resource management, nonprofit administration (CofC)

MILLS, Lindeke, Instructor, J.D., Georgetown University. Environmental and land use law (CofC)

MOORE, William V., Professor, Ph.D., Tulane University. State Politics, Intergovernmental relations (CofC)

MORRIS, Valerie, Professor, M.A., University of Michigan. Arts education (CofC)

PIERCE, Jon B., Assistant Professor, Ph.D., University of Tennessee. Human resource management, state and local government (USC)

SHANKLIN-PETERSON, Scott, Associate Professor, B.A., Columbia College. Arts and public policy, arts management (CofC)

TOMPKINS, Mark E., Associate Professor, Ph.D., University of Minnesota. American government, administrative theory, public policy (USC)

TYER, Charlie B., Associate Professor, Ph.D., University of Tennessee. Financial administration, personnel administration (USC)

Languages

ATTAFI, Abdellatif, Professor of French, Ph.D., L'Université de Lille. (CofC)

AVENDAÑO, Nadia, Assistant Professor of Hispanic Studies, Ph.D., University of Arizona. (CofC)

COZART, Angela, Associate Professor of Foundations, Secondary, and Special Education, Ph.D., University of Tennessee. (CofC)

ESCOBAR, José, Associate Professor of Hispanic Studies, Ph.D., University of Kentucky (CofC)

FOWLER, Robert, Associate Dean and Professor of Foundations, Secondary, and Special Education,

Ed.D., University of Florida. (CofC)

HOLMAN, Robyn, Associate Professor of French, Ph.D., University of Colorado at Boulder. (CofC)

MOREIRA, Maria Luci DeBiaji, Associate Professor of Hispanic Studies, Ph.D., University of Illinois at Champaign-Urbana. (CofC)

MORRIS, J. Frank, Associate Professor of Classics, Ph.D., University of Cincinnati. (CofC)

MORRISON, Shawn, Associate Professor of French, Ph.D., Michigan State University. (CofC)

NDUNDA, mutindi, Associate Professor of Foundations, Secondary, and Special Education, Ph.D., University of British Columbia. (CofC)

PERKINS, Robert, Associate Professor of Foundations, Secondary and Special Education, Ed.D., West Virginia University (CofC)

PHILLIPS, Darryl, Associate Professor of Classics and German, Ph.D., Duke University. (CofC)

RODRIGUEZ, Silvia, Assistant Professor of Hispanic Studies, Ph.D., Indiana University. (CofC)

SCLIPPA, Norbert, Professor of French, Ph.D., City University of New York. (CofC)

SKINNER, Michael E., Associate Professor of Foundations, Secondary, and Special Education, Ph.D., Ohio State University.

WEYERS, Joseph, Associate Professor of Hispanic Studies, Ph.D., University of New Mexico. (CofC)

ZEINER, Noelle K., Assistant Professor of Classics, Ph.D., Indiana University. (CofC)

Science and Mathematics for Teachers

AGREST, Mikhail, Professor, Ph.D., USSR Academy of Sciences. Physics and mathematics (CofC)

COLGAN, Mitch, Associate Professor, Ph.D., University of California at Santa Cruz. Climatology, environmental issues, reef ecology, and remote sensing (CofC)

DEAVOR, James, Professor, Ph.D., University of South Carolina. Analytical chemistry (CofC)

DUKES, Bob, Professor, Ph.D., University of Arizona. Astronomy (CofC)

EVERETT, Jean, Instructor, Ph.D., North Carolina State University. Plant ecology (CofC)

FLORENCE, Hope, Assistant Professor, M.A., University of South Carolina. Mathematics (CofC)

HARRISON, Gary, Professor, Ph.D., Michigan State. Mathematics. Biological models (CofC)

HAYNSWORTH, Hugh, Professor, Ph.D., University of Miami. Mathematics, topology (CofC)

IVEY, Tom, Assistant Professor, Ph.D., Duke University. Differential geometry, partial differential equations (CofC)

JETER, Deborah, Instructor, M.A.T., The Citadel. Mathematics (CofC)

JONES, Linda, Associate Professor, Ph.D., Illinois Institute of Technology. Biomedical optics (CofC)

MARTIN, Elizabeth, Associate Professor, M.S., Georgia State University. Analytical chemistry (CofC)

NABORS, Martha, Professor, Ph.D., The Pennsylvania State University. Curriculum and instruction, science education (CofC)

NDUNDA, mutindi, Assistant Professor, Ph.D., University of British Columbia. Mathematics and science curriculum, educational policy studies (CofC)

NEFF, James, Associate Professor, Ph.D., University of Colorado. Physics and astronomy (CofC)

NOONAN, Norine, Dean, Ph.D., Princeton University. Biology (CofC)

NORTON, Robert, Professor, Ph.D., Oklahoma State University. Mathematics, probability and statistics, statistical quality control (CofC)

NUSBAUM, Robert, Professor, Ph.D., University of Missouri, Rolla. Mineralogy, Volcanology and planetary geology (CofC)

PETERS, John S., Senior Instructor, M.S., University of Charleston, S.C. Marine Biology (CofC)

RHODES, Elizabeth, Instructor, M.S., University of Charleston, S.C. Environmental studies (CofC)

SKINNER, Mike, Professor, Ph.D., Ohio State University. Special education (CofC)

SWANSON, Julie D., Assistant Professor, Ph.D., University of South Carolina. Educational foundations and specializations (CofC)

VAN SICKLE, Meta, Professor, Ph.D., University of South Florida. Science education (CofC)

VEAL, William, Assistant Professor, Ph.D., University of Georgia. C & I, science education (CofC)

WALLACE, Ann, Associate Professor, Ph.D., University of Maryland. Mathematics education (CofC)

WATTS, Fred, Professor, Ph.D., Virginia Polytechnic Institute and State University. Physics (CofC)

WELCH, Frances, Dean, Ph.D., University of South Carolina. Education Psychology (CofC)

WRAGG, Jeff, Senior Instructor, Ph.D., University of Missouri – Columbia. Experimental physics, laser spectroscopy (CofC)
